Love Niklas Luhmann, 2014-10-15
Love seems like the most personal experience one that touches each of us in a unique way that is more personal than social, and hence it is not surprising that it has been largely neglected by sociologists and social theorists. While it has long been a central preoccupation of writers and novelists, love has rarely attracted anything more than the most cursory attention of social scientists. This short text, originally written in 1969 by the eminent German social theorist Niklas Luhmann, goes a long way to redressing this neglect. Rather than seeing love as a unique and ineffable personal experience, Luhmann treats love as a solution to a problem that depends on a wider range of social structures and forms. Human beings are faced with a world of enormous complexity, and they have to find ways to order and make sense of this world. In other words, they need certain facilities for action, what Luhmann calls media of communication, that enable them to select from a host of alternatives in ways that will be understood as meaningful by others. Love is one of these media; truth, power, money, and art are others. With the development of modern societies, greater demands are made on this medium of love, altering the relationship between love and sexuality and giving rise to the distinctive difficulties we associate with love today. This short text by one of the most brilliant social theorists of the 20th century will be of great interest to students and scholars throughout the social sciences and humanities. It is a concise and pithy statement of what is still the only sociological theory of love we have.

Passion, Shame, and the Freedom to Become Peter Shabad, 2024-12-09
This book examines how humans can overcome feelings of shame through self-acceptance and regain their innate passion and freedom to grow. Peter Shabad examines in detail how self-shaming and passivity are intertwined with the fatalism of self-pity, envy, resentment, and ultimately regret for not seizing the vital moments in life. From birth on, children attempt to contribute to the human endeavor through their innate passion. Parental receptivity enables a child to plant seeds of belonging, inspiring the generative passion necessary for furthering development. Exposed vulnerability due to the lack of receptivity leads to feelings of shame and self-consciousness as human

beings we interpret our misfortunes and limitations as punishments and reverse our passion into an inhibited passivity Shabad envisions psychotherapy as a pathway through which individuals learn to inclusively accept all aspects of their inner lives in order to embark on their journey of self acceptance He emphasizes the need for therapists to view patients as active agents in this process This book is a must read for psychoanalysts psychotherapists and anyone interested in developing a deeper understanding of the dynamics of shame and passion in our lives *The Bonds of Freedom* Kristana Arp,2001 The Bonds of Freedom is the first full scale analysis of Beauvoir s existentialist ethics as laid out in her important work The Ethics of Ambiguity written in 1946 Kristana Arp traces the central themes of Beauvoir s ethics back to her earlier philosophical essays and to literary works such as The Blood of Others and All Men Are Mortal Drawing from the thought of Husserl Heidegger Sartre and Merleau Ponty Beauvoir developed her own distinctive version of existentialism throughout these works BOOK JACKET **The Virtues of Freedom** Paul Guyer,2016 This volume of essays by one of the world s foremost Kant scholars explores the efforts of the great Enlightenment philosopher Immanuel Kant 1724 1804 to construct a moral philosophy based on the premise that the most fundamental value for human beings is their freedom to set their own ends

Change the Game Walt F.J. Cohen,2007-12-01 What kind of freedom and what kind of individual has the French Revolutionary tradition sought to propagate Paul Cohen finds a distinctly French articulation of freedom in the texts and lives of eight renowned cultural critics who lived between the eighteenth century and the present day Arranged not according to the lives and times of its protagonists but to the narrative themes and structures they held in common Cohen s study discerns a single master narrative of liberty in modern France He captures these radicals whose tradition bids them to resist the authority of power structures and public opinion They denounce bourgeois and utilitarian values the power of Church and State and the corrupting influence of everyday politics and they dream of a revolutionary rupture a fleeting instant of sometimes violent but always meaningful transgression An eloquent and insightful work on French political culture Freedom s Moment also helps explain how France even as it has oscillated between political stagnation and crisis has held onto its faith that liberty equality and fraternity remain within its grasp Examines the ideas of Rousseau Robespierre Stendahl Michelet Bergson Peguy Sartre and Foucault **Practical Necessity, Freedom, and History** David James,2021 By means of careful analysis of relevant writings by Hobbes Rousseau Kant Hegel and Marx David James argues that the concept of practical necessity is key to understanding the nature and extent of human freedom Practical necessity means being or believing oneself to be

