Enterprise Restructuring And Unemployment In Models Of Transition:

Enterprise Restructuring and Unemployment in Models of Transition Simon Commander, 1998-01-01 This volume is primarily concerned with the first key component of transition restructuring the changing behavior of firms and their complex interaction with the labor market most particularly with unemployment Chapter 1 gives an overview of firm behavior restructuring and the labor market in the transition Chapter 2 focuses on the effect of output ownership and legal form on employment and wages in Central European firms Chapter 3 explores employment and wage setting in three stages of Hungary's labor market transition Chapter 4 considers enterprises in the Polish transition Chapter 5 explains labor market flows in the midst of structural change Chapter 6 explores the role of unemployment and restructuring in the transition and chapter 7 presents a numerical model of transition Emphasis is placed on the Czech and Slovak Republics Bulgaria Hungary Poland and Russia *Enterprise Restructuring and Unemployment in Models of Transition* Banco Mundial, 1996

Transition, Recession and Labour Supply Paolo Verme, 2020-11-25 This title was first published in 2001 Exploring the relationship between the recession and labour supply in Kazakhstan during the 1990s this volume develops an innovative new model of the transitional process in the context of the CIS It departs from conventional economic models explaining the process of transition transferring the focus of attention from labour demand to labour supply with a view to clarifying how the transitional recession has affected households and in turn how these changes modified the supply of labour Paolo Verme examines how the dynamic of the reallocation of labour between state and private enterprises has been drastically altered by the growth of self employment and also takes a much needed look at the contribution of other factors offering an original explanation of this most important economic phenomenon **IMF Staff papers, Volume 45 No. 2** International Monetary Fund. Research Dept., 1998-01-01 This paper analyzes contagion and volatility with imperfect credit markets The paper interprets contagion effects as an increase in the volatility of shocks impinging on the economy The implications of this approach are analyzed in a model in which domestic banks borrow at a premium on world capital markets and domestic producers borrow at a premium from domestic banks Financial spreads depend on a markup that compensates lenders in particular for the expected cost of contract enforcement Higher volatility increases financial spreads and the producers cost of capital Transition Economics Peter Luke, 2012-07-26 Celebrating twenty years of transition from socialism to capitalism this book is designed to be the core textbook for undergraduate courses in transition economics and comparative economic systems Given the passage of time *Transition Economics Two Decades On* reviews and accounts for the outcomes in the so called transition economies and from an academic perspective takes the reader through developments and issues in the twenty years of transition from plan to market Treating its subject matter thematically the book incorporates much of the transition economics literature and evidence that have evolved over the past two decades In particular the authors focus on the most important aspects of economic transition including The initial conditions at the outset of transition Paradigms and

patterns of transition The main transition policies and economic reforms The performance of transition countries and firms The lessons from transition The textbook covers a wide range of both contemporary microeconomic and macroeconomic issues in over thirty ex socialist European and Asian countries including Russia and China Transition Economics Two Decades On is more than just a book about a particular part of the world or the transformation that was experienced at a particular time in history The authors believe that the study of the economics of transition gives the reader an insight into theories policies reforms legacies institutions processes and lessons that have application and relevance beyond the specific transition from plan to market to other parts of the world and to other times in history *Entrepreneurship and Economic Transition in Central Europe* Jean-Paul Larçon, 2012-12-06 Since the fall of the Berlin Wall in 1989 Central European economies have been moving rapidly toward a common set of goals political democracy market oriented economies and integration into the European and international business community For businesses Central Europe offers a unique window of opportunity and in particular two comparative advantages a low cost qualified workforce and stronger growth rates than mature Western European economies This opportunity seized by local entrepreneurs and foreign enterprises alike is a significant competitive threat to companies not present in the region or who have not found alternative strategies for increased growth and competitiveness This book addresses economic transitions in Central Europe and analyzes the problems of Central European integration in the European Union **The World Bank Research Observer**, 2004

Emerging from Communism Peter Boone, Stanislaw Gomulka, Richard Layard, 1998 This text addresses issues concerned with the fall of or decline in communism in Eastern Europe and China comparing the different countries performance in inflation privatization enterprise restructuring banking reform and labour market policy and the role of decentralization Rapid Labor Reallocation with a Stagnant Unemployment Pool Jan Rutkowski, 2003 **China's State Enterprise Reform** John Hassard, Jackie Sheehan, Meixiang Zhou, Jane Terpstra-Tong, Jonathan Morris, 2007-06-11 Based on extensive original research this book provides a comprehensive overview of the current status of state enterprise reform in China Chinese State Enterprise Reform considers the relationship between public ownership and public enterprises and the historical evolution of China's economic reform programme since 1978 including assessments of the Contrast Responsibility System which operated from the early 1980s to the early 1990s and the Group Company Experiments which began in the 1990s It discusses the relations between workers managers and the state in post Dengist China the implications of the reform programme for human resources management in state enterprises the nature of labour representation and organization under state capitalism and the problems of surplus labour and reemployment **The European Labour Market** Floro Ernesto Caroleo, Sergio Destefanis, 2006-06-15 This book brings together up to date findings on the regional dimensions of European labour markets It provides a conceptual and empirical study of the interactions between the European economy and its regions paying particular attention to the issue of the transition of Central and Eastern European

countries to a market economy The topics analysed include the structure of the shocks affecting employment regional industrial national the relationships between labour market efficiency and the regional distribution of unemployment wage flexibility in EU member countries or in their regions and the role of active labour market policies in affecting the regional distribution of employment and unemployment **Annual World Bank Conference on Development Economics** ,1998

