Ethnographic Self Fieldwork And The Representation Of Identity:

The Ethnographic Self Amanda Coffey, 1999-03-10 What are the relationships between the self and fieldwork How do personal emotional and identity issues impact upon working in the field This book argues that ethnographers and others involved in fieldwork should be aware of how fieldwork research and ethnographic writing construct reproduce and implicate selves relationships and personal identities All too often research methods texts remain relatively silent about the ways in which fieldwork affects us and we affect the field The book attempts to synthesize accounts of the personal experience of ethnography In doing so the author makes sense of the process of fieldwork research as a set of practical intellectual and emotional accomplishments The book is thematically arranged and illustrated with a wide range of empirical material

The Ethnographic Self as Resource Peter Jeffrey Collins, Anselma Gallinat, 2010 An excellent collection of anthropological autobiographical essays focusing on the positionality and resource of the self in ethnography The essays are engaging and well written and remind me of some of those classic anthropological ethnographic collections interesting in their own right to read but also serving as a good teaching resource Amanda Coffey Cardiff University

practice can disclose the processes involved in any attempts to represent otherness including when different groups such as Mongolian herders Sami singers and Australian Aboriginal hunters use other cultural codes and perspectives Francesca Pierini critically reflects upon the culturally biased ways in which Anglo American literature has traditionally portrayed Italian culture an orientalist imagined identity The selection of essays closes with Hannah Hale s study on a very specific aspect of gender identity formation how eating and drinking habits shape the development of masculinities within a community of students All essays in one way or another disclose how identity formation is conditioned by or emerges from relationships between self and otherness inside and outside or minor and dominant cultures As paradoxical as it may seem the more we relate to each other the more identity becomes an issue

International Handbook of Interpretation in Educational Research Paul Smeyers,David Bridges,Nicholas C.
Burbules,Morwenna Griffiths,2015-01-06 This handbook focuses on the often neglected dimension of interpretation in
educational research It argues that all educational research is in some sense interpretive and that understanding this issue
belies some usual dualisms of thought and practice such as the sharp dichotomy between qualitative and quantitative
research Interpretation extends from the very framing of the research task through the sources which constitute the data the
process of their recording representation and analysis to the way in which the research is finally or provisionally presented
The thesis of the handbook is that interpretation cuts across the fields both philosophically organizationally and
methodologically By covering a comprehensive range of research approaches and methodologies the handbook gives early
career researchers what they need to know in order to decide what particular methods can offer for various educational
research contexts fields An extensive overview includes concrete examples of different kinds of research not limited for
example to teaching and learning examples as present in the Anglo Saxon tradition but including as well what in the German
Continental tradition is labelled p dagogisch examples from child rearing and other contexts of non formal education with full
description and explanation of why these were chosen in particular circumstances and reflection on the wisdom or otherwise
of the choice combined in each case with consideration of the role of interpretation in the process The handbook includes
examples of a large number of methods traditionally classified as qualitative interpretive and quantitative used across the
area of the study of education Examples are drawn from across the globe thus exemplifying the different opportunities and

constraints that educational research has to confront in different societies

Brown,2020-01-09 Conceived as the meanings that individuals attach to their selves a substantial stockpile of theory related to identities accumulated across the arts social sciences and humanities over many decades continues to nourish contemporary research on self identities in organizations In times which are more reflexive narcissistic and fluid the identities of participants in organizations are increasingly less fixed and less certain making identity issues both more salient and more interesting Particular attention has been given to processes of identity construction often styled identity work Research has focused on how why and when such processes occur and their implications for organizing and individual group and organizational outcomes This has resulted in a burgeoning stream of research from discursive dramaturgical symbolic socio cognitive and psychodynamic perspectives that most often casts individuals efforts to fabricate identities as intentional relational and consequential Seemingly intractable debates centred on the nature of identities their relative stability or fluidity whether they are best regarded as coherent or fractured positive or not and how they are fabricated within relations of power combined with other conceptual issues continue to invigorate the field However these debates have also led to some scepticism regarding the future potential of identities research Yet as the chapters in this Handbook demonstrate there are considerable grounds for optimism that identity as root metaphor nexus concept and means to bridge levels of analysis has significant potential to generate multiple compelling streams of theorizing in organization and management studies
