Language And Maturation

Steven Pinker

Language And Maturation:

Language and Maturation Paula Menyuk, 1981 This book offers a unique overview of the current literature of language development Beginning with an outline of the maturational changes that occur in linguistic knowledge in the period from birth to adulthood it goes on to discuss the suggested causes for the changes and the controversies about the suggested causes The theory of generative grammar advanced by Noam Chomsky was responsible for much of the excitement and interest that the study of language development has enjoyed over the past decade Inevitably however some linguists have questioned whether Chomsky's hypothesis of an innate mechanism for language learning distinct from other types of learning is a valid model of the way children actually do acquire language competence Present efforts are directed towards finding an explanation of development and processing of language in the cognitive and social functioning of the human being but a clear understanding of the basis for language organization eludes proponents of both schools of thought *Language and Maturation* summarizes some of the current findings on developmental language behavior in a concise well organized and nonpartisan manner It begins by describing the explanatory theories of language behavior in the adult and of language acquisition in the child that are current in the literature The developmental course is then divided into the periods of infancy early language development and language development in middle and late childhood Finally the question of adultlike and childlike language behavior is discussed Introducing each chapter are those questions most germane to an examination of that period of development Some of the partial answers conclude sections of the discussion Suitable for upper level undergraduate or graduate students the book is addressed not only to linguistics students but also to those preparing themselves to be psychologists educators and therapists I hope Paula Menyuk writes in her introduction that readers of this book that is those interested in language development and processing will find the questions and answers presented so intriguing and challenging that they themselves will become engaged in in depth studies of the questions of language and maturation

Language Development and Age Julia

Herschensohn,2012-07-19 This book was first published in 2007 The anecdotal view of language acquisition is that children learn language with apparent ease no instruction and in very little time while adults find learning a new language to be cognitively challenging labour intensive and time consuming In this book Herschensohn examines whether early childhood is a critical period for language acquisition after which individuals cannot learn a language as native speakers She argues that a first language is largely susceptible to age constraints showing major deficits past the age of twelve Second language acquisition also shows age effects but with a range of individual differences The competence of expert adult learners the unequal achievements of child learners of second languages and the lack of consistent evidence for a maturational cut off all cast doubt on a critical period for second language acquisition

Individual Differences in Language Development

Cecilia M. Shore,1994-11-30 Do all children learn language in the same way Is the apparent fast vs slow language learning rate among children a reflection of the individual child s approach to language acquisition This volume explores the importance that individual differences have in acquiring language and challenges some of the widely held theories of linguistic development Focusing on children ages one to three the author describes characteristic differences in terms of vocabulary grammatical and phonological development and considers whether distinctive styles of language development can be defined In addition the social and cognitive influences that can explain these differences are examined The book concludes with a look at new language theories such as ecological chaos and connectionist approaches and considers what individual differences in development can tell us about the mechanisms of language development Individual Differences in Language Development is invaluable for professionals and researchers in developmental psychology family studies education psychology and communication Cecilia M Shore puts forward an alternative theory on differences in language development and offers an important message on the significance of context in children s early language acquisition The principal theme has significant implications for further research as well as practical implications for teacher trainers teachers and parents Durante s Cecilia M Shore writes in a warm and engaging style It serves her purpose well to put across complex ideas in a clear and unforgettable form The content is right on target Shore covers all the relevant issues in this complex area and her review is right up to date Elizabeth Bates Professor of Psychology and Professor of Cognitive Science University of California San Diego

Brain maturation and cognitive development Kathleen R. Gibson, Anne C. Petersen, Originally published in 1991 by Aldine De Gruyter

Bilingualism, Language Development and Processing across the Lifespan Julia Herschensohn, 2022-09-19 How does knowledge of a first or second language develop and how is that knowledge used in real time comprehension and production of one or two languages Language development and processing are the central topics that this book explores initially in terms of first language's and then in terms of additional languages Human growth and development necessarily involve the passage of time implicating this orthogonal factor and leading to the observation that capacities may vary across the lifespan Two theoretical frameworks have historically attributed explanations for knowledge and use of language nature versus nurture approaches the former credits biogenetic intrinsic characteristics while the latter ascribes environmental extrinsic experiences as the causes of developmental change The evidence examined throughout this book offers a more nuanced and complex view eschewing dichotomy and favoring a hybrid approach that takes into account a range of internal and external influences

Early Language Development John Harris, 2002-09-26 Language is of central importance in children's education and development so providing help for the child suspected of having language difficulties is clearly of vital concern Providing such help or advising a teacher or parent on how best to proceed is however far from straightforward Early Language Development draws together in a single volume the results of the very latest findings on language development and shows practitioners how best they can make use of them In particular special emphasis is given to the two most important practical questions for the practitioner How can I find out exactly what the problem is and What can I do about it

Individual Differences in Language Development Cecilia M. Shore, 1995 Do all children learn language in the same way Is the apparent fast versus slow learning rate among children a reflection of the individual child's approach to language acquisition This volume explores the importance that individual differences have in language acquisition and challenges some widely held theories of linguistic development Focusing on one to three year old children Cecilia Shore

describes characteristic differences in terms of vocabulary grammatical and phonological development She considers whether distinctive styles of language development can be defined and also examines social and cognitive influences that may explain individual differences In conclusion she discusses new language theories *Language Development and childhood* Micah Effiong, 2019-12-12 Seminar paper from the year 2019 in the subject Psychology Intelligence and Learning Psychology grade A course Business Administration language English abstract Language since inception has been hailed as the hallmark of humanity the ability that separates humans from animals Language development is a process starting early in human life Young children acquire language through significant others by interaction in their immediate environment through responding to sounds sentences and experiences expressed by their parents family and other carers They begin by absorbing listening and then imitating and practicing Their responses are reinforced by these significant others and patterns begin to emerge even for the babies as they try so hard to make sense of what is happening around them Gradually they learn to reproduce sounds and words and establish an understanding of how language works the structure and grammatical sense of putting these sounds and words together Infants start without language yet by 4 months of age babies can distinguish speech sounds and engage in babbling Some research has shown that the earliest learning begins in uterus when the foetus starts to recognize the sounds and speech patterns of its mother s voice Usually productive language is considered to begin with a stage of preverbal communications in which infants use gestures and vocalizations to make their intents known to others According to a general principle of development new forms then take over old functions so that children learn words to express the same communicative functions which they had already expressed by preverbal means Kennison 2013 Language plays an important role in an individual development children use speech not only for social communication but also to help them solve tasks
