

The bad things we assume about other people tend to become true, become "self-fulfilling prophecies." Many people seem to think that the way to take care of children is to ask in any situation what is the most stupid and dangerous thing the children could possibly do, and then act as if they were sure to do it.

Remember John Holt and "How Children Fail?" A Book Review Kevin C. Costley, 2006 In the book *How Children Fail* John Holt simply but honestly records classroom interactions in a refreshing realistic and humorous style of delivery Many of Holt s real stories have to do with teachers often falling into the trap of asking students questions and looking only for right answers Holt s main thrust is child failure in a success oriented culture He is alarmed at the increasing role of failure in American schools He warns against teachers using subject matter in an end itself Holt believes that teachers teach subjects rather than teach students By teaching only subjects abstraction curiosity appreciation discovery interaction exploration and intrinsic motivation are suppressed Ironically these qualities are professed to be objectives of American education Even students who consistently make higher grades often times fail to develop creativity and understanding Holt is also concerned with schools where children are made go go and often fail because of high adult expectations He is also concerned with scared learners The author of this article maintains that schools have improved since the writing of this book Schools are a kinder and more humane place to be Teachers are now learning to connect with children s backgrounds and prior experiences implementing more diverse and appropriate lessons Teachers listen to children more and demonstrate mutual respect Today there are less scared learners who embrace each day at school with enthusiasm without fear
