wide range of possible reactions which range from those having coercive power to supportive measures Quite a number of those mechanisms and their functioning are explained in the publication in order to lay ground for some cross cutting analysis which covers inter alia reporting inspection and monitoring supportive financial incentives and the interrelationship between compliance mechanisms and the principle of state responsibility and dispute settlement Finally the role of non governmental organizations is addressed Practitioners and scholars in international environmental affairs and international law more generally will benefit significantly from the inside views and thorough reflection as provided for in this book
