

# Key Qualifications In Work And Education

**W.J. Nijhof, J.N. Streumer**

## **Key Qualifications In Work And Education:**

**Key Qualifications in Work and Education** W.J. Nijhof,J.N. Streumer,2012-12-06 In today s rapidly changing world a constant renewal of knowledge and skills in every human endeavour can be observed The characteristics of workers and the jobs that they perform have been attended by technological social and political change on a global scale New forms of employment have made work more mobile to an extent never experienced before An increasing proportion of workers no longer need come to their employer s job site in order to do their work The instability of employment is creating a new breed of workers who know how to move efficiently from one job to another As a consequence workers need flexible qualifications to perform jobs Key qualifications are the answer Key qualifications provide the key to rapid and effective acquisition of new knowledge and skills First qualifications enable workers to react effectively to and exercise initiative in changes to their work Second qualifications enable workers to shape their own career in a time of diminishing job security nowadays frequently defined as employability

**Bridging the Skills Gap between Work and Education** W.J. Nijhof,Jittie Brandsma,2013-03-09 This book takes up the debate about matching vocational education with the labour market and shows progress in terms of theoretical models tools transformation and matching processes and learning environments The solutions showing up the need for core or key skills the necessity of embedding learning skills in authentic and guided learning environments shows a perspective of research and developmen tal work to be tested in schools and in workplaces to find better curricula for a better skilling

**Work-Related Teaching and Learning** Prue Huddleston,Julian Stanley,2013-03-01 In the current economic climate it is more important than ever that young people engage with the world of work and gain the knowledge skills and experience they will need to prepare them for their future careers This book provides an overarching framework for understanding all the separate parts of the work related learning curriculum and constructs a research based pedagogy with practical steps for students teachers and practitioners Work Related Teaching and Learning deepens our understanding of work related learning and provides an overview of the programmes and recent initiatives designed to make learning more relevant and better connected to work Drawing on contemporary research and innovative practice it offers guidance to support teachers and practitioners in the delivery of the work related learning curriculum Covering all aspects of word related learning from enterprise education and economic well being to careers education work experience and the diplomas features include An overarching conceptualisation of work related learning An exploration of the benefits of work related learning An examination of the key issues and challenges faced A detailed look at how teaching and learning activities have been used in various contexts and with what effects An assessment of the strengths and weaknesses of different curriculum models Case studies and examples of good practice Discussion questions for reflective practice This book is essential reading for current teachers and practitioners involved in work related learning as well as students and trainee teachers who wish to improve or develop their practice in the light of recent initiatives

**What**

**Counts as Mathematics?** Gail E. FitzSimons, 2005-12-15 J R GEN MAASS WOLFGANG SCHL GLMANN THEORY AND PRACTICE OF MATHEMATICS EDUCATION FOR ADULTS Our world is dominated by technological developments The philosopher Heinz H Ismann wrote that Atom Gen and Bit are the three basic principles now see H Ismann 1985 Each of the so called new technologies is based upon mathematics The first computer was built as a part of the Manhattan Project to calculate models of the atomic bomb The human genome project uses computers very often to find out the structure of the genome And computers are mathematical machines materialised mathematics Social organisations companies and not least governments use computers to process information A precondition for this is to formalise the social or economical structure which produces the information This formalisation is a type of mathematisation too The social and economical models of organisations or companies are a part of the process of mathematising the world Last but not least mathematics is a part of everyday life and work People handle money buy things do handywork at home measure areas to paint and so on All together mathematics is not only the basis for technology economy work and everyday life but a part of our culture It seems clear that everyone in our society should know more about this

**Key skills - making a difference** The Open University, 1998-01-01 Features Key Skills Making A Difference a learning pack compiled by Open University Worldwide Ltd in the United Kingdom that assists students in identifying and developing the skills needed to successfully study any subject
