Hume,1996-06-01 This thesis describes an attack helicopter module for the Joint Warfare Analysis Experimental Prototype
JWAEP a joint theater level low resolution stochastic simulation developed at the Naval Postgraduate School The modeling
formulations required data and assumptions which are required to portray attack helicopter operations in theater level
simulations are presented The focus for the attack module is the representation of attack helicopter units in the conduct of
deliberate attacks however many of the models described can be applied to general helicopter operations The formulations
are limited to the major events that occur during an attack helicopter deliberate attack and represent initial research to

has the capability of simulating three body three dimensional tactical situations This study investigates the problem of using
the TACTICS program when one of the bodies is to have the characteristics of a helicopter The difference between the forces
acting on a helicopter and the forces assumed by the TACTICS PROGRAM ARE DISCUSSED AND A METHOD TO SIMULATE
THE HELICOPTER IS PRESENTED The basic idea of this method is to fly a hypothetical fixed wing aircraft with parameters
which enable it to perform like a helicopter The programming required to simulate several basic helicopter maneuvers is
discussed and two examples of a helicopter in a tactical environment are presented Author Helicopter Gunships: Deadly
