The Phenomenon of Money (Routledge Revivals) Thomas Crump, 2011 First published in 1981 this book concerns itself with the different ways in which money is used the relationships which then arise and the institutions concerned in maintaining its various functions Thomas Crump examines the emergence of institutions with familiar and distinctive monetary roles the state the market and the banking system However other uses of money such as for gambling or the payment of fines are also taken into account in an exhaustive encyclopedic treatment of the subject which extends far beyond the range of conventional treatises on money

Culture Wars: Past, Present, Future Bojan Žalec, Stjepan Štivić, Culture wars have decisively marked our past and are increasingly shaping our present and future The book covers events in Slovenia and Central Europe and temporally it touches on the period of the second half of the 19th century to the onset of the Second World War However the book's contributions extend beyond these limits addressing the present era and looking towards the future both of which are significantly shaped by modern algorithms and artificial intelligence technologies Another key emphasis is placed on religious aspects The broader relevance of the monograph lies in its integral and multidisciplinary scientific investigation of ideologies social doctrines and cultural currents all embedded in specific contexts that have played a decisive role on a global scale

Anthropological Perspectives On Kinship Ladislav Holy, 1996-10-20 This authoritative introductory text takes into account the changes in the conceptualisation of kinship brought about by new reproductive technologies and the growing interest in culturally specific notions of personhood and gender Holy considers the extent to which Western assumptions have guided anthropological study of kinship in the past In the process he reveals a growing sensitivity on the part of anthropologists to individual ideas of personhood and gender and encourages further critical reflection on cultural bias in approaches to the subject

Primeval kinship Bernard Chapais, 2009-06-30 At some point in the course of evolution from a primeval social organization of early hominids all human societies past and present would emerge In this account of the dawn of human society Bernard Chapais shows that our knowledge about kinship and society in nonhuman primates supports and informs ideas first put forward by the distinguished social anthropologist Claude L vi Strauss Chapais contends that only a few evolutionary steps were required to bridge the gap between the kinship structures

of our closest relatives chimpanzees and bonobos and the human kinship configuration The pivotal event the author proposes was the evolution of sexual alliances Pair bonding transformed a social organization loosely based on kinship into one exhibiting the strong hold of kinship and affinity The implication is that the gap between chimpanzee societies and pre linguistic hominid societies is narrower than we might think Many books on kinship have been written by social anthropologists but Primeval Kinship is the first book dedicated to the evolutionary origins of human kinship And perhaps equally important it is the first book to suggest that the study of kinship and social organization can provide a link between social and biological anthropology Economy and Society Max Weber,1978 Manipur Tribal Scene Rajat Kanti Das,1985

Conceptualizing Society Adam Kuper,2002-03-11 The social anthropologists represented in this volume share the view that together ethnography and theoretically informed comparison constitute a single plausible enterprise and they reject both the postmodernist criticism of ethnography as epistemologically problematic and the opposing view that no theory could possibly do justice to the insights and complex descriptions of ethnography In this volume the first papers taken from the first conference of the newly formed European Association of Social Anthropologists the contributors discuss the various models at the disposal of the modern ethnographer Their concerns range through structuralism postmodernism and world systems theory and the volume as a whole offers a lively account of the state of general theory in social anthropology today

The Atlantic Salmon Eric Verspoor, Lee Stradmeyer, Jennifer L. Nielsen, 2008-04-15 Atlantic Salmon is a cultural icon throughout its North Atlantic range it is the focus of probably the World s highest profile recreational fishery and is the basis for one of the World s largest aquaculture industries Despite this many wild stocks of salmon are in decline and underpinning this is a dearth of information on the nature and extent of population structuring and adaptive population differentiation and its implications for species conservation This important new book will go a long way to rectify this situation by providing a thorough review of the genetics of Atlantic salmon Sponsored by the European Union and the Atlantic Salmon Trust this book comprises the work of an international team of scientists carefully integrated and edited to provide a landmark book of vital interest to all those working with Atlantic salmon
