Carmichael series Book 1 No One Lives Twice Book 2 No One to Trust Book 3 No Place Like Home Book 4 No Biz Like Showbiz Book 5 No Test for the Wicked And more Biology and Manners Regina Yung Lee, Una McCormack, 2020-06-17 This volume of essays continues the establishment of Lois McMaster Bujold as an important author of contemporary science fiction and fantasy. It argues persuasively that Bujold's corpus spans the distance between two full arcs of US feminism and has anticipated or responded to several of its current concerns in ways that invite or even require theoretical exploration. The fourteen essays collected here provide wide ranging scholarly analyses of Bujold's work and worlds so far covering not only the science fiction and fantasy series but taking into account the wealth of ancillary material inspired by her works such as fan fiction and role playing games. Examining the major series through a range of perspectives including feminist readings, queer theory and disability studies, this volume aims to establish beyond doubt the seriousness of intent behind Bujold's various artistic projects and provide a set of rich readings of this engaging, experimental, playful and popular author.

No One Lives Twice & No One to Trust Julie Moffett, 2019-09-16 Get your geek on! Prepare for adventure with reformed hacker and trouble magnet Lexi Carmichael as she does whatever it takes to help the good guys win. Two full length Lexi Carmichael novels included: *No One Lives Twice* I'm Lexi Carmichael, geek extraordinaire. I spend my days stopping computer hackers at the National Security Agency. My nights? Those I spend avoiding my mother and eating cereal for dinner. Even though I work for a top secret agency, I've never been in an exciting car chase, sipped a stirred not shaken martini or shot a poison dart from an umbrella. Until today that is, when two gun toting thugs popped up in my life and my best friend disappeared. So I've enlisted the help of the Zimmerman twins, the reclusive architects of America's most sensitive electronic networks to help me navigate a bewildering maze of leads to find her. Along the way, my path collides with a sexy government agent and a rich, handsome lawyer, both of whom seem to have the hots for me. Hacking, espionage, sexy spy men, it's a geek girl's dream come true. *No One to Trust* SWFG Single White Female Geek That's me, Lexi Carmichael, a reformed hacker who was gainfully employed by the National Security Agency. But a series of extraordinary events led me to leave government life behind for a fresh start with a brand new company and an incredibly sexy boss, Finn Shaughnessy. It may not be kosher to have the hots for your boss, but he seems to have the hots for me too. If only things didn't get so complicated. Darren Greening, a genius researcher from Flow Technologies, our first client is missing and his bosses think I'm involved. And they aren't the only ones. The man who nearly snapped my neck in the parking garage thinks so too. Now I'm caught in the middle of a complex and dangerous case. I'll have to use all my geek skills and a little help from my friends to solve the mystery of Darren's disappearance before Neck Snapping Man makes a return visit. Originally published in 2010/2011.

Space Elevator Fouad Sabry,2022-10-25 What Is Space Elevator One concept for a transportation system that would link planets to space is called a space elevator A cable that is attached to the surface and extends into space would be the primary component of this system Without the need for huge rockets the architecture of the system would enable vehicles to ascend the cable from the surface of a planetary body such as the surface of the Earth and enter orbit directly Because of the enormous weight a space elevator based on Earth could not simply be a tall tower supported from below Instead it would consist of a cable with one end attached to the surface near the equator and the other end attached to a counterweight in space beyond geostationary orbit This would allow the elevator to move between the surface and the counterweight The opposing forces of gravity which is stronger at the lower end and the upward centrifugal force which is stronger at the upper end would result in the cable being held up under tension and stationary over a single position on Earth Gravity is stronger at the lower end while the upward centrifugal force is stronger at the upper end After the tether has been deployed climbers will be able to use mechanical methods to repeatedly ascend and descend the tether in order to release their payload into and out of orbit How You Will Benefit I Insights and validations about the following topics Chapter 1 Space elevator Chapter 2 Interplanetary spaceflight Chapter 3 The Fountains of Paradise Chapter 4 Counterweight Chapter 5 Skyhook structure Chapter 6 Lunar space elevator Chapter 7 Megascala engineering Chapter 8 Yuri Artsutanov Chapter 9 Momentum exchange tether Chapter 10 Launch loop Chapter 11 Orbital ring Chapter 12 Globus Cassus Chapter 13 Space elevators in fiction Chapter 14 Specific strength Chapter 15
