## **Environmental Management In The Soviet Union And Yugoslavia Structure And:**

Environmental Management in the Soviet Union and Yugoslavia Barbara Jancar-Webster, 1987 Karl W. Ryavec, 2005

This unique study provides an original nitty gritty view of the true nature and operation of Russia's state bureaucracy from the imperial period to the present including the Putin presidency The only book length exploration of the problems and deficiencies of Russian bureaucracy since tsarist times this detailed work sheds important new light on Russian public administration an often overlooked but key barrier to Russian normalization and democratization **Environmental**

**Problems in East-Central Europe** Frank Carter, David Turnock, 2002-09-26 In this new edition the progress made in the last decade to solve the environmental problems described in the first edition is assessed The attempts to bring environmental legislation into line with West European norms is also described Environmental Problems of East Central Europe looks at air and water pollution modern farming water supplies waste management and landscape protection These topics are placed within economic social and political profiles as spending on a clean environment must be reconciled with welfare spending and the safeguarding of jobs European Union assistance civil society and the work of environmental NGOs are also discussed All of these matters are considered within the context of the wider geographical area and then by each individual country including the previously communist states lying to the west of the Soviet Union now with the former federal states of Czechoslovakia and Yugoslavia broken up into seven different entities and a review of the former Soviet Union with particular reference to the Baltic States Environmental Problems in East Central Europe provides a wealth of up to date reference material with a vast amount of supporting literature on environmental conditions and the functioning of civil society and a map of each country The environment is being taken seriously by them all such is the influence of the Rio sustainability agenda in general and the EU environmental acquis in particular The book reveals that Eastern Europe is not a blighted area but in some respects has a higher biodiversity than Western Europe Although there is enormous waste and inefficiency in energy use people actually consume relatively little and the East therefore has some lessons for the West in terms of managing on the basis of fair share of the earth's resources **A Companion to Global Environmental History**

J. R. McNeill, Erin Stewart Mauldin, 2025-02-06 A COMPANION TO GLOBAL ENVIRONMENTAL HISTORY Equips both specialists and newcomers with the historical intellectual and political context for engagement with the environment Providing multiple points of entry into a dynamic fast growing field A Companion to Global Environmental History explores the many contours of the relationship between human societies and the natural world on which they depend Bringing together essays by an international roster of both established experts and emerging scholars this volume covers a uniquely broad range of temporal geographic thematic and contextual approaches to the practice of global environmental history Thirty three detailed chapters describe how the relationship between society and nature has changed over time examine the various drivers of change and environmental transformations survey different types of environmental thought and action

around the world and more Now in its second edition the Companion is fully revised to reflect major research developments and new trajectories within the field Updated chapters that present new evidence for longstanding debates and innovative applications of environmental history are accompanied by six entirely new chapters on India China Africa early modern cities global environmental governance and European environmentalism Offering fresh insights into environmental thought culture policy and politics A Companion to Global Environmental History Second Edition is an ideal textbook for undergraduate and graduate students and an invaluable reference for scholars researchers and environmental historians *Environmental Politics in the International Arena* Sheldon Kamieniecki,1993-09-14 Examines the dominant ethics attitudes and moral values behind the international environmental movement and analyzes how it has influenced national policies around the world Researchers from a number of fields contribute 12 articles on particular environmental movements the green parties in Europe international organizations and law and comparative politics and public policy Annotation copyright by Book News Inc Portland OR *Environmental Action in Eastern Europe* Barbara Jancar-Webster,2016-09-16 The environmental crisis in Eastern Europe air and water pollution toxic waste dumps and unsafe nuclear facilities has been vividly documented since the revolution of 1989 Not only did the communist states have an abysmal record of environmental destruction but the issue of environmental protection and safety proved to be one of the most powerful catalysts of unified opposition to these regimes This collection of essays by both Western and East European experts examines the efforts to develop strategies for dealing with the crisis both by governments and at the grassroots level of newly emerging Green movements Among the countries represented here are Poland Hungary Czechoslovakia Lithuania Slovenia and the Commonwealth of Independent States

**Technology and the Environment in State-Socialist Hungary** Viktor Pál,2017-09-15 This book explains how and why the state socialist regime in Hungary used technology and propaganda to foster industrialization and the conservation of natural resources simultaneously Further this book explains why this process was ultimately a failure By exploring the environmental pre history of communist Hungary before analyzing the economic development of the Kádár regime Pál investigates how economic and environmental policies and technology transfer were negotiated between the official communist ideology and the global economic reality of capitalist markets Pál argues that the modernization project of the Kádár regime 1956-1990 facilitated ecological consciousness at both an individual and societal level which provoked great social unrest when positive environmental impact was not achieved Today global issues of climate change urban pollution resource depletion and overpopulation transcend political systems but economic and environmental discourses varied greatly in the twentieth century This volume is important reading for all those interested in economic and environmental history as well as political science *Global Environmental Change and International Relations* Malory Greene,Ian Rowlands,2016-07-27 Climate change and depletion of the ozone layer are two examples of dramatic changes in the Earth's natural environment which raise new questions in international relations The nine chapters in this book explore some of the theoretical and policy

