St Louis which included the third modern Olympic Games Associated with the Games was a curious event known as Anthropology Days organized by William J McGee and James Sullivan at that time the leading figures in American anthropology and sports respectively McGee recruited Natives who were participating in the fair's ethnic displays to compete in sports events with the scientific goal of measuring the physical prowess of savages as compared with civilized men This interdisciplinary collection of essays assesses the ideas about race imperialism and Western civilization manifested in the 1904 World's Fair and Olympic Games and shows how they are still relevant A turning point in both the history of the Olympics and the development of modern anthropology these games expressed the conflict between the Old World emphasis on culture and New World emphasis on utilitarianism Marked by Franz Boas's paper at the Scientific Congress the events in St Louis witnessed the beginning of the shift in anthropological research from nineteenth century evolutionary racial models to the cultural relativist paradigm that is now a cornerstone of modern American anthropology Racist pseudoscience nonetheless reappears to this day in the realm of sports
