Environmental Catastrophe Bridey Heing,2019-12-15 Unlike natural disasters which happen because of the earth s natural geological processes environmental catastrophes are devastating events that

occur due to humanity's impact on the environment. These can include nuclear bombings, oil spills, and more recently the extreme weather events brought about by climate change: wildfires, heat waves, flooding, droughts, and numerous other catastrophic scenarios manifest as a result. Use this volume to inform and alert your readers about this essential topic. With the global impact of environmental catastrophes becoming increasingly pronounced, scientists and politicians alike question what the best course of action may be to slow or even reverse the devastation. With this book, readers will form intelligent opinions that can help shape future action about necessary solutions.

**Climate Change Research at Universities** Walter Leal Filho, 2017-06-02. This unique book provides a multidisciplinary review of current climate change research projects at universities around the globe, offering perspectives from all of the natural and social sciences. Numerous universities worldwide pursue state-of-the-art research on climate change, focussing on mitigation of its effects as well as human adaptation to it. However, the 2015 Paris 21st Conference of the Parties of the United Nations Framework Convention on Climate Change (UNFCCC COP 21) demonstrated that there is still much room for improvement in the role played by universities in international negotiations and decision making on climate change. To date, few scientific meetings have provided multidisciplinary perspectives on climate change in which researchers across the natural and social sciences could come together to exchange research findings and discuss methods relating to climate change mitigation and adaptation studies. As a result, the published literature has also lacked a broad perspective. This book fills that gap and is of interest to all researchers and policy makers concerned with global climate change regardless of their area of expertise.

**Constructing Blue Collar Leaders in a White Collar World** LaMar Herndon, 2018-03-06. In *Constructing Blue Collar Leaders in a White Collar World*, Dr. LaMar Herndon considers a group of leaders often overlooked and occasionally denigrated: the bivocational pastor. *Constructing Blue Collar Leaders in a White Collar World* integrates important theoretical leadership concepts with spiritual and practical realities. Dr. Herndon explores important topics such as trends and issues facing the global church and its leaders, leadership models, values and ethics, character and integrity, cultural effects, creativity and innovation, reverse mentoring, and strategic planning. This book is a profoundly honest, hands-on guide to what constitutes a true leader serving as a bivocational minister. Dr. Gary Oster, Regent University School of Business, whether bivocational or not. Rev. Jewel D. Williams, M.R.E. Church of God, Anderson, IN. Author of *Fearfully and Wonderfully Made*, *Living our Theology*, and *The Path of a Preacher*.