problems that are posed by global environmental change The variety of perspectives employed international relations theory international political economy international law strategic studies North South issues and Eastern Europe illustrates the complexity of the issues involved Socialist States and the Environment Salvatore Engel-Di Mauro,2021-07-20 More than thirty years after the collapse of the USSR the critique of state socialism is still used to deny alternatives to capitalism irrespective of global capitalist ecological and social devastation There is seemingly nothing worthwhile salvaging from decades of state socialist experiences As the climate crisis deepens Engel Di Mauro argues that we need to re evaluate the environmental practices and policies of state socialism especially as they had more environmentally beneficial than destructive effects Rather than dismissing state socialism s heritage out of hand we should reclaim it for contemporary eco socialist ends By means of a comparative and multiple scaled approach Engel Di Mauro points to highly diverse and environmentally constructive state socialist experiences Taking the reader from the USSR to China and Cuba this is a fiery and contentious look at what worked what didn t and how we can move towards an eco socialist future *The Environment and World History* Edmund Burke III,Kenneth Pomeranz,2009-04-08 Since around 1500 C E humans have shaped the global environment in ways that were previously unimaginable Bringing together leading environmental historians and world historians this book offers an overview of global environmental history throughout this remarkable 500 year period In eleven essays the contributors examine the connections between environmental change and other major topics of early modern and modern world history population growth commercialization imperialism industrialization the fossil fuel revolution and more Rather than attributing environmental change largely to European science technology and capitalism the essays illuminate a series of culturally distinctive yet often parallel developments arising in many parts of the world leading to intensified exploitation of land and water The wide range of regional studies including some in Russia China the Middle East India Southeast Asia Latin America Southern Africa and Western Europe together with the book s broader thematic essays makes *The Environment and World History* ideal for courses that seek to incorporate the environment and environmental change more fully into a truly integrative understanding of world history CONTRIBUTORS Michael Adas William Beinart Edmund Burke III Mark Cioc Kenneth Pomeranz Mahesh Rangarajan John F Richards Lise Sedrez Douglas R Weiner

**Environmental Problems in Eastern Europe** Francis W. Carter,David Turnock,1996 Providing a comprehensive descriptive analysis of a wide range of Central and East European countries this updated paperback edition offers an invaluable study of pollution problems and effects on the quality of life Revisions include new chapter on Slovakia demonstrating the implementation of a number of practical measures which have made a considerable impact on environmental problems that arose under communism and have been tackled during the transition new concluding chapter which provides an important overview of recent developments in Eastern Europe and discusses topical issues such as health hazards and methods of charging polluters for environmental damage **EU Enlargement and the Environment** JoAnn

Carmin, Stacy D. VanDeveer, 2023-05-31 This volume focuses attention on key environmental and institutional changes associated with eastern expansion of the European Union assessing and challenging prevailing views about the outcomes and processes of this historic development Looking at four central themes capacity changes and limitations the EU's mixed messages and conflicting priorities non state actor roles and developments and the exchange of ideas and information the volume shows that enlargement will change the EU not just make it bigger and that EU officials and programs are improving aspects of environmental policy in CEE countries even as they are making others less sustainable This book was previously published as a special issue of the journal Environmental Politics

### **Environmental Change, Adaptation, and Security**

S. Lonergan, 2012-12-06 The chapters in this volume are edited versions of papers presented at the NATO Advanced Research Workshop on Environmental Change Adaptation and Security held in Budapest Hungary from October 16-18 1997 As is evident in this volume the papers ranged from descriptions of environmental and health issues in Russia and Eastern Europe to models of sustainable land use This diversity of perspectives on environment and security is indicative of both the breadth of this new area of research as well as the varied background of the researchers involved The discussions at the NATO workshop were remarkably animated and exciting not surprising given the interest in the topic I think this vitality is reflected in the papers in this volume as well The main purpose of the NATO ARW is to foster research links among researchers from NATO countries and Central and Eastern European States Russia and the Newly Independent States In editing this volume a decision was made to keep to the spirit of this purpose and if at all possible include all papers prepared for the workshop This required extensive editing and rewriting of some of the papers and consequent delays in production A determination was made early in the process by the workshop steering committee that the value of publishing the entire collection of articles outweighed the advantages of accepting only a limited number

### Dams and Development

Sanjeev Khagram, 2018-08-06 Big dams built for irrigation power water supply and other purposes were among the most potent symbols of economic development for much of the twentieth century Of late they have become a lightning rod for challenges to this vision of development as something planned by elites with scant regard for environmental and social consequences especially for the populations that are displaced as their homelands are flooded In this book Sanjeev Khagram traces changes in our ideas of what constitutes appropriate development through the shifting transnational dynamics of big dam construction Khagram tells the story of a growing but contentious world society that features novel and increasingly efficacious norms of appropriate behavior in such areas as human rights and environmental protection The transnational coalitions and networks led by nongovernmental groups that espouse such norms may seem weak in comparison with states corporations and such international agencies as the World Bank Yet they became progressively more effective at altering the policies and practices of these historically more powerful actors and organizations from the 1970s on Khagram develops these claims in a detailed ethnographic account of the transnational struggles around the Narmada River Valley Dam

