Hopman,2013-01-03 What s in a name Using the example of a famous monster from Greek myth this book challenges the dominant view that a mythical symbol denotes a single clear cut figure and proposes instead to define the name Scylla as a combination of three concepts sea dog and woman whose articulation changes over time While archaic and classical Greek versions usually emphasize the metaphorical coherence of Scylla s components the name is increasingly treated as a well defined but also paradoxical construct from the late fourth century BCE onward Proceeding through detailed analyses of Greek and Roman texts and images Professor Hopman shows how the same name can variously express anxieties about the sea dogs aggressive women and shy maidens thus offering an empirical response to the semiotic puzzle raised by non referential proper names

Roberts, 2019-01-03 Can scientific explanation ever make reference to God or the supernatural The present consensus is no indeed a naturalistic stance is usually taken to be a distinguishing feature of modern science Some would go further still maintaining that the success of scientific explanation actually provides compelling evidence that there are no supernatural entities and that true science from the very beginning was opposed to religious thinking *Science without God Rethinking the History of Scientific Naturalism* shows that the history of Western science presents us with a more nuanced picture Beginning with the naturalists of ancient Greece and proceeding through the middle ages the scientific revolution and into the nineteenth century the contributors examine past ideas about nature and the supernatural Ranging over different scientific disciplines and historical periods they show how past thinkers often relied upon theological ideas and presuppositions in their systematic investigations of the world In addition to providing material that contributes to a history of nature and naturalism this collection challenges a number of widely held misconceptions about the history of scientific naturalism
