**Enterprise and Labour**, 1996      **Labour and Enterprise** Peter Mathias, John Davis, 1996-07-10 The book brings together a number of different approaches and the topics covered vary in theme and scope including broad general surveys for example of the historical debate on the early factory masters and of the principal trends in post war industrial relations in Europe and more specialist case studies The contributors include labour social and economic historians and the geographical spread ranges from Europe to the USA and Japan While each of the chapters covers major new themes the volume s originality lies in examining the theme of industrial relations in ways that invite broader comparative thinking

**Companion to Historiography** Michael Bentley, 2006-02-27 This Companion presents a clear thematic overview of historiography explored through a series of stimulating and wide ranging articles Compiled by experts in the field the Companion is fully indexed for ease of access      **The Foundations of Female Entrepreneurship** Alison Kay, 2012-08-21 The Foundations of Female Entrepreneurship explores the relationship between home household headship and enterprise in Victorian London It examines the notions of duty honor and suitability in how women s ventures are represented by themselves and others and engages in a comparison of the interpretation of historical female entrepreneurship by contemporaries and historians in the UK Europe and America It argues that just as women in business have often been hidden by men they have often also been hidden by the home and the conceptualization of separate spheres of public and private agency and of the entrepreneur Drawing on contextual evidence from 1747 to 1880 including fire insurance records directories trade cards newspapers memoirs the census and extensive record linkage this study concentrates on the early to mid Victorian period when ideals about gender roles and appropriate work for women were vigorously debated Alison Kay offers new insight into the motivations of the Victorian women who opted to pursue enterprises of their own By engaging in empirical comparisons with men s business it also reveals similarities and differences with the small to medium sized ventures of male business proprietors The link between home and enterprise is then further excavated by detailed record linkage revealing the households and domestic circumstances and responsibilities of female proprietors Using both discourse and data to connect enterprise proprietor and household The Foundations of Female Entrepreneurship provides a multi dimensional picture of the Victorian female proprietor and moves beyond the stereotypes It argues that active business did not exclude women although careful representation was vital and this has obscured the similarities of their businesses with those of many male business proprietors      **From Family Firms to Corporate Capitalism** Kristine Bruland, Patrick O'Brien, 1998 What explains the growth of a business and more broadly the development or decline of a whole economy What role do particular entrepreneurs or indeed a culture of entrepreneurship play Does the evidence suggest that a particular structure or organizational form was or should be adopted to ensure best practice and commercial success These fundamental questions have long pre occupied business and economic historians With the current expansion of business and

management education and training the investigations and findings of the historian may have wider significance and relevance This volume has been stimulated by the work of Peter Mathias one of the leading figures in this field in the post war period Here a number of his former students many now internationally distinguished historians pay tribute in a book that explores the move from family firms to corporate capitalism In a series of chapters they explore at the level of the firm the myriad of micro decisions that ultimately help to explain the overall performance of industries sectors and national economies as they evolve through time The contributors argue that sustained growth has never been a matter of a few spectacular technical breakthroughs Instead it rests on subtle economic and social transformations in cultures in economic organizations and in the roles of science and technology

**Work and Labor in Early America** Stephen Innes, 2013-04-01 Ten leading scholars of early American social history here examine the nature of work and labor in America from 1614 to 1820 The authors scrutinize work diaries private and public records and travelers accounts Subjects include farmers farmwives urban laborers plantation slave workers midwives and sailors locales range from Maine to the Caribbean and the high seas These essays recover the regimen that consumed the waking hours of most adults in the New World defined their economic lives and shaped their larger existence Focusing on individuals as well as groups the authors emphasize the choices that over time might lead to prosperity or to the poorhouse Few people enjoyed sinecures and every day brought new risks Stephen Innes introduces the collection by elucidating the prophetic vision of Captain John Smith that the New World offered abundant reward for one's own industry Several motifs stand out in the essays Family labor has begun to assume greater prominence both as a collective work unit and as a collective economic unit whose members worked independently Of growing interest to contemporary scholars is the role of family size and sex ratio in determining economic decision and vice versa Work patterns appear to have been driven by the goal of creating surplus production for markets perhaps because of a desire for higher consumption work patterns began to intensify throughout the eighteenth century and led to longer work days with fewer slack periods Overall labor relations showed no consistent evolution but remained fluid and flexible in the face of changing market demands in highly diverse environments The authors

address as well the larger questions of American development and indicate the directions that research in this expanding field might follow
