Landbased Air Power In Third World Crises:

Land-based air power in Third World crises, 1986 **Land-based Air Power in Third World Crises** David R. Mets, 1986 Dr Mets examines the utility and limitations of land based aircraft in third world crises over two decades He offers several conclusions regarding the most effective use of airpower in crisis situations **Reader's Guide to Military History** Charles Messenger, 2013-10-31 This book contains some 600 entries on a range of topics from ancient Chinese warfare to late 20th century intervention operations Designed for a wide variety of users it encompasses general reviews of aspects of military organization and science as well as specific wars and conflicts The book examines naval and air warfare as well as significant individuals including commanders theorists and war leaders Each entry includes a listing of additional publications on the topic accompanied by an article discussing these publications with reference to their particular emphases strengths and limitations **Conflict Termination And Military Strategy** Stephen J. Cimbala, 2019-04-10 Although considerable attention has been paid to deterrence theory and crisis management the equally important topic of ending wars has been virtually ignored Conflict termination is the stepchild of U S strategy for a number of reasons Thinking about how wars should end presupposes acceptance of the fact that war especially nuclear war is possible Further analyzing options for ending conflicts implies less than total victory a concept that not only runs counter to the U S approach to warfare but also raises the specter of limited war an approach that fell into disfavor following Korea and Vietnam Finally defining conflict termination objectives assumes that we think more about ends than means that we know what is important to us and why and thus understand the risks we will accept to defend specific interests and objectives The contributors examine a wide variety of topics ranging from Soviet and U S views on conflict termination to past present and future U S military service contributions Their aim is to demonstrate the importance of careful evaluation of conflict termination goals during peacetime because when war begins passions and emotions will cloud decisionmaking **Military History** United States. Superintendent of Documents, 1990 **AU Press, Your Air and Space Power Publisher, 2003**, 2003 **Air Power and Warfare** Elwood L. White, 2002 This highly selective bibliography supplements the original bibliography developed in 1978 by Ms Betsy C Kysely to support the Eighth Military History Symposium While this bibliography focuses primarily on materials published since the earlier bibliography was developed it does include some significant materials that were published prior to 1978 but that were omitted from that edition Emphasis in this supplement is on scholarly analysis of air power itself and scholarly depictions of its history Like most editions of the United State Air Force Academy Directorate of Libraries publication Special Bibliography Series this compilation is limited to current holdings of the Academic Library at the Academy It includes books reports government documents and journal articles Excluded are pictorial works newspaper articles works of fiction studies of the technology of aircraft and associated weaponry and items focused on the general history of aviation Readers wanting information on the history of aviation certainly prior to the Wright Brothers are

The belief that airpower is inherently offensive is a recurrent theme throughout airpower theory and doctrine Before World War I dogmatic belief in the dominance of the offense in land warfare affected the military decisions which resulted in the disaster of the trenches Termed the cult of the offensive by scholars faith in offense became so unshakable in pre 1914 Europe that military organizations dismissed as irrelevant the numerous indications of the waning power of the offense as technological developments strengthened the defense With airpower s professed inclination for offense could a cult of the offensive perniciously trap airpower doctrine and lead to similarly disastrous consequences The study begins by establishing the theoretical background necessary for case study analysis Airpower defense is defined as those operations conducted to deny another force s air operations in a designated airspace Airpower offenses are those operations in the airspace defended by another or operations conducted outside of one s actively defended airspace The relationship between offense and defense is dissected to discover that airpower defense enjoys neither an advantage of position nor of time so traditional Clausewitzian views relative to the power of the defense do not apply to airpower Next the study describes those factors which may inject or reinforce a preferential bias for offense into airpower strategy and doctrine A cult of the offensive is defined as an organizational belief in the power of offense so compelling that the military organization no longer evaluates its offensive doctrine objectively This leads to an examination of the ramifications postulated to result from offensive ideology

