**Freud and the Post-Freudians** James Alexander Campbell Brown,1964 Brief account of main concepts of Freudian Neo Freudian and Post Freudian schools of psychology presenting theories of Adler Jung Horney Fromm Sullivan and others For other editions see Author Catalog **Freud and the Post-freudians** J. A. C. Brown,1964 **Freud and the Post-Freudians** J. A. C. Brown,1961 **Freud and the Post-Freudians** James Alexander Campbell Brown,1967 Freud and the Post-Freudians James Bunyan,1961 *Freudian Repression* Michael Billig,1999-11-04 This book presents a reinterpretation of Freud to show how language can be expressive and repressive **Freudians and Schadenfreudians** Jeffrey Berman,2024-08-22 Sigmund Freud can be a polarizing figure beloved by many and despised by some Focusing on eight key writers and scholars who either passionately loved or gleefully loathed Freud this book represents Freud's wide legacy the reach of his ideas their controversies and their ability still to provoke inspire confound outrage and compel The book begins by focusing on four highly prolific authors whose admiration for Freud is boundless Lionel Trilling Harold Bloom Kurt R Eissler and Peter Gay Berman then explores four more writers whose aim was not simply to debunk Freud and destroy his monstrous creation but to cast both into hell D H Lawrence Vladimir Nabokov Thomas Szasz and Frederick Crews Each chapter discusses the author's involvement with Freud exploring the continuities and discontinuities of his or her writings as well as offering snapshots of the writers suggesting how their personal and professional lives were inextricably related Berman draws out some surprising commonalities between the Freudolaters and Schadenfreudians going on to discuss the current state of psychoanalysis and the psychoanalytic credos by which contemporary analysts live **Your Freudian Psychoanalysis** Anthony Dugdale,2012-12-14 Forget the expensive couch and do it here in 28 cheat proof questionnaires *Freud's Converts* Vicki Clifford,2020-06-16 This work is an exploration of the relationship which psychotherapy has with religion Sigmund Freud and Carl Rogers were chosen for this exposition because they were each seduced by the high status given to science Freud and Rogers both founders of psychotherapies left a legacy which is not that of scientists whom they claimed they were Freud and Rogers each had a problematic relationship with religion This has had a lasting effect on the work and attitudes of their respective followers In order to explore effectively this relationship the work begins with a critical examination of the historical context in which both Freud and Rogers worked and how in their determination to be scientists both missed the importance of the religious The work continues with an exploration of the effects of this legacy on the work of contemporary psychotherapists The context in which their followers work relies on a relationship with the founder which goes beyond that of science and in addition each practitioner is influenced by socio economic circumstances which are peculiar to them The resistance from psychotherapists to embrace religion has been complex although as it will be illustrated today there are some who are acknowledging the importance of the spiritual That psychotherapy functions as a religious movement has been excluded by practitioners in their determination to reflect the wishes of their founder which was that

their work should be regarded as science Psychotherapists have traditionally been considered the custodians of the real and that their clients are the ones suffering from delusions With respect to their attitudes to religion not least the spiritual the positions seem to be reversed Jacques Lacan and the Other Side of Psychoanalysis Justin Clemens, Russell

Grigg, 2006-05-23 Articles by noted Lacanian psychoanalysts and scholars discussing issues that emerge in Lacan's Seminar XVII newly translated that import fields of psychoanalysis philosophy political theory cultural studies and literary studies

**Freudian Analysis & Jungian Synthesis** Professor Andreas Sofroniou, PhD, D.Sc., 2011-06-28 If one schematically compares the three principal tendencies in psychotherapy Freud Jung Adler with regard to the direction in which their central thought leads one could say The analytical method of Sigmund Freud looks for the *causae efficientes* the causes of the later behavioural disturbances Alfred Adler considers and treats the initial situation with regard to a *causa finalis* and both see in the drives the *causae materiales* In Carl Gustav Jung's case the term synthesis is based on his abandonment of the causal thinking of the alternative psychological methods of treatment Jungian psychotherapy therefore is not an analytical procedure in the usual meaning of this term Whatever the differences among Freud's Jung's and Adler's extensive works on the therapeutic methodologies scientists artists thinkers and practitioners accept the great importance of Freud's and Jung's studies for medicine psychology anthropology religion art history literature etc *The Freedom of the Self* Eugene M. Abrams, 2012-12-06 Building on the work of Janet Jung and Fairbairn the author details a comprehensive theory of pathology and integrates the major schools of treatment into a holistic outpatient milieu therapy Abrams emphasizes the role of personality dissociation in depressive pathologies and works toward unifying the self into a more aware spiritually connected whole Clinicians working from a variety of viewpoints will find fruit in his work Freudian Analysts/Feminist Issues Judith M. Hughes, 1999-01-01 In this book Judith M Hughes makes a highly original case for conceptualizing gender identity as potentially multiple She does so by situating her argument within the history of psychoanalysis Hughes traces a series of conceptual lineages each descending from Freud In the study Helene Deutsch Karen Horney and Melanie Klein occupy prominent places So too do Erik H Erikson and Robert J Stoller Among contemporary theorists Carol Gilligan and Nancy Chodorow are included in Hughes's roster In each lineage Hughes discerns an evolutionary narrative Deutsch tells a story of retrogression Erikson names his epigenesis and Gilligan continues in that vein Horney's discussion recalls sexual selection Stoller's and Chodorow's theorizing brings artificial selection to mind and finally in Klein's work Hughes sees a story of natural selection and adds to it her own notion of multiple gender identities **An Introduction to the Collected Works of C. G. Jung** Clifford Mayes, 2016-03-24 An Introduction to the Collected Works of C G Jung *Psyche as Spirit* offers a concise and engaging overview of Jung's work and contributions to the field of psychology Mayes first examines Jung's philosophical influences as well as his work and eventual break with Sigmund Freud providing insights into how these experiences shaped Jung's theory Mayes brings into focus the major concepts and themes explored in Carl Gustav Jung's

Collected Works including the ego Self Axis archetypes personality types and the Collective Unconscious presenting a thorough introduction and a valuable resource for both Jungian students as well as Jungian scholars *Freud's focus Badri's Basis and Religious Therapies* Mohd Nasir Masroom, 2022-12-05 Islamic psychology and Western psychology are two areas of knowledge that are often seen to be in conflict This clash causes rejection of each other or at least the difficulty of reconciling the two Islamic psychology stands on the belief that spiritual elements are very important and have a great influence on human psychology Whereas Western psychology rejects the spiritual elements in total Western psychology draws conclusions based on experience and scientific research methods that are necessarily observable through human senses While Islamic psychology does not limit the source of knowledge through the senses and experience solely Besides experience and senses as sources of knowledge Islamic Psychology also makes the holy book al Quran and Sahih Hadith corpus of the sayings or traditions of the Prophet Muhammad as the most important and reliable sources Al Quran emphasizes the spiritual elements of the heart mind and soul to understand human psychology On the other hand in the world of psychology Freud is so close and synonymous with psychology that it is almost impossible to deny his contribution While Malik Badri is a prominent figure in Islamic Psychology who first gave consciousness that Islamic psychology and Western psychology have different foundations dimensions and directions In this keynote address Professor Datuk Dr Mohamed Hatta Shaharom tried to bridge the clashes between the two He talked about Freud's views on humans and Malik Badri's criticism of the view He also explained how the clash of the two can be harmonized and eventually can be used to achieve community well being We are very fortunate to have a scholar like Professor Datuk Dr Mohamed Hatta Shaharom who are able to see both fields in a balanced way and offer a harmonious path so that we can adapt where necessary and respect each other
