## **Environmental Issues And Security In South Asia Adelphi Papers 26:**

**Environment, Security and UN Reform** M. Imber, 1994-08-04 This book presents a study of international relations theory and the role of the United Nations in international environmental negotiations The book links discussion of three issues the persistence of third world debt the environmental abuse of the global commons and the financial and institutional crises within the UN system It includes a summary of both the achievements and limitations of the 1992 Rio Summit UNCED and concludes with far reaching proposals for the restructuring of UN activities

**Environmental Consequences of International Conflicts** Aleksander V. Semenov, Igor S. Zonn, Andrey G. Kostianoy, Sergey S. Zhiltsov, Abdelazim Negm, 2025-01-23 This is the first of two volumes that taken together provide an integrated picture of the environmental consequences arising from international conflicts The volumes build upon the successful book Environmental Consequences of War and Aftermath published in The Handbook of Environmental Chemistry in 2009 The books focus on environmental consequences only and discuss land degradation erosion water scarcity and pollution water resources management air pollution desertification deforestation food scarcity and radioactive contamination among others This volume addresses conflicts in the MENA region Middle East and North Africa covering historical and more recent events such as water conflicts military conflicts migration and overpopulation and infrastructure projects Readers will also find several chapters in this book on the theory of international conflicts and their impact on the environment in general Given its breadth this book appeals to environmental scientists policy makers and researchers interested in the environmental impacts of international conflicts

*Environment and National Security* Narottam Gaan, 2000 Bangladesh and SAARC Iftekharuzzaman, Imtiaz Ahmed, 1992 Papers presented at a seminar held on 23-24 August 1992

*Violence Through Environmental Discrimination* Günther Baechler, 2013-03-09 Since all out interstate wars for the time being seem to belong to the past conflict studies focus more and more on domestic conflicts This is a broad field not only because the arbitrary line between war and sub war violence disappears and the analyst is confronted with phenomena reaching from criminal violence and clashes between communities to violent conflicts of long duration and civil wars with massacres and genocides as their characteristics It is also because there are so many different types of conflicts to be analyzed so many different types of behavior to be studied whereas there is often little information available on what is really going on Against the background of internal conflicts which tend to be as protracted as diffuse in terms of time intensity actors and their goals this study aims to follow a specific pathway through the current thicket of violent circumstances It focuses on causation patterns by exploring the causal role of the environmental factor in the genesis of violent conflicts occurring today and probably even more so tomorrow This approach which for once does not focus on a specific level of the conflict system on one area in the conflict geography or on a specific category of actors analyzes causation dynamics

**South Asia's Nuclear Security Dilemma** Lowell Dittmer, 2015-04-08 The nuclear test explosions in India and Pakistan in 1998 followed by the outbreak of hostilities over

Kashmir in 1999 marked a frightening new turn in the ancient bitter enmity between the two nations. Although the tension was eclipsed by the events of 9/11 and the subsequent American attacks on Afghanistan and Iraq, it has not disappeared as evidenced by the 2001 attack in the Indian Parliament by Islamic fundamentalists from Kashmir. By 2002, these two nuclear armed neighbors seemed to be once again on the brink of war. This book outlines the strategic structure of the rivalry and the dynamic forces driving it and investigates various possible solutions. The expert contributors focus on the India-Pakistan rivalry but also consider the China factor in South Asia's nuclear security dilemma. Although essentially political, strategic in its approach, the book includes coverage of opposing military arsenals and the impact of local terrorism on the delicate balance of power.

*Intelligence Analysis and Assessment* David Charters, Stuart Farson, Glenn P. Hastedt, 2013-11-05. These essays cover assessment systems now in place in Britain, the USA, Germany, and Australia; the bureaucratic dynamics of analysis and assessment; the changing ground in intelligence; and the impact of new technologies and modes of communication on intelligence gathering and analysis.