Economic Policy Issues for the Next Decade Karl Aiginger,G. Hutschenreiter,2013-03-09 There are several reasons why it has become important to rethink economic policy Out of the European perspective it is the new currency the enlargement towards Central and Eastern European countries the sluggish growth and the end of productivity convergence towards the USA and the insufficient creation of employment From the transatlantic perspective increasing differences in the economic policy and the potential rise of conflicts between Europe and the USA for example in trade competition and health issues are important The current volume touches most but not all of these topics It starts with the overview by Joseph Stiglitz on policy issues Then macroeconomics policy is discussed followed by the problem of an ageing society and European enlargement Differences between Europe and the USA are large in taxation and in the role of public finance The relative competitiveness of countries as well as of Europe will be decided by investments into new technologies and progression towards the Science Based Economy In the final section the role of economists in shaping the economic agenda and giving policy advice is discussed *Estonia, the New EU Economy* Helena Hannula,Slavo Radošević,G. N. Von Tunzelmann,2006 Estonia is regarded by many as one of the most hopeful cases for the integration of eastern Europe into the enlarged European Union It provides positive examples of how the integration process can be well handled but at the same time some of the contentious issues this can give rise to This book assesses the tensions involved in the development of the Estonian economy in terms of growth convergence financial development labour reallocation structural and organizational change and the role of foreign companies and international networks The analysis of Estonia is placed within a broader context and among a wider set of nations and thus aims at understanding the potential for growth and structural change in the eastern part of the enlarged EU In these and related fields the book seeks to draw lessons from Estonia for other new and indeed future EU accession countries *Development Centre Seminars Different Paths to a Market Economy: China and European Economies in Transition* Centre d'Etudes Prospectives et d'Informations Internationales,Centre for Economic Policy Research,OECD,1998-09-06 The similarities and differences between the transition experiences of the Central European countries and the People s Republic of China are often wrongly taken as alternative approaches to the same problem In reality there is great complexity *Resetting Price Controls for Privatized Utilities* Richard Green,Martin Rodriguez Pardina,1999 QUOTEThe aim of regulation is to protect consumers while ensuring that the company remains viable and has an incentive to operate efficiently QUOTEIn many developing countries private companies are replacing government agencies as owners and operators of infrastructure services Governments must now develop new skills in economic

regulation of these private providers to protect consumer interests while also ensuring that the companies remain economically and financially sound and have incentives to operate efficiently This manual provides new economic regulators with practical guidance on how to proceed in this fairly technical new field Chapters cover Revising Price Controls Procedures for Resetting a Price Control Present Value Calculations Investment and the Regulatory Asset Base The Rate of Return The Philosophy of Price Controls The Form of a Price Control Operating Costs Revenues Privatization and Regulation of Transport Infrastructure Antonio Estache, Ginés de Rus, 2000-01-01 The 1990s saw an increase in the liberalisation of transport policies and a strengthening of the role of private operators and investors in transport infrastructure worldwide The search for sustained improvement in efficiency is probably secondary to the need to find additional financing but it is improvement in services that is at the core of the new role of the government in transport Governments must now become fair economic regulators of many of the privately operated transport services and infrastructures This book examines the major challenges that governments are likely to face in taking on their new role in transport The Governance of Privatization Funds Saul Estrin, Marko Simoneti, Andreja B"hm, 1999-01-01 Privatization investment funds are the key feature of mass privatization programmes in transitional economies This book offers a thorough survey of mass privatization programmes in the Czech Republic Poland and Slovenia supported with extensive empirical analysis The study of top down privatization funds in Poland and bottom up funds in the Czech Republic and Slovenia offers different solutions to the problem of how to improve the governance of privatization funds *Historical Dictionary of the World Bank* Sarah Tenney, Anne C. Salda, 2013-10-30 When it was founded back in 1944 no one could possibly have foreseen how the World Bank known more formally as the International Bank for Reconstruction and Development IBRD would flourish Today with 188 members it is by far the largest lender for projects in agriculture health infrastructure and many other fields in developing countries around the world with a budget of billions of dollars and a staff of more than 9 000 and its advice is usually heeded by both the developing countries which borrow from it and the advanced ones which contribute This second edition of the Historical Dictionary of the World Bank shows the substantial progress the Bank has made this mainly through the dictionary section with concise entries on its component institutions related organizations its achievements in various fields some of the major projects and member countries and its various presidents The introduction explains how the Bank works while the chronology traces the major events over nearly 70 years Meanwhile the list of acronyms reminds us just who the main players are And the bibliography directs readers to useful internal documentation and outside studies *Reconstituting the Market* Paul Hare, Judy Batt, 2005-08-12 Reconstituting the Market details many transition economies some already well known others enjoying very little attention from researchers and a range of important issues to do with state building and its links with microeconomic transformation The book was based on the authors view that transition in the new states would be fundamentally more difficult than in more established states a view which turned out to

be incorrect since in all the transition countries the former communist state had to be largely rebuilt as part of the complex process of constructing a market economy Aspects of this process focusing on competition policy privatization and the regulation of public utilities are examined in respect to Central Europe the Baltics Russia Ukraine and Moldova The result is essential reading for anyone seeking an up to date account of key transition issues covering both familiar and unfamiliar countries
