Kolb, 2008 This encyclopedia spans the relationships among business ethics and society with an emphasis on business ethics and the role of Globalization and the Posthuman William S. Haney II,2009-03-26 Globalization and the Posthuman business in society argues that by globalizing posthumanism through biotechnology particularly through the invasive interface of humans and machines we may well interfere with and even undermine the innate quality of human psycho physiology and the experience of the internal observer the non socially constructed self or pure consciousness Furthermore many features of globalization in and of itself such as the fall of public man the exterritorialization of capital the loss of an impersonal public world to localized communities based on emotively shared interests combined with the posthuman expansion of biotechnology will diminish our natural capacity to experience the self as knower and lead to an increase in global crime sickness accident rates and overall lack of harmony The experience of the self comprises the unsayable secret of modern and postmodern literature and art a secret that may soon become inaccessible if the world continues down the road of globalized infomania The analysis of the consequences of globalization and the posthuman in this book is unique in that it will be the first to examine the interrelation between globalization posthumanism and pure consciousness Posthumanists define consciousness in a way that promotes the globalization of biotechnology without regard for its potential risks This book explores the implications of the

globalization of the posthuman model of consciousness On the one hand cognitive scientists tend to equate consciousness with subjectivity which they associate with the thinking mind as an extension of the body nature and culture Eastern philosophy on the other hand distinguishes mind from consciousness with mind defined as the content of consciousness Bionic technology will have the effect of raising human metabolism and preventing the mind from settling down to the state of least excitation of consciousness This book suggests that while conscious content is an indispensable aspect of both the human and posthuman condition the thoughts memories feelings and perceptions of this content do not encompass a vital aspect of human nature attested to not only by the first person experience of many millions of people around the world but also by the records of both classical and modern contemplative traditions **Globalization** JoAnn Chirico, 2013-08-01 This groundbreaking text on globalization provides a comprehensive and enlightening overview of globalization issues and topics Emphasizing the theory and methods that social scientists employ to study globalization the text reveals how macro globalization processes impact individual lives from the spread of scientific discourse to which jobs are more or less likely to be offshored The author presents a clear image of the big globalization picture by skillfully exploring piece by piece a myriad of globalization topics debates theories and empirical data Compelling chapters on theory global civil society democracy cities religion institutions sports education and health care along with three chapters on global challenges help readers develop a broad understanding of key topics and issues Throughout the text the author encourages readers to relate their personal experiences to globalization processes allowing for a more meaningful and relevant learning experience
