## How Jet Engines Are Made:

How Jet Engines are Made Julian Moxon, 1985-01-01 Describes how jet engines are made *Jet Engines* Julian Moxon, Arthur Lockwood, 1985-01 How Things Are Made Andrew Terranova, 2018-02-27 For anyone curious about the nuts and bolts of human ingenuity *How Things Are Made* is a fascinating exploration of the process behind the manufacture of everyday items What are bulletproof vests made of How do manufacturers get lipstick into the tube How many layers are there in an iPhone screen The answers to these questions and so much more fascinating information can be found in *How Things Are Made* a behind the scenes look at the production everyday objects of all kinds from guitars sunscreen and seismographs to running shoes jet engines and chocolate Thoroughly revised and redesigned from the best selling 1995 edition *How Things Are Made* also contains three new entries by author Andrew Terranova However each page still contains informative step by step text along with detailed but easy to follow illustrations diagrams and sidebars to tell the stories behind the things we sometimes take for granted For example did you know that Edison didn't really invent the light bulb Or that the first bar code was on a pack of Wrigley's Spearmint gum Or that a maple seed inspired the design for the helicopter Discover these fascinating anecdotes and much more in *How Things Are Made* *Making Jet Engines in World War II* Hermione Giffard, 2016-10-10 Our stories of industrial innovation tend to focus on individual initiative and breakthroughs With *Making Jet Engines in World War II* Hermione Giffard uses the case of the development of jet engines to offer a different way of understanding technological innovation revealing the complicated mix of factors that go into any decision to pursue an innovative and therefore risky technology Giffard compares the approaches of Britain Germany and the United States Each approached jet engines in different ways because of its own war aims and industrial expertise Germany which produced more jet engines than the others did so largely as replacements for more expensive piston engines Britain on the other hand produced relatively few engines but by shifting emphasis to design rather than production found itself at war's end holding an unrivaled range of designs The US emphasis on development meanwhile built an institutional basis for postwar production Taken together Giffard's work makes a powerful case for a more nuanced understanding of technological innovation one that takes into account the influence of the many organizational factors that play a part in the journey from idea to finished product *How Products are Made* Neil Schlager, 1994 An illustrated guide to product manufacturing *Jet Engine Mechanic (AFSC 42652): Jet engine theory and maintenance information* Ray M.
