several promising initiatives while identifying barriers to transformation. Its core implication: the UN's environmental efforts require not just a managerial reorganization but a conceptual revolution—one that brings to bear the full force of the organization's mandate. Peacebuilding, conflict sensitivity, rights-based frameworks, and accountability mechanisms can be used to enhance the UN's environmental effectiveness and legitimacy.

Sustainable Development Principles in the Decisions of International Courts and Tribunals Marie-Claire Cordonier Segger, Judge C.G. Weeramantry, 2017-05-08

The 2002 New Delhi Declaration of Principles of International Law relating to Sustainable Development set out seven principles on sustainable development as agreed in treaties and soft law instruments from before the 1992 Rio Earth Summit. UNCED to the 2002 Johannesburg World Summit on Sustainable Development to the 2012 Rio UNCS D Recognition of the New Delhi principles is shaping the decisions of dispute settlement bodies with jurisdiction over many subjects: the environment, human rights, trade, investment, and crime among others. This book explores the expanding international jurisprudence incorporating principles of international law on sustainable development. Through chapters by respected experts, the volume documents the application and interpretation of these principles, demonstrating how courts and tribunals are contributing to the world's Sustainable Development Goals by peacefully resolving disputes. It charts the evolution of these principles in international law from soft law standards towards recognition as customary law in certain instances, assessing key challenges to further judicial consideration of the principles and discussing, for instance, how their relevance for compliance and disputes related to the 2015 Paris Agreement on climate change. The volume provides a unique contribution of great interest to law and policy makers, judges, academics, students, civil society, and practitioners concerned with sustainable development and the law globally.

Managing Natural Resources for Development in Africa Washington Odongo Ochoa, P. C. Sanginga, Isaac Bekalo, 2010

The complex and dynamic interlinks between natural resource management (NRM) and development have long been recognized by national and international research and development organizations and have generated voluminous literature. However, much of what is available in the form of university course books, practical learning manuals, and reference materials in NRM is based on experiences from outside Africa. *Managing Natural Resources for Development in Africa: A Resource Book* provides an understanding of the various levels at which NRM issues occur and are being addressed: scientifically, economically, socially, and politically. The book's nine chapters present state-of-the-art perspectives within a holistic African context. The book systematically navigates the tricky landscape of integrated NRM with special reference to Eastern and Southern Africa against the backdrop of prevailing local, national, regional, and global social, economic, and environmental challenges. The authors' wide experience, the rich references made to emerging challenges and opportunities, and the presentation of different tools, principles, approaches, case studies, and processes make the book a rich and valuable one-stop resource for postgraduate students, researchers, policymakers, and NRM practitioners. The book is designed to help the reader grasp in depth NRM perspectives and presents innovative guidance for research design and problem solving.

including review questions learning activities and recommended further reading The book was developed through a writeshop process by a multi disciplinary team of lecturers from the University of Nairobi Egerton University Kenyatta University the University of Zimbabwe the University of Malawi Makerere University and the University of Dar es Salam In addition selected NRM experts from regional and international research organizations including the World Agroforestry Center ICRAF the Africa Forest Forum RUFORUM IIRR and the International Development Research Centre IDRC participated in the writeshop and contributed material to the book

Carbon Politics and the Failure of the Kyoto Protocol

Gerald Kutney, 2014-02-03 Carbon Politics and the Failure of Kyoto charts the framework and political evolution of the Kyoto Protocol negotiations and examines the ensuing failure of the international community to adequately address climate change The focus is not on the science or consequences of climate change but on the political gamesmanship of the major players throughout the UNFCCC negotiation process More than an updated history of the subject matter this book provides a detailed study of the carbon targets which became the biggest influencing factor on the reaction of nations to Kyoto s binding agreements The book provides an in depth analysis of the leading nations motives including the US China and Germany in entering the negotiations in particular their economic interests Despite the effort to combat climate change in politics that the negotiations represent the book concludes that an agreement which requires almost 200 very different nations to agree on a single protocol is doomed to failure The book offers a novel contribution to our understanding of this failure and suggests alternative frameworks and policies to tackle what is arguably the most complex political issue of our time