Projects in central India a huge complex of thirty large and more than three thousand small dams He offers further substantiation through a comparative historical analysis of the political economy of big dam projects in India Brazil South Africa and China as well as by examining the changing behavior of international agencies and global companies The author concludes with a discussion of the World Commission on Dams an innovative attempt in the late 1990s to generate new norms among conflicting stakeholders

**The East European Economy in Context** David Turnock, 2003-09-02 Since 1989 the former communist countries of Eastern Europe have witnessed a profound and dramatic upheaval The economic coherence of this region formerly maintained through the adoption of the Soviet system of government has fractured In *The East European Economy in Context Communism and Transition* David Turnock examines the transition from communist to free market economies both within and between the states of Eastern Europe As well as containing an informative survey of the impact of communism *The East European Economy in Context* provides Political profiles of individual countries A clear study of the contrasts between northern and balkan groups Summaries of regional variations in the transition process An exploration of the new state structures and resources Discussion of political stability inter ethnic tensions and progress in economic change

**Environment and Democratic Transition:** A. Vari, Pal Tamas, 2013-03-14 Recent democratization and the accompanied liberalization of the media in Central and Eastern Europe has brought the devastating environmental impacts of the intensive and careless industrialization of the last 40 years to the surface Less is known however about the social political and institutional background of environmental risk management which led to the present situation as well as about recent changes *Environment and Democratic Transition Policy and Politics in Central and Eastern Europe* provides an overview of the mechanism of policy making the role of the scientific community the environmental movements and the public in risk controversies in Central and Eastern Europe from the 1970s until 1991 The book brings together studies by leading social scientists from the East and the West who investigate the economic legal institutional behavioral social and political aspects of environmental policy In addition to analyzing past histories most contributions focus also on challenges pitfalls and dilemmas that the region's policy makers and environmentalists must face during the period of transition and into the future

*Comparative Environmental Regulation in the United States and Russia* Lada V. Kochtcheeva, 2008-12-18 As environmental problems continue to pose a threat to the well being of people all over the world achieving pollution control through innovative methods and at a lower cost becomes very attractive However cost effectiveness and technical rationality are often at odds with political goals and policy traditions Lada V Kochtcheeva analyzes the introduction of flexible laws and regulations in both air and water quality policies in the United States and the Russian Federation from the 1960s to the present and highlights the replacement of command and control systems with flexible instruments such as incentive programs tradable permits and pollution charges With its rich comparative institutional analysis the book contributes to the debate on institutional dynamism policy innovation and new modes of regulation while simultaneously addressing the

processes and attributes of good governance      **Environmentalism under Authoritarian Regimes** Stephen Brain, Viktor Pál, 2018-10-26 Since the early 2000s authoritarianism has risen as an increasingly powerful global phenomenon This shift has not only social and political implications but also environmental implications authoritarian leaders seek to recast the relationship between society and the government in every aspect of public life including environmental policy When historians of technology or the environment have investigated the environmental consequences of authoritarian regimes they have frequently argued that authoritarian regimes have been unable to produce positive environmental results or adjust successfully to global structural change if they have shown any concern for the environment at all Put another way the scholarly consensus holds that authoritarian regimes on both the left and the right generally have demonstrated an anti environmentalist bias and when opposed by environmentalist social movements have succeeded in silencing those voices This book explores the theme of environmental politics and authoritarian regimes on both the right and the left The authors argue that in instances when environmentalist policies offer the possibility of bolstering a country s domestic nationalist appeal or its international prestige authoritarian regimes can endorse and have endorsed environmental protective measures The collection of essays analyzes environmentalist initiatives pursued by authoritarian regimes and provides explanations for both the successes and failures of such regimes looking at a range of case studies from a number of countries including Brazil China Poland and Zimbabwe The volume contributes to the scholarly debate about the social and political preconditions necessary for effective environmental protection This book will be of great interest to those studying environmental history and politics environmental humanities ecology and geography      *Latin American Environmental Policy In International Perspective* Gordon J Macdonald, 2021-12-13 Starting from the stance that environmental policy has progressed from rhetoric to substance in Latin America the editors proceed through a series of papers to show why what difference it makes and how it compares to other parts of the world In doing so the book touches on domestic and international factors including political institutions international development institutions nongovernmental organizations and transboundary cooperation Latin American Environmental Policy in International Perspective is one in a series of books that take a look at Latin America in Global Perspective Previous titles have addressed politics gender regional integration institutional design and civil military relations      **Ibss: Political Science: 1987** British Library of Political and Economic Science, 1991 IBSS is the essential tool for librarians university departments research institutions and any public or private institutions whose work requires access to up to date and comprehensive knowledge of the social sciences
