Europe And Globalization:

Europe and Globalization H. Kierzkowski, 2002-06-14 Globalization has provoked passionate debate and street demonstrations reminiscent of May 1968 The central question of Europe and Globalization is what did Europe do for globalization in the past and what is globalization doing for Europe today The contributors to the volume assess this complex process and Europe's role within it Bringing together a team of leading international scholars from different disciplinary backgrounds this is a valuable and wide ranging contribution to the debate

European Union and New Regionalism Mario Telò, 2017-12-08 This title was first published in 2001 This is a collection of papers that look at the structure of the global economy and its changing paradigms over the years The contributors look at how the classic concept of state autonomous sovereign and freed of all constraint never really reflected the reality of the international scene despite the role it has played in realist and neo realist theory for many decades Instead they consider that the political social and economic characteristics originally attributed to states seem increasingly to be expressed through regional constructs The papers in this volume show that even within regionalism there are a variety of different models that exist and examine five of those models the European Union Mercosul Mercosur the North American Free Trade Area NAFTA the Association of South East Asian Nations ASEAN and the South African Development Community SADC

Globalization and Europe Roland Axtmann, 1998-10-01 As the new millennium approaches we realise that we live in a truly global world of dense and ever increasing inter and transnational economic political and cultural interdependence Yet globalization is a contradictory process Processes of global integration and interdependence are unfolding together with processes of fragmentation and regionalization Disintegration and fragmentation of political economic and cultural structures that spur local and regional conflicts and dislocations are counter balanced by moves towards unification integration and co operation The empirical analysis of these processes and the emergent local regional and global structures will become the main challenge to the social sciences in the years to come This book offers a contribution to this task Its main focus is the question as to how the state in Europe has been implicated in and affected by globalization It places the interactions between globalization and the European state in a historical perspective going back to the age of discovery and the formation of the modern state yet it also addresses the complexities and uncertainties of the current age Distinguished scholars from political science international relations sociology philosophy and history all of whom have been specially commissioned to write a contribution for this book approach the unfolding dynamics of this age of transition from a multidisciplinary perspective

Europe and the Management of Globalization Wade Jacoby, Sophie Meunier, 2013-09-13

European politicians often speak of their efforts to manage globalization. At one level this is merely a rhetorical device to make globalization more palatable to citizens and prove that policy makers are still firmly in control of their country's fate. This volume argues that the advocacy of managed globalization goes beyond rhetoric and actually has been a primary driver of major European Union (EU) policies in the past twenty years. The EU has indeed tried to manage globalization through the use of five major mechanisms: 1) expanding policy scope, 2) exercising regulatory influence, 3) empowering international institutions, 4) enlarging the territorial sphere of EU influence, and 5) redistributing the costs of globalization. These mechanisms are neither entirely novel nor are they always effective, but they provide the contours of an approach to globalization that is neither ad hoc deregulation nor old style economic protectionism. The recent financial crisis may have seemed initially to vindicate the European efforts to manage globalization, but it also represented the limits of such efforts without the full participation of the US and China. The EU cannot rig the game of globalization, but it can try to provide predictability, oversight, and regularity with rules that accommodate European interests. This book was based on a special issue of *Journal of European Public Policy*.

Globalization and Europe Daniel Sheldon Hamilton, Joseph P. Quinlan, 2008. What does globalization mean for Europe? What are the gains and what are the pains? Who's winning and who's losing? In this volume, Dan Hamilton and Joe Quinlan continue their award-winning series on international economic issues with an up-to-date look at globalization's impact on Europe. They chart changing flows of trade, investment, people, money, and ideas, and they explain globalization's effect on European consumers, workers, companies, and governments. *Globalization and Europe* highlights opportunities, identifies challenges, and offers some surprising conclusions.

Europe, the State and Globalisation Simon Sweeney, 2014-09-11. *Europe, the State and Globalisation* explores the interplay between the state and state sovereignty, nationalism, European integration, and globalisation. It provides essential foundations in all these areas while using stimulating arguments to prompt discussion and provoke interest in the relationships between these processes. Throughout *Europe, the State and Globalisation*, various issues of historical and theoretical importance are addressed, including the institutions of the European Union, integration theory, regional policy, multilevel governance, and EU enlargement. International Relations theory, the nature and impact of globalisation, the challenges of transnational government, and the changing nature of the state. The text is ideal for undergraduate courses in European Politics.

Asia and Europe in Globalization Göran Therborn, Habibul Haque Khondker, 2006.
