## **Environmental Protest In Western Europe:**

Environmental Protest in Western Europe Christopher Rootes, 2003-12-11 The rise of environmentalism has been one of the more remarkable developments in the politics of western societies in recent decades. However, as environmental awareness has become more generalized, the forms of expression of environmental concern have changed. Established environmental movement organizations have become embedded in policy networks, but in some countries there has been a resurgence of environmental radicalism. New groups adopting innovative tactics have mounted spectacular and disruptive protests. These developments pose interesting questions for social scientists and policy makers. Has the institutionalization of established environmental organizations demobilized their supporters and reduced them to a passive credit card waving conscience constituency? Has direct participation in environmental protest become the specialized activity of smaller numbers of people? Has there been a decline in the total volume of environmental protest, or is it merely that the forms of protest have changed? Have the protest repertoires of established groups moderated over time, or have they been stimulated by the emergence of more radical groups to adopt more challenging tactics? Has environmental protest become more confrontational? Do protests employ different repertoires of action according to the issues at stake? How does the incidence of protest vary over time and from one country to another? Is there evidence of a Europeanization of either the issues or the forms of environmental protest? These are some of the questions this volume addresses. Based upon an analysis of the protest events reported in one quality newspaper in each of eight countries during the ten years 1988 to 1997, this is the first systematically comparative study of environmental protest in a representative cross section of EU member states. It breaks entirely new ground in the study of environmental politics in Europe and is a major contribution to the study of protest events.

**Environmental Protest in Western Europe** Chris Rootes, 2003-12-11 A major contribution to the study of protest events, this text is a systematically comparative study of environmental protests in a representative cross section of EU member states. Environmental Protest in Western Europe, **Transnational Protest and Global Activism** Donatella Della Porta, Sidney G. Tarrow, 2005 Sociologists and political scientists from Europe and the US explore how global issues are transforming local and national activism and the interactions between local, national, and supranational movement organizations. In addition to describing recent events, they adapt concepts and hypotheses developed in the social movement literature of the past. **Acting Locally** Christopher Rootes, 2013-10-18 Local campaigns are the most persistent and ubiquitous forms of environmental contention. National and transnational mobilisations come and go, and the attention they receive from mass media ebbs and flows, but local campaigns persist. The persistence or re-emergence of local campaigns is also a reminder that it remains possible to mobilise people around environmental issues and they have often served as sources of innovation in and re-invigoration of national organisations that have allegedly been co-opted by the powerful and incorporated into the established political and administrative system. But local environmental campaigns have been relatively

neglected in the scientific literature Drawing on examples from Britain France Greece Ireland and Italy this book seeks to redress that neglect by examining the networks among actors and organisations that connect local mobilizations to the larger environmental movement and political systems the ways in which local disputes are framed in order to connect with national and global issues and the persistent impacts of the peculiarities of place upon environmental campaigns This book was previously published as a special issue of *Environmental Politics* ***The New Transnational Activism*** Sidney Tarrow, 2005-08

The *New Transnational Activism* shows how even the most prosaic activities like immigrants bringing remittances back to their families can assume broader political meanings when they provide ordinary people with the experience of crossing transnational space This means that we cannot be satisfied with defining transnational activists through the ways they think The defining feature of transnationalism in this book is relational and not cognitive This emphasis on activism's relational structure means that even as they make transnational claims transnational activists draw on the resources the networks and the opportunities in which they are embedded and only then if at all on more distant transnational links ***Subterranean Politics in Europe*** Mary Kaldor, Sabine Selchow, Tamsin Murray-Leach, 2015-07-06

The demonstrations and occupations that emerged across Europe in 2011-12 struck a chord in public opinion in a way that has not been true for many years Based on research carried out across the continent this volume investigates why this is occurring now and what they tell us about the future of the European project ***Routledge Handbook of Global Environmental Politics*** Paul G. Harris, 2013-10-15

**Creating a Better World** Rupert Taylor, 2004 Takes an interdisciplinary approach to interpreting global civil society Contributors are some of the leading theoreticians in the field A sound handbook for activism The term global civil society has become a catchphrase of our times But efforts to define and interpret what global civil society actually is have led to ambiguity and dispute This major work of scholarship and advocacy pierces through the generalizations and debates It presents cogent examples of groups within civil society from the Seattle and Genoa protesters to transnational grassroots movements such as Slum Shack Dwellers International that are creatively meeting the challenges and opportunities of an increasingly interconnected world The contributors offer clarity and the hope that another world is possible one in which civil society's global networks can effectively create a free fair and just global order Scholars students and anyone interested in understanding new forces influencing contemporary world politics will want to have this book on their shelves

**Green Activism in Post-Socialist Europe and the Former Soviet Union** Adam Fagan, JoAnn Carmin, 2014-06-11 Green activism played a critical role in the downfall of Soviet style communism in Eastern Europe at the end of the 1980s After the revolutions environmentalists were expected to exert influence within the new democracies and to form the bedrock of the new civil societies that were predicted to flourish across the region the

prospect of EU membership provided activist networks with even greater optimism about their political opportunities Two decades later what has been the impact of political and economic liberalisation on environmental campaigners and policy advocates Has access to elites increased with democratisation and Europeanization To what extent does the realm of environmental politics within individual states and across the region continue to represent an optic on change and continuity Through country case studies and comparative analysis of national movements this edited volume addresses each of these questions and provides a different perspective of green politics in the region This book was previously published as a special issue of *Environmental Politics*
