How Do We Have Fun:

301 Ways to Have Fun At Work Dave Hemsath, Leslie Yerkes, 1997-06-01 The most successful organizations add a healthy dose of play into their daily or weekly routines. In fact, research has shown that when people actually enjoy their jobs, they're more creative, more productive, and more committed to doing their jobs well. Companies like the Colorado Health Sciences Center and Southwest Airlines attest to the positive effect of fun at work. Both trace increased job satisfaction and decreased employee downtime to concerted efforts to make fun a part of their corporate identity. With *301 Ways to Have Fun at Work*, Dave Hemsath and Leslie Yerkes offer a complete resource anyone can use to create a dynamic workplace that encourages and inspires fun and games, camaraderie among employees. It combines thorough research with practical hands-on tools and features hundreds of ideas real companies have used to lighten up the workplace. The authors surveyed over 1,500 individuals from organizations around the world and received enthusiastic responses that yielded a broad range of ways to spice up the work day. The suggestions in *301 Ways to Have Fun at Work* include humorous training films, dress up and dress down days, silly job titles, awards for people who go above and beyond the call of duty when a coworker is on vacation, ritual dances at the completion of a project, a fashion show when it's time to choose a new uniform, even foam dart fights after meetings. Hemsath and Yerkes offer ideas for instilling an element of fun into various business functions, from office environment to meetings, training, communication, hiring, recognition, team building, and simple acts of fun. In addition to the fun ideas in these chapters, a series of side bars called fun facts, fun quotes, and fun resources offer humorous and interesting facts and statements about the effects of fun on workplace performance and job satisfaction and direct readers to useful sources for products and services to enhance workplace funativity. Hemsath and Yerkes show that creating a fun atmosphere in the workplace increases productivity and morale and has a positive effect on the bottom line. Most importantly, they give readers the tools to have more fun at work, no matter where they work or what position they're in. *Get Out, Explore, and Have Fun!* Lisa Jo Rudy, 2010-01-01 If you are the parent of a child with autism or Asperger syndrome, you may feel that involvement in the community is not possible for your family. This book sets out to change that with a rich and varied menu of suggestions for how you can take a full part in community life and support the strengths and interests of your child at the same time. *Get Out, Explore, and Have Fun* is your guide to what's out there, how to find it, and how to make it work for your family. It includes hints and tips for involving your family in the right community activities, from sports to science, information on museums, arts organizations, and science institutions as venues for enjoyable and enriching days out for the family, and resources and ideas to help your child build on their strengths, interests, and preferred learning styles. Handouts about autism and Asperger syndrome are also included, as well as suggestions about how organizations and institutions can successfully include children on the spectrum in their activities. This book will open the door to community inclusion, creative exploration, and social learning, and is a must-read for any parent of a child on the autism spectrum. **How to Have Fun with**

A Significant Casualty Peter J. Pilkington,2010-06 In a perfect world a story such as I am about to relate could never have happened and would never have needed to be told but this is not a perfect world and life does not always treat us in the manner to which we feel we deserve We have become accustomed to accepting mediocrity and bureaucratic incompetence Indifference and ambivalence are becoming the accepted norm We live in a democratic society where less than half the eligible members actually participate and as a result the officials we elect owe more allegiance to the special interests that fund and support them than to the constituents they purport to represent As a result we have enabled a system to exist where the interests of business overshadow the rights of the individual a system where we permit industry to write the regulations intended to control their activities We live in a society where human life is measured and analyzed compared and evaluated against the cost of doing

business where litigators feed on the misery of others while doing little to prevent the carnage on which they feed and depend While a kinder and gentler government stands idly by protecting the special interests that feed the political system while hiding behind cost to benefit studies to justify their inaction Under current United States Coast Guard policy a Significant Casualty is one that may involve multiple deaths the loss of a ship of five hundred gross tons or larger or one that if properly investigated could lead to the implementation of changes in current standards of safety And it is only these Significant Casualties that by regulation merit proper investigation The following is a story of a young man who went off to work one morning never to return But mostly it is the story of a man who like all men should never be allowed to be remembered as only another statistic This is the story of one such Significant Casualty The five year quest receives a final punctuation when the father is granted Party in Interest status and has his son s case properly reviewed at a formal United States Coast Guard Investigation An Investigation that not only looks to the fatality but at the regulatory atmosphere that allowed the conditions to exist The story is timely as it highlights not only a father s quest to clear his son but also the illegal and improper inspection of oil drilling facilities in the US Gulf of Mexico According to World Oil Feb 2010 issue at the end of 2009 there were 2 237 oil wells in the Federal waters of the Gulf and 242 more in the state waters of Louisiana All working under regulations written by the industry An industry more interested in profits than safety In April of 2010 President Barack Obama while addressing the issues surrounding mine safety following the deaths in West Virginia was quoted as saying A failure first and foremost of management a failure of oversight and a failure of laws so riddled with loopholes that companies repeatedly can violate safety regulations without penalty Those same comments ring true for the oil drilling companies of this country As horrific as the mine disaster was in West Virginia more workers die in the underwater workplace each year than do in all the nation s mines