constrained to perform certain actions in the absence whether real or imagined of other more attractive options or by the high costs involved in pursuing other options Agents become subject to practical necessity as a result of economic social and historical forces over which they have or appear to have no effective control and the extent to which they are subject to it varies according to the amount of economic and social power that one agent possesses relative to other agents The concept of practical necessity is also shown to take into account how the beliefs and attitudes of social agents are in large part determined by social and historical processes in which they are caught up and that the type of motivation that we attribute to agents must recognize this Practical Necessity Freedom and History From Hobbes to Marx shows how Rousseau Kant Hegel and Marx in contrast to Hobbes explain the emergence of the conditions of a free society in terms of a historical process that is initially governed by practical necessity The role that this form of necessity plays in explaining history necessity invites the following question to what extent are historical agents genuinely subject to both practical and historical necessity

7 Conversations to Freedom Walt F.J. The Contradictions of Freedom Sally J. Scholz,Shannon M.

Mussett,2005-10-13 The essential companion to Simone de Beauvoir's celebrated novel Whose Freedom? George Lakoff,2024-03-26 Since September 11 2001 the Bush administration has relentlessly invoked the word freedom The United States can strike preemptively because freedom is on the march Social security should be privatized in order to protect individual freedoms In the 2005 presidential inaugural speech the words freedom free and liberty were used forty nine times Freedom is one of the most contested words in American political discourse the keystone to the domestic and foreign policy battles that are racking this polarized nation For many Democrats it seems that President Bush's use of the word is meaningless and contradictory deployed opportunistically to justify American military action abroad and the curtailing of civil liberties at home But in *Whose Freedom* George Lakoff an adviser to the Democratic party shows that in fact the right has effected a devastatingly coherent and ideological redefinition of freedom The conservative revolution has remade freedom in its own image and deployed it as a central weapon on the front lines of everything from the war on terror to the battles over religion in the classroom and abortion In a deep and alarming analysis Lakoff explains the mechanisms behind this hijacking of our most cherished political idea and shows how progressives have not only failed to counter the right wing attack on freedom but have failed to recognize its nature *Whose Freedom* argues forcefully what progressives must do to take back ground in this high stakes war over the most central idea in American life *Freedom's Teacher, Enhanced Ebook* Katherine Mellen Charron,2012-03-15 Civil rights activist Septima Poinsette Clark 1898 1987 developed a citizenship education program that enabled tens of thousands of African Americans to register to vote and to link the power of the ballot to concrete strategies for individual and communal empowerment Clark who began her own teaching career in 1916 grounded her approach in the philosophy and practice of southern black activist educators in the decades leading up to the 1950s and 1960s and then trained a committed cadre of grassroots black women to lead this literacy revolution in community stores beauty shops and churches throughout the South In this engaging biography Katherine Charron tells the story of Clark from her coming of age in the South Carolina lowcountry to her activism with the Southern Christian Leadership Conference in the movement's heyday The enhanced electronic version of the book draws from archives libraries and the author's personal collection and includes nearly 100 letters documents photographs newspaper articles and interview excerpts embedding each in the text where it will be most meaningful Featuring more than 60 audio clips more than 2.5 hours total from oral history interviews with 15 individuals including Clark herself the enhanced e book redefines the idea of the talking book Watch the video below to see a demonstration of the enhanced ebook **Freedom** Slavoj Žižek,2023-10-05 We are all afraid that new dangers pose a threat to our hard won freedoms so what deserves attention is precisely the notion of freedom The concept of freedom is deceptively simple We think we understand it but the moment we try and define it we encounter contradictions In this new philosophical exploration Slavoj Žižek argues that the experience of true radical freedom is transient and fragile Countering the idea of libertarian individualism Žižek draws on philosophers Hegel Kierkegaard and Heidegger as

well as the work of Kandinsky and Agatha Christie to examine the many facets of freedom and what we can learn from each of them Today with the latest advances in digital control our social activity can be controlled and regulated to such a degree that the liberal notion of a free individual becomes obsolete and even meaningless How will we be obliged to reinvent or limit the contours of our freedom Tracing its connection to everything from capitalism and war to the state and environmental breakdown i ek takes us on an illuminating and entertaining journey that shows how a deeper understanding of freedom can offer hope in dark times

