Environmental Policy Analysis For Decision Making:

Environmental Policy Analysis for Decision Making J. Loomis, Gloria Helfand, 2006-01-09 1 ENVIRONMENTAL POLICY ANALYSIS WHAT AND WHY Why environmental policy analysis Environmental issues are growing in visibility in local national and world arenas as a myriad of human activities leads to increased impacts on the natural world Issues such as climate change endangered species wilderness protection and energy use are regularly on the front pages of newspapers Governments at all levels are struggling with how to address these issues Environmental policy analysis is intended to present the environmental and social impacts of policies in the hope that better decisions will result when people have better information on which to base those decisions Conducting environmental policy analysis requires people who understand what it is and how to do it Interpreting it also requires those skills We hope that this book will increase the abilities both of analysts and of decision makers to understand and interpret the impacts of environmental policies Policy analysis books almost invariably begin by pointing out that policy analysis can take many forms This book is no different As you will see in Chapter 1 we consider policy analysis to be information provided for the policy process That information can take many forms from sophisticated empirical analysis to general theoretical results from summary statistics to game theoretic strategies

Environmental Policy Analysis for Decision Making J. Loomis, Gloria Helfand, 2014-01-15 *Knowledge, Power, and Participation in Environmental Policy Analysis* Rob Hoppe, 2018-01-16 This volume probes practical dilemmas and competing research perspectives in environmental policy analysis Scholars working in different fields research traditions societies and policy domains offer significant insights into the processes and consequences of environmental policy making Part 1 Coping with Boundaries describes present day conflict between experts and greater public participation in environmental policy It shows that the institutionalization of increasingly complex environmental problems has led to a conflict between technocracy and democracy Part 2 The Transnational Challenge examines modes of cooperation between grassroots movements scientists and regional authorities in the United States and Canada These and other modes of cooperation laid the foundations for the Great Lakes Water Quality Agreement increased the effectiveness of air pollution treaties and increased climate change Part 3 Bio Hazards Policies and Paralysis deals with environmental problems closest to the everyday concerns of the public at large because they have immediate implications for food safety and other values Part 4 The Citizens Perspective focuses on citizen vis a vis environmental policy noting that in order to make policies work citizens must be willing and able to participate in policy making and cooperate in implementing environmental choices Part 5 Confronting Ordinary and Expert Knowledge explores opportunities and constraints affecting public participation in evaluation of science Part 6 Developments in Research Programming addresses such questions as whether scientists still have opportunities to do the research they want without being interrupted or disturbed by policy makers and other stakeholders Part 7 Policy Sciences Aspirations explores different avenues for improving environmental policy Volume twelve

Environmental decision making is like politics mostly local In fact making decisions about the environment at the subnationallevel in state regional and local jurisdictions is a lot like politics For resolving environmental issues demands but often resists a balance between deeply held feelings and stark confrontations among opposing views This volume describes tools that should make the decision maker s lot a bit more tolerable The authors would be the last to suggest that these decision aiding tools will somehow bring a benign order to issues that reach to people s fundamental values What they can

help do is to keep the debate focused on the important issues to serve up useful options and to narrow the range of disagreement Even this is a challenging assignment Still why bother The chief reason is that the locus of environmental decision making has in the past decade or so shifted from the national to the subnational level a convenient if colorless term to denote the hurly burly of environmental controversy outside the Washington Beltway For example New England has taken a regional stand on tropospheric ozone control and California requires automotive pollution controls that some other jurisdictions have partially adopted This shift is a profound but not unexpected result of the way environmental policy has evolved since the modern environmental movement began around the late 1960s Back then the pendulum was swinging the other way

Comparative Risk Assessment and

Environmental Decision Making Igor Linkov, Abou Bakr Ramadan, 2006-03-02 Decision making in environmental projects is typically a complex and confusing process characterized by trade offs between socio political environmental and economic impacts Comparative Risk Assessment CRA is a methodology applied to facilitate decision making when various activities compete for limited resources CRA has become an increasingly accepted research tool and has helped to characterize environmental profiles and priorities on the regional and national level CRA may be considered as part of the more general but as yet quite academic field of multi criteria decision analysis MCDA Considerable research in the area of MCDA has made available methods for applying scientific decision theoretical approaches to multi criteria problems but its applications especially in environmental areas are still limited The papers show that the use of comparative risk assessment can provide the scientific basis for environmentally sound and cost efficient policies strategies and solutions to our environmental challenges
