**Freud's Converts** Vicki Clifford,2020-06-16 This work is an exploration of the relationship which psychotherapy has with religion Sigmund Freud and Carl Rogers were chosen for this exposition because they were each seduced by the high status given to science Freud and Rogers both founders of psychotherapies left a legacy which is not that of scientists whom they claimed they were Freud and Rogers each had a problematic relationship with religion This has had a lasting effect on the work and attitudes of their respective followers In order to explore effectively this relationship the work begins with a critical examination of the historical context in which both Freud and Rogers worked and how in their determination to be scientists both missed the importance of the religious The work continues with an exploration of the effects of this legacy on the work of contemporary psychotherapists The context in which their followers work relies on a relationship with the founder which goes beyond that of science and in addition each practitioner is influenced by socio economic circumstances which are peculiar to them The resistance from psychotherapists to embrace religion has been complex although as it will be illustrated today there are some who are acknowledging the importance of the spiritual That psychotherapy functions as a religious movement has been excluded by practitioners in their determination to reflect the wishes of their founder which was that

their work should be regarded as science Psychotherapists have traditionally been considered the custodians of the real and that their clients are the ones suffering from delusions With respect to their attitudes to religion not least the spiritual the positions seem to be reversed Jacques Lacan and the Other Side of Psychoanalysis Justin Clemens, Russell

Freudian Analysis & Jungian Synthesis Professor Andreas Sofroniou, PhD, D.Sc., 2011-06-28 If one schematically compares the three principal tendencies in psychotherapy Freud Jung Adler with regard to the direction in which their central thought leads one could say The analytical method of Sigmund Freud looks for the *causae efficientes* the causes of the later behavioural disturbances Alfred Adler considers and treats the initial situation with regard to a *causa finalis* and both see in the drives the *causae materiales* In Carl Gustav Jung's case the term synthesis is based on his abandonment of the causal thinking of the alternative psychological methods of treatment Jungian psychotherapy therefore is not an analytical procedure in the usual meaning of this term Whatever the differences among Freud's Jung's and Adler's extensive works on the therapeutic methodologies scientists artists thinkers and practitioners accept the great importance of Freud's and Jung's studies for medicine psychology anthropology religion art history literature etc **The Freedom of the Self**

Hughes, 1999-01-01 In this book Judith M Hughes makes a highly original case for conceptualizing gender identity as potentially multiple She does so by situating her argument within the history of psychoanalysis Hughes traces a series of conceptual lineages each descending from Freud In the study Helene Deutsch Karen Horney and Melanie Klein occupy prominent places So too do Erik H Erikson and Robert J Stoller Among contemporary theorists Carol Gilligan and Nancy Chodorow are included in Hughes's roster In each lineage Hughes discerns an evolutionary narrative Deutsch tells a story of retrogression Erikson names his epigenesis and Gilligan continues in that vein Horney's discussion recalls sexual selection Stoller's and Chodorow's theorizing brings artificial selection to mind and finally in Klein's work Hughes sees a story of natural selection and adds to it her own notion of multiple gender identities **An Introduction to the Collected Works of C.
