Pointing Out the Great Way Daniel P. Brown, 2006-10-10 Many books have been published in recent years on the topic of mahamudra or meditation on the fundamentally clear nature of the mind This book is different in the systematic way it draws from a variety of source texts in order to construct a complete graded path of practice informed by an understanding of the particular obstacles faced by meditators in the West Dan Brown is a clinical

psychotherapist who has also spent much time evaluating the experiences of meditators on longterm retreats He knows the Tibetan literature on mahamudra meditation and has over thirty years of both personal meditation experience and observation of the experiences of others He co wrote with Ken Wilber and Jack Engler the book Transformations in Consciousness and he teaches an annual seminar on mahamudra meditation at the Esalen Institute Pointing Out the Great Way is a spiritual manual that describes the Tibetan Buddhist meditation known as mahamudra from the perspective of the gradual path The gradual path is a progressive process of training that is often contrasted to sudden realization As such this book contains a step by step description of the ways to practice precise descriptions of the various stages and their intended realizations and the typical problems that arise along with their remedies Simply put mahamudra meditation involves penetrative focus free of conceptual elaboration upon the very nature of conscious awareness A unique feature of this book is its integrative approach to the stages of mahamudra meditation A number of works on Buddhist meditation stages in general and mahamudra meditation in particular are already available in English yet none single text or commentary on the stages of mahamudra meditation captures the inner experience of these stages in sufficient detail to convey its richness This book represents the needed alternative by integrating material from a variety of root texts practical manuals