Storm Over Iraq Richard Hallion,2015-05-26 An incisive account of the Persian Gulf War Storm Over Iraq shows how the success of Operation Desert Storm was the product of two decades of profound changes in the American approach to defense military doctrine and combat operations The first detailed analysis of why the Gulf War could be fought the way it was the book examines the planning and preparation for war Richard P Hallion argues that the ascendancy of precision air power in warfare which fulfilled the promise that air power had held for more than seventy five years reflects the revolutionary adaptation of a war strategy that targets things rather than people allowing one to control an opposing nation without destroying it

Night Hunters William Pace Head,2014-03-18 In *Night Hunters* air power historian William P Head provides the first detailed study of the development and deployment of the AC 130 gunship While other airframes and other types of close air support CAS and interdiction weapon systems preceded or flew with the AC 130s this four engine cargo airframe proved to be not only the longest serving fixed wing gunship but also the most effective by far During the Vietnam War the US military developed new tactics and weapons systems to counter a diversity of enemy tactics and geographic features the difficult climate and the shifting diplomatic context One of the most important was the development of the AC 130 Its ability to transport heavier payloads at higher altitudes across longer distances made it the logical choice to be the final Vietnam era fixed wing gunship and the only one that continues to fly missions in the twenty first century In addition it employed

many of the most advanced weapons sensors targeting devices and fire control systems of the 1970s or of any era By recounting both the technical development and the combat operations of the plane and by looking at the proposed alternatives for its use in the War on Terror Night Hunters offers a clear view of the role of gunships and of close air support in US wars In today s never ending brushfire wars the AC 130s continue to uphold their reputation for excellence Air Force Magazine ,2011-07 *Monthly Catalogue, United States Public Documents* ,1986-11 **Monthly Catalog of United States Government Publications** ,2004-07 Eagles Overhead Matt Dietz,2023-02-15 US Air Force Forward Air Controllers FACs bridge the gap between air and land power They operate in the grey area of the battlefield serving as an aircrew who flies above the battlefield spots the enemy and relays targeting information to control close air support attacks by other faster aircraft When done well Air Force FACs are the fulcrum for successful employment of air power in support of ground forces Unfortunately FACs in recent times have been shunned by both ground and air forces their mission complicated by inherent difficulty and danger as well as by the vicissitudes of defense budgets technology leadership bureaucracy and doctrine Eagles Overhead is the first complete historical survey of the US Air Force FAC program from its origins in World War I to the modern battlefield Matt Dietz examines their role status and performance in every US Air Force air campaign from the Marne in 1918 World War II Korea Vietnam Desert Storm and finally Mosul in 2017 With the remaking of the post Vietnam US military and the impact of those changes on FAC the Air Force began a steady neglect of the FAC mission from Operation Desert Storm through the force reductions after the Soviet Union s collapse and into the post 9 11 wars in Iraq and Afghanistan Eagles Overhead asks why FACs have not been heavily used on US battlefields since 2001 despite their warfighting importance Dietz examines the Air Force FAC s theoretical doctrinal institutional and historical frameworks to assess if the nature of air warfare has changed so significantly that the concept and utility of the FAC has been left behind From these examinations Eagles Overhead draws conclusions about the potential future of Air Force FACs

Airmen and air theory a review of the sources Phillip S. Meilinger,2001 This part of the book reviews the state of American airpower biography and autobiography I have set certain parameters to define the boundaries of my discussion I discuss biographies and autobiographies anthologies and oral histories of military officers who served in senior positions Thus although the stories of great aviators like Eddie Rickenbacker Charles Lindbergh and Chuck Yeager are important those men did not command large forces either in combat or in peace they had only a temporary effect on the development of strategy and doctrine Similarly excluded are civilian political leaders and industrialists like Stuart Symington and Donald Douglas even though they played key roles In their own spheres What follows are the stories some published some not of America s greatest military airmen some told by themselves others by biographers The order of presentation is roughly chronological according to the time during which these men served The fact that a surprising number of air luminaries do not appear here means that much work remains to be done *Africa in Global History* Toyin Falola,Mohammed Bashir