**Contemporary Security Concerns of India** Herkan Neadan Toppo, 2013-01-01. This book is an effort to examine the present security situation by identifying various existing perceptions that lead to serious problems of vulnerability of a sovereign nation, India. The issues discussed here have vital implications over the region's security that raises pertinent questions related to human security and human survival. As the book deals with different dimensions of issues, it gives a comprehensive understanding of the academicians and scholars working in their respective areas of research. Besides, these presented articles seek to analyze the implications of the upcoming multifaceted threat perception in the society as well. This volume can be useful for the intellectuals, academicians, policy makers, diplomats, civil societies, and others who are interested in the subject of international relations and conflict and peace resolutions. This book is coming out in a very apt moment because it addresses certain existing issues related to security concerns relevant to the national security interest.

South Asia's Security Iftekharuzzaman, 1994. Papers presented at the International Seminar on South Asia's Security in the 1990s: Primacy of Internal Dimension on 5-7 January 1992, organized by the Bangladesh Institute of International and Strategic Studies at Dhaka, Bangladesh.

**Climate Change, Policy and Security** Donald Wallace, Daniel Silander, 2018-04-17. This book examines the multiple strategies proposed by the international community for addressing global climate change (GCC) from both human and state security perspectives. It examines what is needed from major states working within the UN framework to engage with the multiple dimensions of a strategy that addresses GCC and its impacts where such engagement promotes both human and state security. Two broad frameworks for approaching these issues provide the basis of discussion for the individual chapters which discuss the strategies being undertaken by major state powers: the US, the EU, China, India, Japan, and Russia. The first framework considers the multiple strategies: mitigation, adaptation, and capacity building required of the international community to address the effects of GCC. The second framework considers the differentiation of GCC policies in terms of security and how

the efficacy of these strategies could be impacted by whether priority is given to state security over human security concerns This book will be of much interest to students of human security climate change foreign policy and International Relations

**Environmental Security** Narottam Gaan,2004 The work is an authentic and comprehensive one on environmental security Some important topics discussed are Environmental security a theoretical quest politics of environment security and problems of widening environmental scarcity of resources global climate change etc Useful for environmentalists researchers

*Non-Traditional Security Issues and the South China Sea* Shicun Wu,Keyuan Zou,2016-05-23 While there is abundant literature discussing non traditional security issues there is little mention of such issues existing in the South China Sea This area is vulnerable to natural hazards and marine environmental degradation The marine ecosystem is threatened by various adverse sources including land based pollution busy shipping lanes and over exploitation activities which threaten the security of the surrounding population This area is also threatened by piracy and maritime crimes but law enforcement becomes difficult due to unclear maritime boundaries This volume is designed to explore the security cooperation and regional approaches to these non traditional security issues in the hope to build a peaceful environment and maintain international and regional security and order in the South China Sea region

**Environmental Change and Security Project Report** ,1998 Environment and Conflict Ashok Swain,1993 It is true that environmental destruction concerns each and every state of the world but as this study finds out it bears more serious consequences for the poor developing countries than the rich developed ones The relentless burden of meeting the needs of the growing population in these countries has brought a distinct possibility of erasing the natural renewable resource base from which human being inevitably reaps sustenance There has been an attempt in this study to develop a conceptual framework of conceivable social conflicts that are likely to develop in an environmentally induced scarcity situation in the developing countries This has been done by analyzing the role and formation of possible actors and theirs perceived conflicting behavior towards each other

**Pacific Asia?** Melvin Gurtov,2002 Emphasizing human and environmental security over traditional power politics Mel Gurtov offers a provocative reinterpretation of security in the Asia Pacific region The author questions a number of prevailing assumptions such as the China threat a U S centered balance of power and the necessity of a greater Japanese security role He argues instead for a cooperative framework for future security that focuses on people s basic needs is sensitive to Asian nationalism and gradually replaces military power with developmental priorities With its concise appraisals of the security policies of the United States China Japan the two Koreas and the ASEAN countries this work will be a valued reference for policymakers scholars and students alike

