**Economic Development and Entrepreneurship in Transition Economies** Jovo Ateljević, Jelena Trivić, 2016-04-05 This book contributes to a better understanding of entrepreneurship in transition economies Current literature reflects the more traditional schools of thought on entrepreneurship which are influenced by the Western perspective and fail to fully address the scenario in transition economies There is a broad consensus among academics policy makers and practitioners that a fundamental cause of difficulties experienced by most economies in transition has been the fact that reform has not been accompanied by the creation of new private businesses and particularly SMEs This is especially evident in states created in Europe after the dissolution of the Soviet Union where many barriers which were inherited from the old system remain in place thus inhibiting entrepreneurial progress in these countries despite a favorable political and economic environment The contributions featured in this book focus on how much progress has been achieved so far with regard to these aspects as well as identify which current barriers and issues still need to be resolved Themes include innovation performance financing venture capital educational factors and entrepreneurial learning

**Entrepreneurship and SMEs in Southeast Asia** Denis Hew Wei-Yen, Loi Wee Nee, 2004 This study looks at the increasingly important role of entrepreneurship and small and medium enterprises SMEs as agents of development The book also focuses on the new policy initiatives by the different governments as they address the issues affecting the development of SMEs themselves

Masina,2006-09-27 This book presents a critical review of the Vietnamese reform process and analyses the most crucial issues in the post Asian crisis debate arguing that a wider debate is needed in order for national policy makers to make well informed decisions **Asia's Turning Point** Ivan Tselichtchev,Philippe Debroux,2012-11-26 Asia was probably the biggest economic sensation of the post war decades The breathtaking success of Japan was followed by a remarkable rise of four tigers then ASEAN founder states and then China The Asian miracle became a commonly accepted definition of this success In the late 1970s and especially 80s it became clear that the balance of power in the world had changed Politicians businessmen scholars began to talk about the new Asia Pacific age and Asian economic model different from and maybe even superior to Western capitalism However in 1997 98 the Asian economic crisis came and made the region a sick man Six years before that Japan the regional powerhouse entered more than a decade long period of stagnation The miracle was over However the crisis was overcome within a surprisingly short period of time Naturally the question arises What now What is going on in the region after the miracle and after the crisis What is today s face of Asian capitalism and how should we view its performance Readers interested in regional developments will find a lot of literature about miracle decades and crisis years However few analysts have addressed the challenging questions addressed in this book The authors vividly show that Asian capitalism is undergoing a radical structural transformation These changes are directly affecting its key institutions governments companies labor relations etc As a result Asian economic systems are becoming much closer to the Western style especially Anglo Saxon capitalism though the region retains some important specific features especially regarding

Viet Nam Brian Van Arkadie,Raymond Mallon,2004-01-01 Viet Nam has seen consistent rapid economic growth and impressive declines in poverty since it initiated its Doi Moi economic reforms in the late 1980s Viet Nam has taken a selective step by step approach to reform an approach often criticised by proponents of the Washington Consensus That this approach has been so successful has come as something of a surprise to much of the international community Analysing closely aspects of Viet Nam s reform process enterprise development income growth and poverty alleviation Viet Nam a transition tiger argues that Viet Nam s remarkable development is not readily explained by the more orthodox versions of the Washington Consensus Successful policy is not built on mechanistic replication of some general reform blueprint but on responding pragmatically to specific national circumstances Government policy has had an impact on economic performance but economic experience has also guided the formulation of economic policy Faced with increasingly complex economic conditions Vietnamese policymakers will need to rely more than ever on their flexibility and pragmatism if Viet Nam s remarkable economic performance is to be sustained     Development of Small & Medium Enterprises in Asean Countries
