United Nations Convention on the Law of the Sea, 1982 Myron H. Nordquist, Shabtai Rosenne, 1985 These commentaries are based almost entirely on the formal and informal documentation of the Third United Nations Conference on the Law of the Sea UNCLOS III 1973 1982 coupled where necessary with the personal knowledge of editors contributors or reviewers many of whom were principal negotiators or UN personnel who participated in the Conference

The IMLI Treatise On Global Ocean Governance David Joseph Attard, David M Ong, Dino Kritsiotis, 2018-07-11 The

1982 United Nations Convention on the Law of the Sea UNCLOS remains the cornerstone of global ocean governance. However, it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically. With seemingly no opportunity for revision due to the Convention's burdensome amendment provisions, complementary mechanisms dealing with such aspects of global ocean governance, including maritime transport, fisheries, and marine environmental sustainability, have been developed under the aegis of the United Nations and other relevant international organizations. This approach is inherently fragmented and unable to achieve sustainable global ocean governance. In light of the Sustainable Development Goals (SDGs), particularly Goal 14, the IMLI Treatise proposes a new paradigm on the basis of an integrated and cross-sectoral approach in order to realise a more effective and sustainable governance regime for the oceans. This volume focuses on the role of UN as the central intergovernmental organization responsible for global ocean governance. It examines the ocean governance challenges and how the present legal policy and institutional frameworks of the UN have addressed these challenges. It identifies the strengths and weaknesses of UN legal structures and offers tangible proposals to realize the ambition of a global ocean governance system. Training Manual on International Environmental Law, 2006. It is widely recognized that most environmental problems, challenges, and solutions are transboundary, regional, or global in scope. The environment is an area where states and stakeholders are cooperating extensively and progressively. This manual seeks to provide a comprehensive overview of the current body of environmental law. Publisher's description.

Regional Co-operation and Protection of the Marine Environment Under International Law Nilufer Oral, 2013-07-11. In *Regional Co-operation and Protection of the Marine Environment Under International Law: The Black Sea*. Nilufer Oral examines the regional co-operation mechanism for protection and preservation of the Black Sea marine environment within the framework of international law and subsequently identifies the necessary components for a robust regional regime based on best legal practices. The book provides a thorough review of the complex modern challenges related to the Black Sea with particular emphasis on biodiversity, fisheries, land-based pollution, and vessel-based sources of pollution. A history of regional co-operation in the Black Sea offers an enlightening comparison to the development of regional co-operation in international law, in particular to Part IX of the 1982 United Nations Montego Bay Convention on the Law of the Sea. Further comparative analyses, such as the existing regional regime of the Black Sea as established under the 1992 UNEP Regional Seas Programme and selected regional seas programmes, including the acquis communautaire of the European Union, cohere into a firm foundation of present findings upon which the author makes recommendations for the future. All those interested in the Law of the Sea, international environmental law, and fisheries management will find a critical new text in *Regional Co-operation and Protection of the Marine Environment Under International Law: The Black Sea*.
