**Assessment of Planetary Protection Requirements for Spacecraft Missions to Icy Solar System Bodies** National Research Council,Division on Engineering and Physical Sciences,Space Studies Board,Committee on Planetary Protection Standards for Icy Bodies in the Outer Solar System,2012-08-10 NASA s exploration of planets and satellites during the past 50 years has led to the discovery of traces of water ice throughout the solar system and prospects for large liquid water reservoirs beneath the frozen ICE shells of multiple satellites of the giant planets of the outer solar system During the coming decades NASA and other space agencies will send flybys orbiters subsurface probes and possibly landers to these distant worlds in order to explore their geologic and chemical context Because of their potential to harbor alien life NASA will select missions that target the most habitable outer solar system objects This strategy poses formidable challenges for mission planners who must balance the opportunity for exploration with the risk of contamination by Earth s microbes which could confuse the interpretation of data obtained from these objects The 2000 NRC report Preventing the Forward Contamination of Europa provided a criterion that was adopted with prior recommendations from the Committee on Space Research of the International Council for Science This current NRC report revisits and extends the

findings and recommendations of the 2000 Europa report in light of recent advances in planetary and life sciences and among other tasks assesses the risk of contamination of icy bodies in the solar system

**Equilibrium, Markets and Dynamics** Cars H. Hommes, Roald Ramer, Cees A. Withagen, 2002-05-14 This book contains essays in honour of Claus Weddepohl who after 22 years is retiring as professor of mathematical economics at the Department of Quantitative Economics of the University of Amsterdam Claus Weddepohl may be viewed as the first Dutch mathematical economist in the general equilibrium tradition of Arrow Debreu and Hahn The essays in this book are centered around the themes Equilibrium Markets and Dynamics that have been at the heart of Weddepohl's work on mathematical economics for more than three decades The essays have been classified according to these three themes Admittedly such a classification always is somewhat arbitrary and most essays would in fact fit into two or even all three themes The essays have been written by international as well as Dutch friends and colleagues including Weddepohl's former Ph D students The book starts with a review of Claus Weddepohl's work by Roald Ramer who has been working with him in Amsterdam for all those years The review describes how Weddepohl became fascinated by general equilibrium theory in the early stages of his career how he has been working on the theory of markets throughout his career and how he turned to applications of nonlinear dynamics to price adjustment processes in a later stage of his career The first part of the book Equilibrium collects essays with general equilibrium theory as the main theme

**Modern Celestial Mechanics: From Theory to Applications** Alessandra Celletti, Sylvio Ferraz-Mello, Jacques Henrard, 2013-06-29 At the opening of the Third Meeting on Celestial Mechanics CELMEC III strong sensations hit our minds The conference 18-22 June 2001 was being held in Villa Mondragone a beautiful complex of buildings and gardens located within the township of Monte Porzio Catone on the hills surrounding Rome A former papal residence the building has been recently restored by the University of Rome Tor Vergata to host academic activities and events The conference room is called Salone degli Svizzeri here Gregory XIII on February 24 1582 gave its sanction to the reform of the Julian calendar and declared officially in use the calendar still adopted nowadays The magnificent high walls and tall ceiling strongly resounded giving to our voice a peculiar Vatican sound which took us by

surprise May be we thought a distant echo of the very words of Gregory XIII proclaiming the modern calendar was still haunting the room Around us in the audience many countries were represented thus indicating that the idea of putting together the three souls of modern Celestial Mechanics perturbation theories solar and stellar system studies spaceflight dynamic had been successful CELMEC III is in fact the latest of a series of meetings the first two editions took place in 1993 and 1997 in L Aquila Italy whose aim is to establish a common ground among people working in Celestial Mechanics yet belonging to different institutions such as universities astronomical observatories research institutes space agencies and industries

**Collective Labour Rights for Self-Employed Workers** Charalampos Stylogiannis, 2023-08-22 Platform work arrangements are often defended as an expression of technological progress with the potential to enable people to work as self employed individuals often without any supervision or control However by now it is well documented that platform work not only shares important features of flexibility and precariousness with other casual work arrangements that are on the rise around the world but it also entails the risk of excluding a significant portion of workers from the protection of fundamental collective labour rights including their coverage from collective agreements In this important and timely book the author shows how a human rights based approach HRBA towards collective labour rights can bridge this protection gap Such an approach identifies workers regardless of their employment status as rights holders that are entitled to rights like the right to collective bargaining derived from international human rights and labour rights instruments Fully describing the phenomenon of platform work as well as presenting a detailed global overview of responses related to the challenges stemming from platform work arrangements the research inter alia covers aspects such as the following problems challenges and questions related to platform work arrangements and how those are linked to broader labour market trends platform work s deeper foundational implications for labour law legal developments related to the regulation of platform work with an assessment of their limits when it comes to collective labour rights also recognised as human rights various ways in which platform workers and other atypical workers have managed to exercise their collective labour rights and promising indications of closer cooperation between organised labour and workers in non standard forms of employment The analysis draws on international human rights and labour rights treaties and conventions domestic legislation and regulations rulings from international and national courts and interpretative and authoritative sources including the relevant legal literature The book manifests and responds to a genuine need for in depth research with respect to the protection of the human rights of platform workers with an analytical framework that will ensure their adequate protection Its crucial observations will be welcomed by practitioners in labour law human rights law and competition law as well as by academics human resources professionals and labour and employment policymakers
