## **Environmental Consciousness:**

**Environmental Consciousness** Stephen Hussey, Paul Richard Thompson, 2004 Across the globe environmental questions feature more and more in today's social and political agendas. In Western countries environmental campaigns target issues at home and abroad. They have a special urgency which draws in an astonishing range of field campaigners from young militants to rebel aristocrats. This book examines the roots of contemporary environmental consciousness and action in terms of both popular experience and tradition. The global reach of this book reflects the character of contemporary environmentalism. It examines a geographically and thematically diverse range of case studies including British environmental campaigners in the Brazilian rainforest, ecocriticism and literature, the environmental movement in Kazakhstan and medieval church iconography. The common theme linking each chapter is that environmental consciousness and activism are shaped through people's life stories and that their memories are shaped not only through individual experience but also through myth, tradition and collective memory. Containing a wealth of empirical source material, *Environmental Consciousness* will be invaluable for sociologists and historians alike. It offers a cutting edge illustration of how narrative and oral history can illuminate our understanding of an uncertain present. Stephen Hussey is a research associate at the School of Education at the University of Cambridge. His previous publications include *Childhood in Question* and his next publication will be a book for the wider market entitled *Headline History*. Paul Thompson is research professor in sociology and director of Qualidata at the University of Essex. He is also founder of the National Life Story Collection at the British Library National Sound Archive and founder editor of *Oral History*. His previous publications include *The Voice of the Past: The Edwardians* and *The Work of William Morris*.

**Environmental Consciousness, Nature and the Philosophy of Education** Michael Bonnett, 2020-12-30 This book explores alternative ways of understanding our environmental situation by challenging the Western view of nature as purely a resource for humans. *Environmental Consciousness: Nature and the Philosophy of Education* asserts that we need to retrieve a thinking that expresses a different relationship with nature, one that celebrates nature's otherness and is attuned to its intrinsic integrity, agency, normativity and worth. Through such receptivity to nature's address we can develop a sense of our own being in nature that provides a positive orientation towards the problems we now face. Michael Bonnett argues that this reframing and rethinking of our place in nature has fundamental implications for education as a whole, questioning the idea of human stewardship of nature and developing the idea of moral education in a world of alterity and non-rational agents. Drawing on and revising work published by the author over the last 15 years, this book will be essential reading for students and scholars of environmental studies, environmental education and the philosophy of education.

*Environmental Consciousness in China* Qiu Zhong, Guoqing Shi, 2020-05-23 *Environmental Consciousness in China: Change with Social Transformation* discusses the status of environmental consciousness within China from both an economic and political view. It then compares and contrasts the situation in China with Western nations. This is

the first book that includes a comparison of urban and rural groups based on China's unique modernization background  
Considers China's environmental record from an historical perspective  
Assesses the current state of environmental consciousness in China  
Discusses likely future trends in environmental consciousness  
Compares China's record on environmental consciousness with Western nations

**Environmental Consciousness and the Nine Schools of Indian Philosophy** Vandana Sharma Diya, 2023-09-28

This book presents an analytical exposition of the Nine Schools of Indian philosophy extrapolating Environmental Ethics from the profound metaphysics of these Nine Schools which serve as the cornerstone of a life lived in wisdom  
This book uses the popular contemporary word Environment with the meaning expounded by the Vedic texts  
Therefore it includes the internal external and cosmic states of all the creatures of the world and relates them to the universal laws of creation preservation and annihilation of every existence following the path of the cosmic order  
It argues that realization of the fact that all entities in the world are illuminated by the same Universal Spirit is also necessary  
While the book emphasizes the external environmental woes of the world such as deforestation animal cruelty pollution climate change and more it also underscores that these are merely manifestations of humans internal perverted environmental states  
Thus humankind should not look at external issues that are limited and temporary but should focus on the longer lasting internal transformation

**Christina Rossetti's Environmental**

**Consciousness** Todd Williams, 2019-05-01  
Christina Rossetti's Environmental Consciousness takes a cognitive ecocritical approach to Rossetti's writing as it developed throughout her career  
This study provides a unique understanding of Rossetti's identity as an artist through a cognitive model while also engaging significantly with her spiritual relationship to the nonhuman world  
Rossetti was a deliberate and conscious creator who used her writing for therapeutic purposes to create contemplate maintain verify and revise her identity  
Her understanding of her autobiographical self and her place in the world often comes through observations and poetic treatments of the nonhuman  
Rossetti her speakers and her characters seek spiritual knowledge in the natural world and share this knowledge with an audience  
In nature Rossetti finds evidence for and guidance from a loving God who offers salvation  
Her work places a high value on nature from a Christian perspective that puts conservation over renunciation  
She frequently uses strategies that have now been identified by Christian environmentalist such as retrieval ecojustice stewardship and ecological spirituality  
With new readings of popular works like Goblin Market and A Birthday along with treatments of largely neglected works like Verses 1847 and Rossetti's devotional writings  
Christina Rossetti's Environmental Consciousness offers an understanding of Rossetti's processes and purposes as a writer and displays new potential for her work in the face of twenty first century environmental issues

**The European Environmental Conscience in EU Politics** Thomas Hoerber, Gabriel Weber, 2021-12-06  
Based on empirical studies of European energy and environmental policies this book suggests that in combination these two policy fields form a consensus

in the EU which might also become the basis for a new European ideology namely European sustainability. It asks why an environmental conscience has grown since the late 1960s in the industrialised world and shows that whilst there is undeniable environmental degradation during this time and that a European environmental conscience has mainly developed through successive steps of European integration in energy policy. In this connection between energy and the environmental we find one driver for European integration and indeed European identity. If sustainability should become a European ideology it will substantially influence the way future Europeans will live. This book will be of key interest to scholars and students of European Studies, International Relations, Political Science, History, Economics, Sustainability Studies, Environmental and Energy Policies in Europe.

The European Environmental Conscience in the EU Marjorie Tendero, Christoph Weber, 2025-02-17. This book analyses how sustainability affects internal decision making within the European Union and its external relations in working towards achieving its long term goal of a climate neutral Europe by 2050. Applying the term European environmental conscience as the perception of environmental degradation leading to a growing public awareness of the issues, a notion of common responsibility and European institutions dealing with these growing concerns, the book investigates its emergence as a lever for deeper European integration and in fostering a genuine European identity. Examining policy areas such as green finance, innovation policies and foreign policy, it reveals the impact these concerns have for other policy fields. This book is of key interest to scholars and students of environmental economics and politics, sustainability governance, green finance, climate policy, energy policy and more broadly to European studies and international relations.

Rise of Environmental Consciousness Beth Schaefer Caniglia, 2016. *Rise of Environmental Consciousness: Voices in Pursuit of a Sustainable Planet* provides diverse perspectives on the environment and our relationship to it. It presents the voices of Native Americans, religious texts, the work of scholars, intellectuals and more to educate readers about the development of environmental consciousness across time and around the globe. The readings are organized into five groupings: Native Voices explores indigenous perspectives on nature; Spiritual Voices examines how religion influences ways in which people interact with the natural environment; Voices from Early American Environmental Movements contrasts Transcendentalist's view of the divine in humans and nature with that of those who favored expansion while discounting its costs; Voices from Scientists, Scholars and Intellectuals confronts the inherent conflict between development and the natural world; Global Voices explores issues such as water quality and sustainable development. Featuring diverse selections such as the Bible, the works of Thoreau and Emerson, stories from the Iroquois and Cherokee nations and the Nobel Laureate acceptance speech of Green Belt Movement founder Wangari Maathai, *Rise of Environmental Consciousness* is ideal for courses in environmental sociology or environmental science.
