How Asia Votes:

How Asia Can Shape the World J. Ørstrøm Møller, 2011 Asia will redraw the map of economic progress over the next twenty five years Growth is necessary to solve economic and social problems but harder to achieve as the age of plenty gives way to the age of scarcities The challenge opens the doors for an Asian economic model based on shifting of productivity for the individual to groups ecological productivity instead of economic productivity and a reversal to traditional Asian values less materialistic than Western values A new paradigm for economic thinking emerges to replace the one launched in the West 200 years ago Routledge Handbook of Democratization in East Asia Tun-jen Cheng, Yun-han Chu, 2017-09-01 This handbook provides a comprehensive analysis of the dynamics and prospects of democratization in East Asia A team of leading experts in the field offers discussion at both the country and regional level including analysis of democratic attitudes and movements in China Japan South Korea and Taiwan Evaluating all the key components of regime evolution from citizen politics to democratic institutions the sections covered include Regional Trends and Country Overviews Institutions Elections and Political Parties Democratic Citizenship Democratic Governance The Political Economy of Democratization Examining the challenges that East Asian emerging democracies still face today as well as the prospects of the region s authoritarian regimes the Routledge Handbook of Democratization in East Asia will be useful for students and scholars of East Asian Politics Comparative Politics and Asian Studies **Electoral Participation in Newly Consolidated Democracies** Elvis Bisong Tambe, 2021-02-17 This book examines why people vote in the newly consolidated democracies of Africa Latin America East Asia and Central and Eastern European countries It addresses the question of how well models or theories of electoral participation initially developed in established democracies travel to new democracies Based on recent cross national survey data it provides the first systematic and comparative evaluation of this topic Drawing on political science sociology and psychology approaches it reveals what is distinctive about voting in new democracies and how they compare between themselves and with more established democracies This book will be of key interest to scholars and students of political participation public opinion voting behaviour electoral politics and political parties as well as to international organisations and NGOs working in the field of democracy promotion and in emerging democracies **The Asian American Movement** William Wei, 2010-06-18 The first history and analysis of the Asian American Movement **The Election of the Century and what it Tells Us about the Future of American Politics** Stephen J. Wayne, Clyde Wilcox, 2001-12-31 This work places the 2000 presidential and congressional elections into the larger and future context of American politics It examines a range of topics including wedge issues in 2000 the economy foreign policy and race the dimensions of gender age and religion for example Parliaments in Asia Zheng Yongnian, Lye Liang Fook, Wilhelm Hofmeister, 2013-10-23 Much writing on politics in Asia revolves around the themes of democracy and democratisation with a particular focus on political systems and political parties This book on the other hand examines the role that parliaments a

key institution of democracy play in East Southeast and South Asia including Taiwan and Hong Kong Parliaments in these locations function in a variety of historical political and socio economic circumstances with different implications for institution building and political development This book examines questions like how accessible representative transparent accountable and effective are parliaments To what extent are parliaments able to hold other political actors to account or how far are they constrained by the political environment in which they operate Going further this book considers how new media such as the Internet and other social platforms through providing avenues for individuals to articulate their views separate from official channels are influencing the ways parliaments work To stay relevant parliamentarians need to reach out and engage these individuals in formulating deciding and fine tuning policies In the information age being a parliamentarian has become more challenging and how a parliamentarian copes with this change will shape the nature and pace of political development

The Political Participation of Asian Americans Pei-te Lien, 2018-10-24 Despite the size and relative prosperity of the Asian American ethnic population the participation of Asian Americans in electoral politics has been low This study explores the relationship between ethnic identity and political participation on three levels between the four major racial ethnic groups of the American nation inside the multi ethnic Asian American population and within a specific Asian American ethnic group Koreans Empirical analysis of surveys dealing with ethnic identity experience and voting behavior reveals the complexity of Asian American identities and the importance of both positive and negative experiences in shaping political participation While in general individuals of Asian descent tend to participate less in electoral politics the political involvement of those with a stronger sense of pan Asian or specific ethnic identity are more complex Political participation can be increased by a greater sense of group consciousness and identification of interests with either the panethnic group or a specific ethnic group Most importantly the socio political context shapes the impact of ethnicity on political participation The experience of Korean Americans in southern California exemplifies this process Koreans often victimized by hate crimes were politicized by the riots following the trial of LAPD officers in the Rodney King incident The study concludes with a discussion of the meaning of electoral participation and financial contributions for Asian Americans and of the role of political parties interest groups and media in the mobilization of Asian Americans into mainstream politics Ph D dissertation University of Florida 1995 revised with new preface and foreword
