Sustainable Design for Uncertain Futures Joshua D. Lee, Joseph Murray, 2025-07-29 Explore pivotal intersections and themes between strategies for buildings and cities to adapt to shifting circumstances *Sustainable Design for Uncertain Futures* introduces fourteen time based strategies in architecture through a series of dialogues between experts This format embraces a dynamic exploration of strategies ranging from Adaptive Reuse to Bio Design revealing how each one addresses forces of change and adds adaptive capacity to the built environment The book s structure invites readers to engage with these strategies on multiple levels Each chapter begins with a framing of the fundamentals providing context and key examples to situate the strategies in the wider field At the core of each chapter is a moderated dialogue that offers key insights into how these strategies work in practice and how they can be used in combination By presenting these strategies through dialogue the editors demonstrate the collaborative thinking needed to address growing uncertainty in the built environment and provide readers with an actionable framework of technical and management approaches The book s practical focus helps bridge the gap between theory and application making this edited volume an invaluable resource for both academics and practitioners Readers will find dialogues involving fifteen renowned experts in their respective fields Avi Friedman Naomi Keena Mass Customization Michael Fox Computationally Responsive Environments Bie Plevoets Adaptive Reuse John Dale Open Building Aki Ishida Metabolism Michelle Laboy Persistence Felix Heisel Circular Construction Jenni Minner Preservation Kim Trogal Repair Brad Guy Design for Disassembly Adaptability Sarah Wigglesworth Inclusive Design Irena Bauman Resilience Doris Sung Smart Materials Mitchell Joachim Bio Design *Sustainable Design for Uncertain Futures* presents The fundamentals of each strategy along with a short summary of each with its affordances and challenges and a few key examples The editors theory of primary time signatures enabling readers to see and plan the combination of different time based strategies to increase building lifecycle coverage for adaptive capacity Critical insights from thought leaders across a wide spectrum of approaches to sustainability Academics practitioners and others interested in change in the built environment can use the strategies discussed in *Sustainable Design for Uncertain Futures* to develop architectural solutions that accommodate climate change shifting demographics new live work patterns and many other uncertainties

Sustainable Architectures Simon Guy, Steven A. Moore, 2005 As buildings are responsible for fifty per cent of CO2 emissions their design has become the focus of intense technical scrutiny Knowing how to build more technically efficient or ecologically responsible buildings and being able to assemble the social resources to do so requires different forms of knowledge and practice There is wide contestation over the optimal pathways to greener buildings design and great diversity in practices of sustainable architecture This volume brings together leading researchers from across the European Union and North America both to illustrate the diversity of practice and to provide a critical commentary on this key debate The reader is provided with an introduction to competing perspectives on the sustainable architecture debate international exemplars of

differing practice and an overview of new theoretical and methodological resources for understanding and meeting the conceptual social and technical challenges of sustainable architecture

EDRA; Proceedings of the Annual Environmental Design Research Association Conference Environmental Design Research Association, 2007 *Urban Futures* Mark Burry, 2020-09-01 Given the rapid evolution of concepts such as smart cities who are the architects riding the wave of new possibilities for urban design How do contemporary agencies find pathways to understand the challenges and opportunities presented by evolving urban technology and how does architecture engage with the expanding pool of associated disciplines How should schools of architecture and urban design engage with radical digitalised urbanism This issue of AD claims that this is contested territory The two dimensionality of planners urban construct is as limited as engineers predilection to zero in and solve problems Urban Futures contends that society needs a much broader professional brush than has been applied in the past interdisciplinary urban design professionals who can reach across the philosophy and mundanity of urban existence with a creative eye The issue identifies a selection of internally resourceful visionaries who combine sociology geography logistics and systems theory with the practical realities and challenges of mobility sustainable materials food water and energy supply and waste disposal Crucially they seek to ensure better urban futures and a civil and convivial urban experience for all city dwellers Contributors Refik Anadol Philip Belesky Shajay Bhooshan Jane Burry and Marcus White Thomas Daniell Vicente Guallart Shan He Wanyu He Dan Hill Justyna Karakiewicz Tom Kvan Areti Markopoulou Ed Parham Carlo Ratti Ferran Sagarra and Bige Tun er Featured architects Arup Digital Studio Guallart Architects Space10 Space Syntax UNStudio and XKool Technology
