Language Thought And Other Biological Categories New Foundations For Realism:

Language, Thought, and Other Biological Categories Ruth Garrett Millikan, 1987-12-16 Beginning with a general theory of function applied to body organs behaviors customs and both inner and outer representations Ruth Millikan argues that the intentionality of language can be described without reference to speaker intentions and that an understanding of the intentionality of thought can and should be divorced from the problem of understanding consciousness The results support a realist theory of truth and of universals and open the way for a nonfoundationalist and nonholistic approach to epistemology A Bradford Book

Rerepresentation S. Silvers, 2012-12-06 This collection of papers on issues in the theory of mental representation expresses a diversity of recent reflections on the idea that C D Broad so aptly characterized in the title of his book *Mind and the World Order* An important impetus in the project of organizing this work were the discussions I had with Keith Lehrer while I was a Visiting Scholar in the department of Philosophy at the University of Arizona His encouragement and friendship were of great value to me and I wish to express my thanks to him here A word of thanks too for Mike Harnish who casually suggested the title *Rerepresentation* I wish to express my thanks to Hans Schuurmans of the Computer Center at Tilburg University for his patient and cheerful assistance in preparing the manuscript Professor J Verster of the University of Groningen kindly provided the plates for the Ames Room figures Thieu Kuys helped not only with the texts but also relieved me of chores so that I could devote more time to meeting deadlines Barry Mildner had a major role in the text preparation using his skills and initiative in solving what seemed like endless technical problems My deepest thanks are reserved for Anti Sax whose contribution to the project amount to a co editorship of this volume She participated in every phase of its development with valuable suggestions prepared the indexes and worked tirelessly to its completion

Understanding Naturalism Jack Ritchie, 2014-12-05 Many contemporary Anglo American philosophers describe themselves as naturalists But what do they mean by that term Popular naturalist slogans like there is no first philosophy or philosophy is continuous with the natural sciences are far from illuminating Understanding Naturalism provides a clear and readable survey of the main strands in recent naturalist thought The origin and development of naturalist ideas in epistemology metaphysics and semantics is explained through the works of Quine Goldman Kuhn Chalmers Papineau Millikan and others The most common objections to the naturalist project that it involves a change of subject and fails to engage with real philosophical problems that it is self refuting and that naturalism cannot deal with normative notions like truth justification and meaning are all discussed Understanding Naturalism distinguishes two strands of naturalist thinking the constructive and the deflationary and explains how this distinction can invigorate naturalism and the future of philosophical research

Mechanisms in Science Stavros Ioannidis, Stathis Psillos, 2022-06-23 In recent years what has come to be called the New Mechanism has emerged as a framework for thinking about the philosophical assumptions underlying many areas of science especially in sciences such as biology neuroscience and psychology This book offers a fresh look at the role of mechanisms by situating novel analyses of central philosophical issues related to mechanisms within a rich historical perspective of the concept of mechanism as well as detailed case studies of biological mechanisms such as apoptosis It develops a new position Methodological Mechanism according to which mechanisms are to be viewed as causal pathways that are theoretically described and are underpinned by networks of difference making relations In contrast to metaphysically inflated accounts this study characterises mechanism as a concept in use in science that is deflationary and metaphysically neutral but still methodologically useful and central to scientific practice

Cognitive Ethology Carolyn A. Ristau, Peter Marler, 2014-02-25 This collection of essays was written by former students associates admirers critics and friends of Donald R Griffin the creator of cognitive ethology Stimulated by his work this volume presents ideas and experiments in the field of cognitive ethology the exploration of the mental experiences of animals as they behave in their natural environment during the course of their normal lives Cognitive Ethology discusses the possibility that animals may have abilities to experience communicate reason and plan beyond those usually ascribed to them in a black box or stimulus response interpretation of their behavior Contributions from scientists who have been associated with or influenced by Griffin offer a lively array of views some disparate from one another and some especially selected to present approaches contrary to his

Rupert, 2009-08-19 Cognitive Systems and the Extended Mind surveys philosophical issues raised by the situated movement in cognitive science that is the treatment of cognitive phenomena as the joint products of brain body and environment Life Concepts from Aristotle to Darwin Lucas John Mix, 2018-08-29 This book traces the history of life concepts with a focus on the vegetable souls of Aristotle investigating how they were interpreted and eventually replaced by evolutionary biology Philosophers have long struggled with the relationship between physics physiology and psychology asking questions of organization purpose and agency For two millennia the vegetable soul nutrition and reproduction were commonly used to understand basic life and connect it to higher animal and vegetable life Cartesian dualism and mechanism destroyed this bridge and left biology without an organizing principle until Darwin Modern biology parallels Aristotelian vegetable life concepts but remains incompatible with the animal rational subjective and spiritual life concepts that developed through the centuries Recent discoveries call for a second look at Aristotle's ideas though not their medieval descendants Life remains an active chemical process whose cause identity and purpose is self perpetuation Philosophy and Connectionist Theory William Ramsey, David E. Rumelhart, Stephen P. Stich, 2013-06-17 The philosophy of cognitive science has recently become one of the most exciting and fastest growing domains of philosophical inquiry and analysis Until the early 1980s nearly all of the models developed treated cognitive processes like problem solving language comprehension memory and higher visual processing as rule governed symbol manipulation However this situation has changed dramatically over the last half dozen years In that period there has been an enormous shift of attention toward connectionist models of cognition that are inspired by the network like architecture of the brain Because of their unique architecture and style of processing connectionist systems are generally regarded as radically different from the more traditional symbol manipulation models This collection was designed to provide philosophers who have been working in the area of cognitive science with a forum for expressing their views on these recent developments Because the symbol manipulating paradigm has been so important to the work of contemporary philosophers many have watched the emergence of connectionism with considerable interest The contributors take very different stands toward connectionism but all agree that the potential exists for a radical shift in the way many philosophers think of various aspects of cognition Exploring this potential and other philosophical dimensions of connectionist research is the aim of this volume **The Oxford Handbook of Philosophy of Technology** Shannon Vallor, 2022 The Oxford Handbook of Philosophy of Technology gives readers a view into this increasingly vital and

urgently needed domain of philosophical understanding offering an in depth collection of leading and emerging voices in the philosophy of technology The thirty two contributions in this volume cut across and connect diverse philosophical traditions methodologies and subfields providing the reader with provocative and original insights on the history concepts problems and challenges that mark humanity s attempts to attain deeper and more lasting wisdom about our complex and evolving relationship to technology

