Campbell,2017-09-29 The goal of the twelve essays in this volume contributed by scholars in the fields of history literature art history and medicine is to enrich our understanding of cultural discourses on ageing in early modern Europe While a number of books examine old age in other eras and a few touch on the early modern period this is the first to focus explicitly on representations of ageing in Europe from 1350 1700 These studies invite the reader to take a closer look at images of ageing they show that representations are embedded in specific communities life situations and structures of power As well the book explores how representations of old age function in various and often surprising ways as repositories of socio cultural anxieties as strategies of self fashioning and as instruments of ideology capable of disciplining the body and the body politic Since this book is about how old age as a cultural category was produced and maintained through representation the essays in this volume are organised thematically across geographic disciplinary and media boundaries to foreground the politics and poetics of representational strategies The

contributors to this collection show that our understanding not only of ageing but also of power subjectivity gender sexuality and the body is enriched by the study of cultural representations of old age Through sensitive and sophisticated readings of a wide range of sources these papers collectively demonstrate the formative influence and generative force of images of old age within early modern European culture      **The Burlington Magazine** Robert Edward Dell, Charles John Holmes, Harold Child, Lionel Cust, Roger Fry, 1915      A Quantum City Ludger Hovestadt, Vera Bühlmann, 2015-06-16 We know the specific strengths of various cities are aware of their ranking are able to discuss their density and growth But what do all cities have in common what do we know about the lowest common denominator The city as a species the primal genetic material of the city this is the subject of A Quantum City This colossal work is a love letter to the city and intellectual culture We follow the fictional narrative figure Orlando beginning in 320 BC on his odyssey through the Western world up to the present time The book is divided into four interrelated chapters and can be read page by page in a discursive manner however randomly browsing through the book also offers new and multi faceted interpretations Great intellectual achievements are compared with obscure and mundane events A Quantum City offers an inspiring view of the city that is in us and around us
