The Economic Statecraft of the Gulf Arab States Karen E. Young,2022-12-29 This book is a study of a shift in the politics and finance of development from one centered in the institutions and ideas of the post World War II global political economy to the emergence of South South economic ties and the rise of authoritarian or state capitalism as an alternative model of development This is a study of the

economic statecraft of the Gulf Arab states specifically the deployment of aid investment and direct support from some of the wealthiest petrostates of the world to their surrounding sphere of influence within the Middle East Horn of Africa and West Asia These new models of development finance aid and intervention include distinct institutional designs and ideological bases For the United Arab Emirates Saudi Arabia and Qatar the preference for state led and often state owned development is a strategic priority in the energy sector a mechanism for domestic economic growth and consolidation of wealth among leadership and ruling families Exporting that agenda as a foreign economic policy tool continues all of the domestic benefits while also affirming broader regional political goals World Englishes in the Arab Gulf States Kay Gallagher, 2025-04-29

Kay Gallagher gathers insightful research from across the lower Arabian gulf to uncover the richness and diversity of World Englishes within the contemporary Arab Gulf states Her volume presents novel research from this emerging nexus of rapid economic social and linguistic development The countries of the lower Arabian Gulf Bahrain Kuwait Oman Qatar Saudi Arabia and the United Arab Emirates have to varying degrees harnessed English as an internal working language and as a means to communicate globally Gulf countries that have not featured much in the WE literature to date are highlighted in this volume including Bahrain and Kuwait and the use of English in the emerging colossus of Saudi Arabia is examined Novel insights from more prominent locations are presented here for the first time including the use of English to counter negative Islamic stereotypes during the FIFA World Cup 2022 in Qatar and its role in ensuring safety in a multilingual high risk industry in the UAE New research into the challenges encountered in English medium higher education in Oman and Kuwait is reported also The linguistic features of Gulf English are explored and the interplay and tensions between Arabic and English and other languages are addressed The Englishes of expatriate populations in the Gulf are examined including the English identity of majority and minority resident transnational groups The issue of whether a distinctive variety of Gulf English has emerged in this multilingual melting pot characterized by transience and flux is debatable and the establishment of Gulf English as an endonormative new variety remains elusive This book will appeal to those with an interest in World Englishes in general as well as those who are interested in the roles and varieties of English in use in this globally unique and rapidly evolving context The six states of the Lower Gulf Bahrain Kuwait Oman Qatar Saudi Arabia and the United Arab Emirates UAE form an economic and political alliance known as the Gulf Cooperation Council GCC The region's oil rich economies have attracted millions of migrant workers both blue collar and white collar from East and West Transnational workers have brought linguistic diversity along with multiple varieties of English to this traditionally Arabic speaking region amplifying an increased internal demand for English such that English is shifting in the Gulf from a foreign language to a lingua franca *Colloquial Arabic of the Gulf and Saudi Arabia* Clive Holes, 1984 A step by step course in written and spoken Arabic of the Gulf and Saudi Arabia Borrowing Shana Poplack, 2018 Studies of bilingual behavior have been proliferating for decades yet short shrift has been given to its major manifestation the incorporation of words from one language into the

discourse of another This volume redresses that imbalance by going straight to the source bilingual speakers in their social context Building on more than three decades of original research based on vast quantities of spontaneous performance data and a highly ramified analytical apparatus Shana Poplack characterizes the phenomenon of lexical borrowing in the speech community and in the grammar both synchronically and diachronically In contrast to most other treatments which deal with the product of borrowing if they consider it at all this book examines the process how speakers go about incorporating foreign items into their bilingual discourse how they adapt them to recipient language grammatical structure how these forms diffuse across speakers and communities how long they persist in real time and whether they change over the duration Attacking some of the most contentious issue in language mixing research empirically it tests hypotheses about established loanwords nonce borrowings and code switches on a wealth of unique datasets on typologically similar and distinct language pairs A major focus is the detailed analysis of integration the principal mechanism underlying the borrowing process Though the shape the borrowed form assumes may be colored by community convention Poplack shows that the act of transforming donor language elements into native material is universal Emphasis on actual speaker behavior coupled with strong standards of proof including data driven reports of rates of occurrence conditioning of variant choice and measures of statistical significance make *Borrowing* an indispensable reference on language contact and bilingual behavior

empirical data with rigorous discussion of several long standing theoretical problems in the broader field of child language development

Arabic Historical Dialectology Clive Holes, 2018-08-30 This book by a group of leading international scholars outlines the history of the spoken dialects of Arabic from the Arab Conquests of the seventh century up to the present day It specifically investigates the evolution of Arabic as a spoken language in contrast to the many existing studies that focus on written Classical or Modern Standard Arabic The volume begins with a discursive introduction that deals with important issues in the general scholarly context including the indigenous myth and probable reality of the history of Arabic Arabic dialect geography and typology types of internally and externally motivated linguistic change social indexicalisation and pidginization and creolization in Arabic speaking communities Most chapters then focus on developments in a specific region Mauritania the Maghreb Egypt the Levant the Northern Fertile Crescent the Gulf and South Arabia with one exploring Judaeo Arabic a group of varieties historically spread over a wider area The remaining two chapters in the volume examine individual linguistic features of particular historical interest and controversy specifically the origin and evolution of the verbal prefix and the adnominal linker *an* in The volume will be of interest to scholars and students of the linguistic and social history of Arabic as well as to comparative linguists interested in topics such as linguistic typology and language change

