Entrepreneurship and Institutions Nick Williams, Tim Vorley, Colin Williams, 2017-07-13 Entrepreneurship does not occur in a vacuum The institutions which provide the framework for economic activity matter As countries around the world strive for economic growth this book examines how institutional arrangements are critical in fostering entrepreneurship Through 12 case studies drawn from Asia Europe and America the book demonstrates how different institutional arrangements impact the nature scope and scale of entrepreneurial activity Each chapter highlights how the prevailing

formal and informal institutional arrangements interact and how this has consequences for the development of more entrepreneurial economies By synthesizing empirical and theoretical insights the book explores how fostering more entrepreneurial economies is as much a question of institutional alignment as it is the creation of more supportive formal and informal institutions **Entrepreneurship in China** Keming Yang,2016-04-29 The emergence of China as a major world economy is of great importance to the global political economy and to international business There has been much research on the macro level of institutional reform but little detailed work on the grassroots level of entrepreneurship in China This innovative book addresses this gap by investigating how an economic system dominated by central plans communist ideologies and suppressing bureaucracies could generate such energy from the bottom of society fuelling the country s economic growth Keming Yang s theory of entrepreneurship is based on two interrelated concepts double entrepreneurship and institutional holes He argues that the two concepts bridge a gap between the neo classical institutionalism of economic development and entrepreneurship studies that emphasize individual choice The rigorous theoretical framework is supported by substantial empirical research offering statistical analyses of survey data as well as detailed case studies This timely book will appeal to an interdisciplinary readership in sociology economics business studies and Chinese and Asian Studies

Entrepreneurship as Experience Michael H. Morris, Christopher G. Pryor, Minet Schindehutte, 2012 Do entrepreneurs create ventures or do venture experiences create entrepreneurs The authors of Entrepreneurship as Experience propose that the answer is both This important volume examines how individuals experience the creation of a venture as it happens and how that experience determines the types of entrepreneur and venture that ultimately emerge In essence entrepreneurship is an experience consisting of large numbers of key events such as a first sale hiring a first

employee losing a big account events that are processed and made sense of by the entrepreneur They produce cognitive emotional and physiological responses which impact decision making and behavior The result is an experience that is purposive diverse uncertain ambiguous and transformative and unique to each individual Here the authors argue that as experience unfolds both entrepreneur and venture are being constructed and emerge in unique forms This experiential view introduces an entirely new lens through which entrepreneurship can be examined Entrepreneurship as Experience comprises chapters dedicated to sociological anthropological and psychological research related to human experiencing the volume presents a new frame for understanding the role of emotions and feelings in venture creation and lays out a conceptual framework for understanding how real time experiencing informs the entrepreneurial process New insights are provided regarding how the entrepreneurial mindset and an entrepreneurial identity are formed and why entrepreneurs take on certain traits and develop certain competencies Further the authors put forth new approaches to conducting research on the entrepreneurial experience Students advanced as well as undergraduate and scholars of entrepreneurship innovation strategy and management will find themselves turning often to the ideas and research presented here

Understanding the Firm Michael Taylor, Päivi Oinas, 2006-12-21 Firms are at the very heart of modern day life They come in a seemingly infinite variety from transnationals to small firm from corporations to branch plants to subsidiaries and joint ventures from subcontractors to franchisees from sole proprietorships to partnerships from manufacturers to service providers and retailers For the most part we view them as the creators destroyers and repositories of jobs the creators and destroyers of people s livelihoods lives and dreams But deciding just what a firm is is neither a simple nor a straightforward task Against a background of the dynamic complexity and plurality that business forms and firms can assume there is a constant search within academic research for the processes that create and maintain both enterprise and enterprises in capitalist societies a search for a theory of the firm This book addresses some of the gaps in the current state of the theory of the firm from an economic geography perspective issues around the boundaries of the firm the collective agency of the firm the political firm financial markets and the state and the firm in place

International Entrepreneurship in Small and Medium Size Enterprises Hamid Etemad, 2004-01-01 The drivers of globalization are removing the barriers that segregated the competitive space of the small and large firms in the past It is becoming increasingly difficult for independent small firms to thrive in their traditional markets unless they are globally competitive Managing an enterprise s commercial industrial and political relations well regardless of size and location is the essence of the entrepreneurial challenge in this competitive arena Small and medium size enterprises SMEs often face very different issues than large multinational enterprises do when confronting internationalization This volume provides an in depth discussion of these challenges The contributors to this volume explore the emerging patterns of SME growth and international expansion in response to the evolving competitive environment dynamics of competitive behavior entrepreneurial processes and formulation of strategy They examine the basis

and requirements of growth and expansion from three perspectives the rapidly changing environment in which business is conducted entrepreneurial characteristics and the evolving strategic and competitive response to this changing business environment Business leaders scholars and students interested in international business and entrepreneurship will welcome this volume
