Disentangled R. France, 2023-09-14 *The Definitive Study and Solution to the Centuries old Mystery of the World's Most Sighted Sea Serpent* There is a long history of conflating sightings of unidentified marine objects UMOs as purported sea serpents Most sightings are either of an extremely brief duration or made by a single observer and thus often easy to dismiss This is not the case however with respect to the so called Gloucester Sea Serpent which frequented the Massachusetts and New York coasts during the early nineteenth century Witnessed by hundreds of people for extended periods repeatedly over many days the Gloucester UMO is the most sighted sea serpent in history As well due to being the object of study at the time and shortly thereafter by naturalists the mysterious creature remains the most thoroughly

investigated of all putative sea serpents For these reasons it has achieved an exalted status among cryptozoologists who maintain it represents the best evidence for the existence of sea serpents For the first time an eminently qualified aquatic biologist and ethnozoologist presents the definitive history of the phenomena and carefully examines the evidence It is concluded that the most parsimonious explanation behind the Gloucester Sea Serpent is as early evidence for what is today recognized as being one of the most serious threats to marine biodiversity entanglement in fishing gear and other maritime debris Therefore although widely considered to be restricted to the advent and widespread use of non degradable plastic in the middle of the twentieth century this new interpretation of the Gloucester UMO suggests that entanglement has a much longer environmental history than is commonly believed Robert L France is a world renowned scientist at Dalhousie University and the author or editor of twenty books and two hundred papers on a wide range of environmental subjects He has undertaken conservation biology research from the High Arctic to the tropics on organisms from bacteria to whales which has been cited many thousands of times in the literature Dr France is a leading authority on many aspects of aquatic zoology including marine ecology and ethnozoology and may be the most qualified person to have recently undertaken research and published peer reviewed articles on the beguiling and befuddling topic of aquatic mystery animals known as cryptids

The Urban Whale Scott D. Kraus, Rosalind M. Rolland, 2009-01-01 In 1980 a group of scientists censusing marine mammals in the Bay of Fundy was astonished at the sight of 25 right whales It was one scientist later recalled like finding a brontosaurus in the backyard Until that time scientists believed the North Atlantic right whale was extinct or nearly so The sightings electrified the research community spurring a quarter century of exploration which is documented here The authors present our current knowledge about the biology and plight of right whales including their reproduction feeding genetics and endocrinology as well as fatal run ins with ships and fishing gear Employing individual identifications acoustics and population models Scott Kraus Rosalind Rolland and their colleagues present a vivid history of this animal from a once commercially hunted commodity to today's life threatening challenges of urban waters Hunted for nearly a millennium right whales are now being killed by the ocean commerce that supports our modern way of life This book offers hope for the eventual salvation of this great whale

The Beach in Anglophone Literatures and Cultures Prof Dr Virginia Richter, Dr Ursula Kluwick, 2015-06-28 Conceptualising the beach as a creative trope and as a socio cultural site this collection examines its multiplicity of meanings and functions as a natural environment engendering both desire and fear in the human imagination from the Victorian period to the present The contributors examine literature film and art as well as moments of encounter and environmental crisis highlighting the beach

as a social space and vacationscape as a geographical frontier between land and water and as an historical site of contact and conflict     The Sandbar ,     *Coastal and Ocean Law* Joseph J. Kalo,2007 This new edition has been significantly revised and materials updated throughout New material will include New chapter devoted to current important state coastal management issues such as preserving traditional coastal uses and using aesthetic considerations in evaluating permit requests New materials on the impact of beach nourishment projects on public and private rights Latest Supreme Court pronouncement on Wetlands the Rapanos case and expanded NEPA coverage Discussion on the 2006 revised consistency regulations Incorporation of statutory changes and ocean program initiatives contained in the federal Energy Policy Act of 2005 Consideration of the effectiveness of the 1996 Sustainable Fisheries Act and highlights the growing challenge of allocating fishing privileges for fish stocks Completely revised Marine Mammals and Endangered Marine Wildlife chapter and includes the precedent setting decision enjoining the U S Navy s deployment of active sonar systems that may sig

*Sex in Cetaceans* Bernd Würsig,Dara N. Orbach,2023-09-25 *Sex in Cetaceans* provides an up to date review of multifaceted aspects related to mating and reproduction in toothed and baleen whales This open access book begins with discussions of sexual selection and anatomical traits related to mating and diversity between the sexes The functions of non conceptive copulations are reviewed as are different research techniques applied to explore sex in cetaceans Authors and editors build knowledge of female and male social mating and parental strategies and tactics for several specific toothed dolphin porpoise whale species and baleen whale species It concludes with a discussion of potential conservation efforts and ways to help especially beleaguered species and populations the world over The volume is intended as a major primer of cetacean sex for undergraduate and graduate students new and established researchers in the field and the public wishing to learn more     Underwater Naturalist ,2004     *North Atlantic Right Whales* David W. Laist,2017-03-29 The fascinating story of North Atlantic right whales from their evolutionary origin through a thousand year history of relentless pursuit by whalers to ongoing efforts to rescue them from the brink of extinction In the cold waters of the unforgiving North Atlantic Ocean some of the heartiest humans of medieval days ventured out in search of whales Through the centuries people on both sides of the Atlantic became increasingly dependent on whale oil and other cetacean products To meet this growing demand whaling became ever more sophisticated and intense leading to the collapse of what was once a seemingly inexhaustible supply of large cetaceans Central to the whale s subsequent struggle for existence has been one species the North Atlantic right whale Conservationist David W Laist now provides the first complete history of the North Atlantic right whale from its earliest encounters with humans to its close brush with extinction to its currently precarious yet hopeful status as a conservation icon Favored by whalers because of their high yields of oil and superior baleen these giants became known as the right whale to hunt and their numbers dwindled to a mere 100 individuals worldwide Their dire status encouraged the adoption of a ban on hunting and a treaty that formed the International Whaling Commission Recovery of the species

however has proven elusive Ship strikes and entanglement in commercial fishing gear have hampered herculean efforts to restore the population Today only about 500 right whales live along the US and Canadian Atlantic coasts an improvement from the early twentieth century but still a far cry from the thousands that once graced Atlantic waters Laist's masterpiece features an incredible collection of photographs and artwork that give life to the fascinating history that unfolds in its pages The result is a single volume that offers a comprehensive understanding of North Atlantic right whales the role they played in the many cultures that hunted them and our modern attempts to help them recover *20-ton Canaries*, 2009 **Choice**, 2005 American Studies Association American Studies Association.
