analysis of figurative meaning making processes in German and Polish campaign commercials from 2009 and 2011 By setting the inseparable intertwining of language and cinematic staging sensing and understanding center stage the book provides insight into the dynamic nature and embodied affective grounds of audiovisual figurativity and challenges the long known dichotomies of rational discourse and affective manipulation political message and media effect *Handbook of Visual Communication* Kenneth L. viewers Using films such as The Return of Dracula The Tinger Blood Feast Two Thousand Maniacs Color Me Blood Red Bonnie and Clyde and The Wild Bunch R dje takes a novel approach to film history by following one audio visual element through an exploration that traverses established standards for film production and reception This study does not heed distinctions regarding to genres horror western gangster or models of film production exploitation independent studio productions but rather maps the operations of cinematic images across marginal as well as more traditionally esteemed cinematic territories The result is a book that rethinks and reassembles cinematic practices as well as aesthetics and as such invites new ways to investigate how cinematic images enter relations with other images as well as with audiences

further develop aesthetics on the model of formal logic creating a theory of style in response to Zimmermann's call for an aesthetics oriented toward formal logic Heinrich Wölfflin 1864 1945 who represents a step toward an understanding of consciousness by using pictures as cognitive tools Konrad Fiedler 1841 1895 the Saxon philosopher who considered the possibility that some kinds of images are made and viewed not for what they show but for their visibility's sake alone Maurice Merleau Ponty 1908 1961 responsible for taking up the connections between the problems of reducing the range of potential meanings and contexts of a given image down to just the picture surface Charles William Morris 1901 1979 who set out to establish whether a picture with no objective reference such as an abstract painting still counts as a sign and if so in what sense Bringing these thinkers together and interlinking their ideas Lambert Wiesing presents an engaging history of formal aesthetics while reconstructing the philosophical foundations for the appearance of new image forms in the 20th century including the video clip abstract collage digital simulation and virtual reality Using this original approach *The Visibility of the Image* introduces the rise of modern image theory and provides a valuable account of our engagement with pictures in the 21st century
