Ethnostatistics Qualitative Foundations For Quantitative Research:

Ethnostatistics Robert P. Gephart, 1988-03 Averages ratios means modes medians tests of significance and best fit these are now part of our everyday discourse Yet statistics seemingly threaten to bury us under their sheer weight Indeed social science contributes a good deal to the proliferation of statistics while contributing relatively little to our understanding of just how such statistics are produced and used by their makers and consumers Ethnostatistics a term coined by Gephart refers to the study of the social production and use of statistics He suggests statistics can be used to produce more effective reflexive social research After examining the domain examples and levels of ethnostatistics the author outlines a 3 level approach for producing testing and examining statistics Gephart presents his concept and examples more crisply and systematically than is usual in qualitative sociological writing This is an implicit and welcome merging of the two sociologies Contemporary Sociology **The Sage Encyclopedia of Qualitative Research Methods: A-L ; Vol. 2, M-Z Index** Lisa M.

Given, 2008-08-21 An encyclopedia about various methods of qualitative research **Handbook for Synthesizing Qualitative Research** Margarete Sandelowski, Julie Barroso, 2007 Print CourseSmart **Clinical Acupuncture** Gabriel Stux, Richard Hammerschlag, 2011-06-28 Acupuncture is rapidly moving out of the arena of alternative medicine in large part because it is grounded more firmly than other alternative treatments in research This book provides readers with the up to date information on the clinical bases of acupuncture *Exploratory Research in the Social Sciences* Robert A. Stebbins, 2001-05-14 Robert Stebbins addresses an area of social science that receives scant attention exploration as a methodological process The author emphasises its importance then leads the reader through the process in a highly readable way **SAGE Handbook of Mixed Methods in Social & Behavioral Research** Abbas Tashakkori, Charles Teddlie, 2021-06-17 Surveying the differing viewpoints and disciplinary approaches to using mixed methods this volume helps readers explore the answers to a wide range of key questions in the field including Can using mixed methods offset the disadvantages that certain methods have by themselves What criteria can a researcher use to select the best mixed methods design for his or her project and What are the points of agreement and controversy regarding design issues in mixed methods research This breakthrough Second Edition containing all new chapters examines all aspects of mixed methods research across a variety of disciplines Key Features Covers all aspects of inquiry from conceptualizing research to selecting methods analyzing and interpreting data and reporting findings Draws on the work of a mix of internationally recognized researchers as well as new and emerging researchers to provide a diversity of perspectives Gives specific examples from a wide range of disciplines to help readers understand the issues and controversies in this evolving area Presents rich material for discussion and new ideas for implementing mixed methods research to provide readers with a cutting edge resource Provides pedagogical tools such as learning objectives discussion questions and exercises and extensive cross referencing

A World Scientific Encyclopedia Of Business Storytelling, Set 2: Methodologies And Big Data Analysis Of

Business Storytelling (In 5 Volumes) ,2023-10-13 This set of multi reference works is meant to be read together as the five volumes interlace one another like the laces of a shoe in the famous painting by Vincent van Gogh The question of who will wear the shoes is long debated in art history and philosophy If we take these five volumes from different points of view on the theory and practice of business storytelling then we have a crisscrossing a new and impressive dialogue for the reader This set is presented as a new way to lace up the laces of business storytelling Volume 1 aims to help and inspire leaders business owners and researchers in creating a commitment to ethical and sustainable changes and ideas and live in a world of high complexity without getting stressed but experiencing freedom instead The book combines tools case studies and theories about the ethical change management method of True Storytelling and other perspectives and views on ethics and storytelling It delves into important topics such as true storytelling sustainability and freedom storytelling and start ups in the health industry storytelling and diversity and culture storytelling and teams storytelling sustainability and the UN Goals storytelling and well being storytelling in higher education and storytelling and fundraising Book authors are experienced and successful researchers business owners leaders and consultants from Scandinavia the USA Africa and Europe Volume 2 is an endeavor into the creation of new concepts for engaging with sustainability It maintains that storytelling is important for our emplacement in nature and can be important for enacting another relationship between nature and the cultural artifice our social and material constructions of houses cities villages harbors streets and railways and our use of objects and artifacts to construct our lives Business storytelling communication is that space for social symbolic work that brings the symbolic objects of the organization the human and the natural environment into a dialogical relationship Volume 3 posits that organizations are arranged as social symbols that are arranged in institutions based on the needs of organics for example health food shelter mating leisure and labor Organics as a social symbolic object specifically humans have emotions language and culture to organize their institutions and organizations In this book readers will find that many of the authors attempt to understand the body s exclusion or attempt to bring the body back into the organization Business storytelling communication takes aim at the social symbolic work of making space to negotiate the social arrangement of organizations with its organic components Volume 4 covers a variety of methodological topics from a storytelling perspective Why a storytelling perspective Consider that a common business research goal is to convince others that what the researcher has to say matters If the researcher is a basic researcher who wishes to promote a theory the goal is to make a convincing case for the value of that theory If the researcher is an applied researcher who wishes to promote a particular application intervention or policy change the goal is likewise to make a convincing case Either way the researcher has a story to tell and the onus is on the researcher to tell the best possible story storytelling failures likely will result in a failure to convince others of the value of one s theory or application Here is where methodological issues come into play Poor methodology whether in the form of less than optimal study designs or invalid statistical analyses harms story quality In contrast high quality methods

and statistics enhance story quality Moreover the larger one s methodological and statistical toolbox the greater the opportunities for researchers to tell effective stories The chapters in this book come from a wide variety of perspectives and should enhance researchers storytelling in the following ways By opening many different methodological and statistical perspectives researchers should be more able to think of research stories that otherwise would remain unavailable or inaccessible Secondly the present chapters should aid researchers in better executing their research stories Therefore researchers and graduate students will find this book an invaluable resource Volume 5 opens a window into the world of quantum storytelling as an organizational research methodology providing numerous exemplars of work in this storytelling science that has disrupted qualitative inquiry only with the intention of providing expanded improved and generative ways of understanding and knowing the narratives that emerge from qualitative interviews and observations during organizational research studies

Business Research Through Argument Mike Metcalfe,2012-12-06 This book suggests that business research in the collection analysis and communication of evidence will benefit from explicit acceptance of research as argumentation Argumentation is the process of compiling an argument through selection and organization of the relevant evidence Recently business research methods books have placed too much emphasis on the scientific method as brute empiricism using only large sample statistical testing and demanding prediction through retesting old theories Especially with regard to the study of human activity there is now much evidence that there is not one special scientific method This book argues that all types of empirical data including statistics and personal experiences be accepted as data but that it is essential that these observations be explained This book will provide researchers and postgraduate business students with a strategy for conducting research that encourages thought provides a way of critically perceiving previous research as well as suggesting a logical structure for communicating their research