Self-Reflection for the Opaque Mind T. Parent,2016-12-01 This volume attempts to solve a grave problem about critical self reflection The worry is that we critical thinkers are all in epistemic bad faith in light of what psychology tells us After all the research shows not merely that we are bad at detecting ego threatening thoughts la Freud It also indicates that we are ignorant of even our ordinary thoughts e g reasons for our moral judgments of others Haidt 2001 and even mundane reasons for buying one pair of stockings over another Nisbett Wilson 1977 However reflection on one s thoughts requires knowing what those thoughts are in the first place So if ignorance is the norm why attempt self reflection The activity would just display naivety about psychology Yet while respecting all the data this book argues that remarkably we are sometimes infallible in our self discerning judgments Even so infallibility does not imply indubitability and there is no Cartesian ambition to provide a foundation for empirical knowledge The point is rather to explain how self reflection as a rational activity is possible

Delusions and Beliefs Kengo Miyazono,2018-12-07 What sort of mental state is a delusion What causes delusions Why are delusions pathological This book examines these questions which are normally considered separately in a much needed exploration of an important and fascinating topic Kengo Miyazono assesses the philosophical psychological and psychiatric literature on delusions to argue that delusions are malfunctioning beliefs Delusions belong to the same category as beliefs but unlike healthy irrational beliefs fail to play the function of beliefs Delusions and Beliefs A Philosophical Inquiry will be of great interest to students of philosophy of mind and psychology and philosophy of mental disorder as well as those in related fields such as mental health and psychiatry

Current Approaches to Metaphor Analysis in Discourse Ignasi Navarro i Ferrando,2019-09-02 This volume takes up the challenge of surveying the present state of a variety of approaches to the identification analysis and interpretation of metaphor across communication channels situational contexts genres and social spheres It reflects three foremost trends of present metaphor research namely the communicative approach the cognitive modelling approach and the multimodality approach These trends are considered as areas of research emerging on the ground of the Conceptual Metaphor Theory initiated by Lakoff The book intends to show their concomitances as well as mark their diversifying paths The aim is to bring about and make apparent the many connections among assumingly different trends stemming from CMT Whereas discrepancies between communicative and conceptual perspectives might seem irredeemable the book emphasizes and claims that the background framework of CMT provides a solid foundation for collaboration and mutual influence Consequently the analysis of metaphor usage in context may provide insights for cognitive modelling proposals The analysis of cognitive configuration of conceptual domains may in turn

illuminate our understanding of communicative decisions in discourse The integration of multimodal metaphor analysis puts forward the idea that diverse modal manifestations of metaphor reveal the symbiosis between communicative and cognitive stances The various subject areas and methodologies illuminate the scene of current research in the field The poignant contributions open far reaching avenues into the realm of human thought and discourse **Philosophy of Language**

Susana Nuccetelli, Gary Seay, 2007-12-24 This collection of classic and contemporary essays in philosophy of language offers a concise introduction to the field for students in graduate and upper division undergraduate courses It contains some of the most important basic sources in philosophy of language including a number of classic essays by philosophers such as Frege Russell Wittgenstein Kripke Grice Davidson Strawson Austin and Putnam as well as more recent contributions by scholars including John McDowell Stephen Neale Ruth Millikan Stephen Schiffer Paul Horwich and Anthony Brueckner among others who are on the leading edge of innovation in this increasingly influential area of philosophy The result is a lively mix of readings together with the editors discussions of the material which provides a rigorous introduction to the subject

Metaethical Issues in Contemporary Legal Philosophy Stefano Berteau, Jorge Silva Sampaio, 2024-12-31 This volume explores the importance of constitutivism for legal studies Constitutivism is the view that the normative force or authority of practical reasons is grounded in principles capacities aims or functions that are essential to and thus constitutive of agency While the implications that the constitutivist approach has on the fundamental metaethical disputes and central ethical debates have been extensively explored the literature on the relations between constitutivism and law remains scarce unsystematic and sporadic This collection brings together world renowned practical philosophers and legal theorists to fill a noticeable gap in the literature The authors systematically and innovatively address key dimensions of the relationships between constitutivism and the theoretical study of law as well as programmatically offering novel insights into the conceptual connections between constitutivist claims fundamental legal concepts and practices legal issues and ultimately the law as a distinctive concept The book will be of interest to academics and researchers working in the areas of Legal Philosophy Legal Theory Jurisprudence Moral Philosophy and Metaethics *Social Functions in Philosophy* Rebekka Hufendiek, Daniel James, Raphael van Riel, 2020-03-09 Social functions and functional explanations play a prominent role not only in our everyday reasoning but also in classical as well as contemporary social theory and empirical social research This volume explores metaphysical normative and methodological perspectives on social functions and functional explanations in the social sciences It aims to push the philosophical debate on social functions forward along new investigative lines by including up to date discussions of the metaphysics of social functions questions concerning the nature of functional explanations within the social domain and various applications of functionalist theorising As such this is one of the first collections to exclusively address a variety of philosophical questions concerning the nature and relevance of social functions