Circumstantial Qualifiers in Semitic Bo Isaksson, Heléne Kammensjö, Maria Persson, 2009 With inspiration from the Arabic *hal* concept this book investigates circumstantial clauses in Arabic and Hebrew It formulates a modern linguistic definition of the concept of circumstantial qualifier and offers corpus based pilot studies on circumstantial qualifiers in Pre classical and Classical Arabic Pre exilic Hebrew Modern literary Arabic and Modern spoken Gulf Arabic With circumstantial clause combining as the basic analytic concept Bo Isaksson presents a study of comparative ancient Arabic and ancient Hebrew text linguistics applied to a corpus of narrative prose texts As a corollary Isaksson also presents a reconsideration of the so called tenses in Arabic and Hebrew Helene Kammensjo investigates the logic behind the remarkable variation of circumstantial qualifiers CQ in a choice of Arabic novels from the two last decades Her approach is to pick out a few frequent CQ constructions and do a systematic study Maria Persson surveys the forms and functions of CQs both separately and in relation to their head clauses and discusses areas of grammaticalization and ambiguity related to CQs in Gulf Arabic dialects on the basis of texts from her own field studies

The Oxford Handbook of Arabic Linguistics Jonathan Owens, 2013-10-03 Until about 60 years ago linguistic research on the Arabic language in the West was restricted to inquiries on Classical Arabic and the Classical tradition and spoken Arabic dialects with historical studies embedded within the broader field of Semitic languages This situation is changing quickly not only through the continuation of older research traditions but also with the integration of new research fields and perspectives With this expansion comes the danger of specialists in Arabic losing an overview of the field and of leaving non specialists without basic resources for evaluating domains of research which they may be interested in for comparative purposes The Oxford Handbook of Arabic Linguistics

will confront this problem by combining state of the art overviews with essays on issues of perspective controversy and point of view In twenty four chapters leading experts from around the world will lay out their own stances on controversial issues The book not only evaluates ways in which questions and theories established in general linguistics and its sub fields elucidate Arabic but also challenges approaches which might result in accommodating Arabic to non Arabic interpretations and brings out the Arabic specificity of individual problems The Handbook in one compact volume gives critical expression to a language which covers large populations and geographical areas has a long written tradition and has been the locus of major intellectual fervor and debate

Dialect, Culture, and Society in Eastern Arabia Clive Holes, 2001 Dialect Culture and Society in Eastern Arabia Volume I Glossary is a comprehensive vocabulary of the uneducated Bahraini Arabic dialects drawn from a data base of hundreds of hours of natural conversation gathered in the mid 1970s

Language and Communication in the Digital Age Marinela Burada, Oana Tatu, Raluca Sinu, 2023-09-22 The digital age has exercised considerable influence not only on language use but also on research and teaching in this field The present volume showcases some aspects of language related investigation that reflect the interests experiences and challenges of theorists practitioners and language instructors today Drawing on the linguistic corpus parallel texts in different languages and a variety of approaches and methodologies the book features three main lines of inquiry L1 syntactic structure L1 L2 contact and transfer and L2 pedagogy The use of case studies and authentic data makes Language and Communication in the Digital Age a valuable source of insights into some linguistic peculiarities of Romanian and English and highlights new research avenues for specialists in language and communication

Catching Language Felix K. Ameka, Alan Dench, Nicholas Evans, 2008-08-22 Descriptive grammars are our main vehicle for documenting and analysing the linguistic structure of the world's 6 000 languages They bring together in one place a coherent treatment of how the whole language works and therefore form the primary source of information on a given language consulted by a wide range of users areal specialists typologists theoreticians of any part of language syntax morphology phonology historical linguistics etc and members of the speech communities concerned The writing of a descriptive grammar is a major intellectual challenge that calls on the grammarian to balance a respect for the language's distinctive genius with an awareness of how other languages work to combine rigour with readability to depict structural regularities while respecting a corpus of real material and to represent something of the native speaker's competence while recognising the variation inherent in any speech community Despite a recent surge of awareness of the need to document little known languages there is no book that focusses on the manifold issues that face the author of a descriptive grammar This volume brings together contributors who approach the problem from a range of angles Most have written descriptive grammars themselves but others represent different types of reader Among the topics they address are overall issues of grammar design the complementary roles of outsider and native speaker grammarians the balance between grammar and lexicon cross linguistic comparability the role of explanation in grammatical

description the interplay of theory and a range of fieldwork methods in language description the challenges of describing languages in their cultural and historical context and the tensions between linguistic particularity established practice of particular schools of linguistic description and the need for a universally commensurable analytic framework This book will renew the field of grammaticography addressing a multiple readership of descriptive linguists typologists and formal linguists by bringing together a range of distinguished practitioners from around the world to address these questions
