Roads to Power, Roads to Crisis Alec Zuercher Reichardt,2025-08-26 Infrastructure was key to British victory in the Seven Years War yet was its undoing on the roads to revolution *Roads to Power Roads to Crisis* maps the Seven Years War for the American Interior and reconstructs the inter imperial roots of the American Revolution Centering on the eighteenth century geopolitical struggle for the greater Ohio Valley Alec Zuercher Reichardt reframes a familiar story by uncovering the larger imperial competition to gain control and exploit communication networks across North America and the Atlantic Through a comparative perspective Reichardt traces British infrastructural development alongside the efforts of other major powers in North America including the French Empire the Haudenosaunee Confederacy the Cherokee Nation and other Indigenous polities By the height of the Seven Years War this contest for the American Interior had propelled the British to construct imperial communications infrastructure that outpaced and overwhelmed the efforts of France its primary European rival and that co opted key Native information and transportation channels British success in wartime was borne not just of a newly enlarged and centralized infrastructure state but also of that expanded state s ability to exploit extra governmental circuits notably metropolitan and colonial newspapers and Indigenous ally networks The rise of the British North American infrastructure state however was also the empire s undoing The same roads printing presses and postal networks constructed and funded by the War Office and imperial treasury also became the primary routes of incendiary print popular mobilization and propaganda In the wake of the Seven Years War the ligaments of the British empire inadvertently provided the material channels for those who sought to

oppose the British state The roads that led to British imperial power then became routes to imperial crisis The International History of Communication Study Peter Simonson, David W. Park, 2015-10-14 The International History of Communication Study maps the growth of media and communication studies around the world Drawing out transnational flows of ideas institutions publications and people it offers the most comprehensive picture to date of the global history of communication research and education This volume reaches into national and regional areas that have not received much attention in the scholarship until now including Asia Latin America Africa and the Middle East alongside Europe and North America It also covers communication study outside of academic settings in international organizations like UNESCO and among commercial and civic groups It moves beyond the traditional canon to cover work by forgotten figures including women scholars in the field and those outside of the United States and Europe and it situates them all within the broader geopolitical institutional and intellectual landscapes that have shaped communication study globally Intended for scholars and graduate students in communication media studies and journalism this volume pushes the history of communication study in new directions by taking an aggressively international and comparative perspective on the historiography of the field Methodologically and conceptually the volume breaks new ground in bringing comparative transnational and global frames to bear and puts under the spotlight what has heretofore only lingered in the penumbra of the history of communication study