From Bondage to Freedom Michael LeBuffe,2010-01-21 Spinoza rejects fundamental tenets of received morality including the notions of Providence and free will Yet he retrains rich theories of good and evil virtue perfection and freedom Building interconnected readings of Spinoza s accounts of imagination error and desire Michael LeBuffe defends a comprehensive interpretation of Spinoza s enlightened vision of human excellence Spinoza holds that what is fundamental to human morality is the fact that we find things to be good or evil not what we take those designations to mean When we come to understand the conditions under which we act that is when we come to understand the sorts of beings that we are and the ways in which we interact with things in the world then we can recast traditional moral notions in ways that help us to attain more of what we find to be valuable For Spinoza we find value in greater activity Two hazards impede the search for value First we need to know and acquire the means to be good In this respect Spinoza s theory is a great deal like Hobbes s we strive to be active and in order to do so we need food security health and other necessary components of a decent life There is another hazard however that is more subtle On Spinoza s theory of the passions we can misjudge our own natures and fail to understand the sorts of beings that we really are So we can misjudge what is good and might even seek ends that are evil Spinoza s account of human nature is thus much deeper and darker than Hobbes s we are not well known to ourselves and the self knowledge that is the foundation of virtue and freedom is elusive and fragile

The Freedom to Become a Christian Andrew B. Torrance, 2016-02-25 The Kierkegaardian account of becoming a Christian has come to be perceived in radically egocentric terms Torrance challenges this perception by demonstrating that Kierkegaard was devoted to the idea of Christian conversion as a transformative process of becoming This process is grounded in an active relationship initiated by the eternal God who has established kinship with us in time Torrance focuses on becoming a Christian as a particular theological theme that deserves further attention how becoming a Christian or Christian transformation should be construed in relation to God's initiating and active relationship to the person Torrance's account of Kierkegaard on human transformation demonstrates in striking ways Kierkegaard's relevance to current issues in systematic theology and philosophical theology around the nature of Christian conversion particularly how conversion might be reconceptualized in strong divinely relational and transformative rather than in progressive self developmental terms This study also considers how Kierkegaard was able to negotiate his emphasis on the God relationship with his emphasis on the importance of individual reflection decision and action in the Christian life

The Bounds of Freedom: Kant's Causal Theory of Action Robert Greenberg, 2016-09-26 This monograph is a new interpretation of Kant's temporal conception of the causality of the freedom of the will The interpretation is based on an analysis of Kant's primary conception of an action viz as a causal consequence of the will The analysis in turn is based on H P Grice's causal theory of perception and on P F Strawson's modification of the theory The monograph rejects the customary assumption that Kant's maxim of an action is a causal determination of the action It assumes instead that the maxim is definitive of the action and since its main thesis is that an action for Kant is to be primarily understood as an effect of the will it concludes that the maxim of an action can only be its logical determination Kant's temporal conception of the causality of free will is confronted not only by contemporary philosophical conceptions of causality but by Kant's own complementary theory of causality in the Second Analogy of Experience According to this latter conception causality is a natural relation among physical and psychological objects and is therefore a temporal relation among them Faced with this conflict Kant scholars like Allen W Wood either reject Kant's temporal conception of causality or like Henry E Allison accept it but only in an anodyne form Both camps however make the aforementioned assumption that Kant's maxim of an action is a causal determination of the action The monograph rejecting the assumption belongs to neither camp
