Science Communication Massimiano Bucchi, Brian Trench, 2025-04-02 Science

Communication The Basics is an accessible yet critical introduction to science communication which is viewed as the social conversation around science. It addresses why science communication matters, examines the evolution of theories and practices, and explains concepts, myths, misunderstandings, and challenges. Massimiano Bucchi and Brian Trench navigate the foundations and key themes of science communication through numerous vignettes, examples, cases, and arguments. They provide annotated recommended reading and a Lexicon summarising the understandings and uses of key terms in the field. Revealing science communication as a collective process and part of daily life, topics covered include science communication as part of culture and our understanding of ourselves and the world, the history of science communication and the development of modern science policy and theoretical approaches, the growth of professional practice, formal education and research in the field, evolving platforms for science communication, and quality, trust, and ethical awareness in science communication.

Science Communication The Basics is designed to be a concise primer and essential reading for newcomers to the field, including staff in research and policy institutions, students of the natural, human, and social sciences, and general readers curious about the ways science is presented and perceived in society. **Science Communication The Basics** is the third in a triptych of works on science communication from the two authors. The other two works are the *Routledge Handbook of Public Communication of Science and Technology*, first published in 2008 and now in its third edition (2021), and a four-volume anthology of readings, *The Public Communication of Science* (2016), also published by Routledge.

Critical Conversations in African Philosophy Alena Rettová, Benedetta Lanfranchi, Miriam Pahl, 2021-11-29. In this edited collection, contributors examine key themes, sources, and methods in contemporary African Philosophy, building on a wide-ranging understanding of what constitutes African philosophy and drawing from a variety of both oral and written texts of different genres. Part one of the volume examines how African philosophy has reacted to burning issues ranging from contemporary ethical questions on how to integrate technological advancements into human life to one of philosophy's prime endeavours, which is establishing the conditions of knowledge to eternal ontological and existential questions on the nature of being, time, memory, and death. Part two reflects on the re-definition of philosophy from an African vantage point and African philosophy's thrust to create its own canon, archive, and resources to study African concepts, artefacts, practices, and texts from the perspective of intellectual history. The volume aims to make a contribution to the academic debate on African philosophy and philosophy more broadly, challenging orthodox definitions and genres in favour of a broadening of the discipline's self-understanding and locales. This book will be of interest to students and scholars of African philosophy and comparative philosophy.
