De Vries, Sara Binzer Hobolt, Sven-Oliver Proksch, Jonathan B. Slapin, 2021 With its coherent analytical framework and accessible style *Foundations of European Politics A Comparative Approach* introduces students to comparative European politics through the lens of political science theory and data **European Environmental Law** Suzanne Kingston, Veerle Heyvaert, Aleksandra Čavoški, 2017-07-20 EU Environmental Law is a critical comprehensive and engaging account of the essential and emerging issues in European environmental law and regulation today Suitable for advanced undergraduate and postgraduate students the book delivers a thematic and contextual treatment of the subject for those taking courses in environmental law environmental studies regulation and public policy and government and international relations Placing the key issues in context EU Environmental Law takes an interdisciplinary and thematic approach to help students to better understand the implementation and enforcement of environmental law and policy across Europe It offers an accessible overview and links theory with practical applications that will allow students to contextualise the outcomes of legal rules and their impact on public and private behaviours It provides a definitive account of the subject examining traditional topics such as nature conservation law waste law and water law alongside increasingly important fields such as the law of climate change environmental human rights law and regulation of GMOs and nanotechnology **Environmental Foundations of European History** Derwent S. Whittlesey, 1985-01-01 **A History of International Thought** Lucian Ashworth, 2014-01-10 International thought is the product of major political changes over the last few centuries especially the development of the modern state and the industrialisation of the world economy While the question of how to deal with strangers from other communities has been a constant throughout human history it is only in recent centuries that the question of foreign relations and especially imperialism and war have become a matter of urgency for all sectors of society throughout the world This book provides the first comprehensive overview of the evolution of Western international thought and charts how this evolved into the predominantly Anglophone field of International Relations Along the way several myths of the origins of International Relations are explored and exposed the myth of the peace of Westphalia the myths of Versailles and the nature of the League of Nations the realist idealist Great Debate myth and the myth of appeasement Major approaches to the study of international affairs are discussed within their context and on their own terms rather than being shoe horned into anachronistic paradigms Written in a clear and accessible style Ashworth's analysis reveals how historical myths have been used as gatekeeping devices and how a critical re evaluation of the history of international thought can affect how we see international affairs today *Society and Economy in Early Modern Europe, 1450-1789* Barry Taylor, 1989 **The European Culture Area** Alexander B. Murphy, Terry G. Jordan-Bychkov, Bella Bychkova Jordan, 2020-09-01 Now in a

Jordan-Bychkov, Bella Bychkova Jordan, Alexander B. Murphy, 2008-08-28 A sixth edition of this book is now available Now in a fully updated fifth edition this premier text has been thoroughly revised to reflect the sweeping changes the past decade has brought to Europe Long hailed for its creativity and intellectual depth the book is now further enriched by the expertise of a new lead author noted geographer Alexander B Murphy In this edition he has focused on Europe s role in the wider world and incorporated new research and teaching approaches in regional geography The book employs a cultural historical approach that is ideally suited to facilitate understanding of Europe s ancient complex geographical character Its topical organization including environment ethnicity religion language demography politics industry and urban and rural life offers students a holistic understanding of the diverse European culture area Inclusive intellectual rich in ideas lively interesting and humanistic The European Culture Area remains the text of choice for courses on the geography of Europe **Mediterranean Europe(s)** Matthew D'Auria, Fernanda Gallo, 2022-09-26 This book investigates how ideas of and discourses about Europe have been affected by images of the Mediterranean Sea and its many worlds from the nineteenth century onwards Surprisingly modern scholars have often neglected such an influence and in fact in most histories of the idea of Europe the Mediterranean is conspicuously absent This might partly be explained by the fact that historians have often identified Europe with modernity and the Atlantic world and therefore in opposition to the classical world centred around the Mediterranean This book will challenge such views showing that a plethora of thinkers from the early nineteenth century to the present have refused to relegate the Mediterranean to the past Importance is given to the idea of a distinct meridian thought a notion first set forth by Albert Camus and now reworked by French and Italian thinkers As most chapters argue this might represent an important tool for rethinking the Mediterranean and in turn it might help us challenge received notions about European identity and rethink Europe as the locus of modernity Mediterranean Europe s Rethinking Europe from its Southern Shores will appeal to researchers and students alike interested in European studies and Mediterranean history **The Environment and International History** Scott Kaufman, 2018-12-13 Studies of the history of international relations traditionally have focused

on the decisions made by those at the highest levels of government In more recent years scholars have expanded their attention to cover economic cultural or social interactions among nations What has remained largely ignored however is the impact of an increasingly interdependent world upon the environment and conversely how environmental concerns have affected the ecology social relationships economics and politics at national regional and global levels The Environment and International History fills this gap looking at the interrelationship between international politics and the environment Using a transnational and interdisciplinary approach this book examines how imperialism war and a divergence of interests between the developed and underdeveloped world all have had implications for plants animals and humans worldwide

also the capacity to plan and the ability to implement Approaching state strategy and policy from the spatial angle Jeremy Black argues that just as the perception of power is central to issues of power so place and its constraints and relationships is partly a matter of perception not merely map coordinates Geopolitics he maintains is as much about ideas and perception as it is about the actual spatial dimensions of power Black's study ranges widely examining geography and the spatial nature of state power from the 15th century to the present day He considers the rise of British power geopolitics and the age of Imperialism the Nazis and World War II and the Cold War and he looks at the key theorists of the latter 20th century including Henry Kissinger Francis Fukuyama and Samuel P Huntington Philip Bobbitt Niall Ferguson and others Modern World Development Michael Chisholm, 2020-05-06 Since the time of Adam Smith there has been a voluminous literature concerned with the differing wealth of nations and the variation in the nature of economic growth and several schools of thought have held precedence at different times The fundamental mechanisms have been regarded by some as capital accumulation and investment and by others as entrepreneurial ability Modern World Development first published in 1982 shows that the length of time under consideration materially affects the relative significance assigned to the factors involved similarly the size of an area cannot be ignored Through an examination of the major theories of economic growth the role of natural resources the core periphery model of world development environmental change and the concept of human capital Professor Chisholm has written a stimulating and important book which will appeal to students of economics history and geography Books and Pamphlets, Including Serials and Contributions to Periodicals Library of Congress.
