Environmental Problems Of The Borderlands:

Environmental Problems of the Borderlands Howard G. Applegate, 1979 *Environmental Problems Along the U.S.-Mexico Borderlands* Gail Clarke, 1982 **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70 **The Routledge Research Companion to Border Studies** Doris Wastl-Walter, 2016-04-01 Throughout history the functions and roles of borders have been continuously changing They can only be understood in their context shaped as they are by history politics and power as well as cultural and social issues Borders are therefore complex spatial and social phenomena which are not static or invariable but which are instead highly dynamic This comprehensive volume brings together a multidisciplinary team of leading scholars to provide an authoritative state of the art review of all aspects of borders and border research It is truly global in scope and besides embracing the more traditional strands of the field including geopolitics migration and territorial identities it also takes in recently emerging topics such as the role of borders in a seemingly borderless world creating neighbourhoods and border enforcement in the post 9 11 era *The Colonias Reader* Angela J. Donelson, Adrian X. Esparza, 2016-10-15 The colonias of the U S Mexico border form a loose network of more than 2 500 settlements ranging in size from villages to cities that are home to over a million people While varying in size all share common features wrenching poverty substandard housing and public health issues approaching crisis levels This book brings together scholars professionals and activists from a wide range of disciplines to examine the pressing issues of economic development housing and community development and public and environmental health in colonias of the four U S Mexico border states The Colonias Reader is the first book to present such a broad overview of these communities offering a glimpse into life in the colonias and the circumstances that allow them to continue to exist and even grow in persistent poverty The contributors document the depth of existing problems in each state and describe how government agencies nongovernmental organizations and community activists have mobilized resources to overcome obstacles to progress More than reporting problems and documenting programs the book provides conceptual frameworks that tie poverty to institutional and class based conflicts and even challenges the very basis of colonia designations Most of these contributions move beyond portraying border residents as hapless victims of discrimination and racism showing instead their devotion to improving their own living conditions through grassroots organizing and community leadership These contributions show that despite varying degrees of success all colonia residents aspire to a livable wage safe and decent housing and basic health care The Colonias Reader showcases many situations in which these people have organized to fulfill these ambitions and provides new insight into life along the border **Environmental Problems in America's Garden of Eden** Gordon Morris Bakken, Brenda Farrington, 2001 This anthology examines Love's Labours Lost from a variety of perspectives and through a wide range of materials Selections discuss the play in terms of historical context dating and sources character analysis comic elements and verbal conceits evidence of authorship performance analysis and

feminist interpretations Alongside theater reviews production photographs and critical commentary the volume also includes essays written by practicing theater artists who have worked on the play An index by name literary work and concept rounds out this valuable resource

Environmental Challenges and Governance Sacchidananda Mukherjee, Debashis Chakraborty, 2015-03-02 The economies located in East South and Southeast Asia have witnessed an interesting growth sustainability trade off over the last decades While growth considerations have paved ways

for deepened ties with growing trade investment waves and increasing population pressure necessitated exploitation of hitherto unutilized natural resources focus on environmental sustainability has been a recent consideration The growth impetus still playing a key role in these economies it becomes imperative that the countries effectively address the key sustainability concerns e g air and water pollution land degradation loss of biodiversity climate change issues like CO2 emissions etc But how prepared is the governance mechanism of these countries covering not only the legislative and administrative framework but also involvement of the judiciary presence of spirited civil society and active engagement of stakeholders in policy framing dialogues to rise up to these challenges The book seeks an answer to this question through the environmental governance mechanism and natural resource conservation policies in three vibrant regions within Asia A holistic development dimension of sustainable development path emerges through discussion of policies adopted by developed Japan South Korea upper middle China Malaysia developing India Indonesia Philippines Sri Lanka Thailand and least developed countries Bangladesh Myanmar Nepal *Cooperation, Environment, and Sustainability in Border Regions* Paul Ganster,2001 **Globalization, Marginalization and Conflict** Borna Fuerst-Bjeliš,Walter Leimgruber,2020-10-21 This book looks at marginality from a less conventional perspective by analyzing complex social cultural political and economic relations between the aspects of globalization and various forms of marginalization It focuses specifically on the conflict potential that results from the globalization driven inequality and marginalization of many segments of societies This view is further illustrated in sections on border regions identity issues minorities and poverty The book gives a comprehensive but in depth analysis of the various aspects of the relations between globalization marginalization and conflict issues based on a number of case studies and regions worldwide It shows how the same issues of globalization and marginalization manifest themselves in different ways under different circumstance obviously requiring different solutions Based on original research this book provides new insights on the globalization marginalization relations and a good resource to academics scientists and students in various fields of social political science and humanities *The Maya Forest Waterlands* Hanna Laako,Edith Kauffer,2025-02-12 This book examines the entanglements and blurred edges of nature conservation and geopolitical relations in the borderlands of the trinational Maya Forest Maya Forest is an umbrella term for transboundary conservation developed by scientists and conservationists in the 1990s to protect the threatened rainforest in the borderlands of Mexico Belize and Guatemala Currently the Maya Forest is a biodiversity hotspot composed of a network of protected areas and heritage sites However issues related to water land and forests have often been treated as separate political units and not as part of the same history Written by two authors with decades of hands on experience in this region this book sheds light on the complex dynamics by which conservation and natural resource management geopolitically shape borderlands such as the Maya Forest The book introduces the novel concept of forest waterlands as borderlands and fluid edges which are now subject to concern by conservationists These are entangled spaces in which conservation peoples and

politics interact connect and disconnect with the nexus of waters forests and lands The book sheds light on the building and mapping of the Maya Forest ecoregion with particular attention to water as an often neglected but unifying element It showcases how the Maya Forest is a distinct region characterized by transformations entangled with the Maya trails of biological stations the shared history of chicleros chewing gum hunters fluid international rivers and transboundary basins and various geopolitical discrepancies It offers a contemporary glimpse into the Maya Forest s intertwined bio and geopolitics which urge us to rethink borders and boundaries This book will be of great interest to students and scholars of nature conservation global environmental politics geopolitics borderlands international relations and natural resource management

Smith, Doctor Piya Pangsapa, 2013-07-04 Citizenship and the environment are hotly debated as climate change places more responsibility on individuals and institutions in shaping policy Using new evidence and cases from across the globe Environment and Citizenship explores the new vocabulary of ecological citizenship and examines how successful environmental policy making depends on the responsible actions of citizens and civil society organizations as much as on governments and international treaties This accessible and thought provoking book provides a comprehensive and timely guide to the debates on environmental and ecological citizenship expertly combining examples of practice with theory examines how environmental movements have become increasingly involved in governance processes at the local national regional and intergovernmental levels explores the increasing importance of corporations and transnational networks through examples of stakeholding processes and participatory research in environmental decision making calls on researchers policy makers and activists to face a new challenge how to effectively link environmental justice with social justice Breaking new ground Smith and Pangsapa address how environmental responsibility operates through politics ethics culture and the everyday experiences of ctivists as well as how awareness of environmental and social injustice only leads to responsible actions and strategic change through civic engagement
