**Professional Wisdom** Cecelia Clegg, 2016-02-24 People professions such as social work teaching nursing ministry and counselling are at heart ethical or moral enterprises Much recent theorizing has been concerned to show that effective professional deliberation and judgement cannot be reduced either to technical rationality or to simple obedience to general occupational procedures or prescriptions Professional judgement would seem to require the development of a distinctive mode of practical ethical reflection or wisdom perhaps along the lines of Aristotle's phronesis or practical wisdom Reflection is required to address such key professional concerns as What is the impact of official prescription and regulation on professional judgement How should conflicts of professional judgement and public political accountability be resolved How might one reconcile tensions between universal justice and equality and particular client need What is the role of emotion and or affect in people professional practice This ground breaking work addresses in a thoroughly multidisciplinary way the central question of the nature of professional judgement and deliberation that has recently come to the fore in the academic literature of profession and professionalism It proposes a marked shift in theory practice and policy making away from technical rational approaches to professional decision making in favour of reflection and deliberation informed by responsible moral judgement This reflects a significant progressive trend in this literature by taking practical wisdom rather than technical rationality to lie at the heart of professional judgement It is unique in bringing together key authors from different professional fields to address the issue of professional wisdom in a cross professional and multidisciplinary way *More Than Happiness* Antonia Macaro, 2018-01-04 This groundbreaking study provides a much needed philosophical framework for those practising mindfulness as well as a call to recover the pragmatic and therapeutic dimensions of philosophy Stephen Batchelor author of *After Buddhism* and *Secular Buddhism* Modern readers tend to think of Buddhism as spending time alone meditating searching for serenity Stoicism calls to mind repressing our emotions in order to help us soldier on through adversity But how accurate are our popular understandings of these traditions And what can we learn from them without either buying in wholeheartedly to their radical ideals or else transmuting them into simple self improvement regimes that bear little resemblance to their original aims How can we achieve more than happiness In *More than Happiness* Antonia Macaro delves into both philosophies focusing on the elements that fit with our sceptical age and those which have the potential to make the biggest impact on how we live From accepting that some things are beyond our control to monitoring our emotions for unhealthy reactions to shedding attachment to material things there is much she argues that we can take and much that we'd do better to leave behind In this synthesis of ancient wisdom Macaro reframes the good life and gets us to see the world as it really is and to question the value of the things we desire The goal is more than happiness living ethically and placing value on the right things in life **The Oxford Handbook of Leadership and Organizations** David V. Day, 2014 The Oxford Handbook of Leadership and Organizations brings together a collection of comprehensive state of the science reviews and perspectives on the most pressing historical and contemporary leadership issues with a particular