**South Asia's Nuclear Security** Bhumitra Chakma,2014-12-17 South Asia is often viewed as a potential nuclear flashpoint and a probable source of nuclear terrorism But how valid are such perceptions This book seeks to address this question and assesses the region s nuclear security from two principal standpoints First it evaluates the robustness of the Indo Pakistani mutual deterrence by analysing the strength and weaknesses of the competing

arguments regarding the issue It also analyses the causes and consequences of nuclear arms race between India and Pakistan the nature of deterrence structure in the region and the challenges of confidence building and arms control between the two countries in order to assess the robustness of South Asia s nuclear deterrence Second it assesses the safety and security of the nuclear assets and nuclear infrastructure of India and Pakistan The author holds that the debate on South Asia s nuclear security is largely misplaced because the optimists tend to overemphasise the stabilising effects of nuclear weapons and the pessimists are too alarmists It is argued that while the risks of nuclear weapons are significant it is unlikely that India and Pakistan will give up their nuclear arsenals in the foreseeable future Therefore what needs to happen is that while nuclear elimination should be the long term goal in the interim years the two countries need to pursue minimum deterrence policies to reduce the likelihood of deterrence failure and the possibility of obtaining fissile materials by non state actors

Understanding Security Practices in South Asia Monika Barthwal-Datta,2012 This book aims to explore the ways in which non state actors NSAs in South Asia media actors epistemic communities non governmental organisations NGOs civil society groups and others are involved in securitising non traditional security challenges in the region at the domestic and regional levels *From Superpower to Besieged Global Power* Edward A. Kolodziej,Roger E. Kanet,2010-01-25 The essays in this volume argue that the Bush Doctrine as outlined in the September 2002 National Security Strategy of the United States squandered enormous military and economic resources diminished American power and undermined America s moral reputation as a defender of democratic values and human rights The Bush Doctrine misguidedly assumed that the United States was a superpower a unique unipolar power that could compel others to accede to its preferences for world order In reality the United States is a formidable but besieged global power one of a handful of nations that could influence but certainly not dictate world events The flawed doctrine has led to failed policies that extend America s reach beyond its grasp most painfully evident in the wars in Iraq and Afghanistan Leading scholars and policy analysts from nine countries assess the impact of the Bush Doctrine on world order explain how the United States reached its current low standing internationally and propose ways that the country can repair the untold damage wrought by ill conceived and incompetently executed security and foreign policies Contributors focus on the principal regions of the world where they have expertise Asia Europe Africa the Middle East Latin America and Russia The contributors agree that future security and foreign policies must be informed by the limitations of U S economic cultural and military power to shape world order to reflect American interests and values American power and influence will increase only when the United States binds itself to moral norms legal strictures and political accords in cooperation with other like minded states and peoples American Wars, American Peace Philip D. Beidler,2007 As a writer Philip D Beidler has often drawn on his combat experience in Vietnam and his deep engagement with American popular culture His essays tap these sources in powerful truth telling ways In *American Wars* *American Peace* another voice emerges distinct yet also tied to Beidler s wartime memories and his love of literature film and

music It is the voice of one of the baby boom progeny of the Greatest Generation who at home and abroad became the foot soldiers not just in Vietnam but in the Peace Corps the civil rights movement the women s movement and beyond Beidler has experienced enough of history to question the kinds of peace that one empire after another has tried to impose on the world at whatever immense costs As he reflects on terrorism patriotism geopolitics sacrifice propaganda and more Beidler revisits his generation s inherited vision of national purpose and he asks what happened These essays are a sobering wake up call for even the most informed and conscientious citizen

*A Sense Of Siege* Graham Fuller, 2018-02-12 The clash of civilizations has become a common phrase in discussions of U S Middle East relations This book explores the nature of the friction between the Muslim world and Western states looking at legitimate perceptions and grievances on both sides involving historical political economic cultural psychological and strategic elements Arguing that Islam versus the West does not represent the arena of the next global ideological struggle the authors examine specific issues of a bilateral nature that require careful handling to prevent the consolidation of states into opposing blocs They discuss Islam s efforts to politically enhance the real power of Muslim states and to equalize relations with the West in the strategic arena the enlarged role of Islam in the internal politics of Muslim countries and the urgency of political economic and social change to break away from traditional authoritarian orders A central theme of the book is that political Islam threatens the established order in most Muslim countries far more than it threatens the West and that violent confrontation can best be circumvented by integrating Islamist forces into the political process
