Key Questions In Pediatrics:

Safety and Reliability in Pediatrics, An Issue of Pediatric Clinics Brian Jacobs, Max J. Coppes, 2012-12-28 The Guest Editors have assembled an international list of top experts to present the most current information to pediatricians about patient safety. The issue has a primarily clinical focus with a few articles addressing the business and practice of patient safety. Articles are devoted to the following topics: Developing performance standards and expectations for safety. The role of CPOE in patient safety. The role of smart infusion pumps on patient safety. Abstracted detection of adverse events in children. The role of effective communication including handoffs in patient safety. Reducing mortality resulting from adverse events. Optimizing standardization of case reviews. Morbidity and mortality rounds to promote patient safety. Impact of resident duty work hours on patient safety. Role of simulation in safety. The role of diagnostic errors in patient safety. The role of collaborative efforts to reduce hospital acquired conditions. Patient safety in ambulatory care. Role of FDA and pediatric safety. Patient safety through the eyes of a parent. Pediatric Intensive Care Nursing, An Issue of Critical Care Nursing Clinics of North America, E-Book Melissa Nunn, 2023-08-04 In this issue of Critical Care Nursing Clinics guest editor Dr. Melissa Nunn, Instructor of Clinical Nursing at LSU Health New Orleans School of Nursing, brings her considerable expertise to the topic of Pediatric Intensive Care Nursing. Top experts in the field present systematic evidence-based processes for decision making and care addressing topics such as palliative communication in the PICU, dialysis care in the PICU, caring for hematology oncology emergencies in the PICU, nurse-led rounds in the PICU, asthma care, protocol implementation in the PICU, and more. Contains 12 relevant practice-oriented topics including acute pain management protocols in the PICU, kangaroo care implementation, unplanned extubations in the PICU, pediatric delirium screening in the ICU, battling alarm fatigue within the PICU, and more. Provides in-depth clinical reviews on pediatric intensive care nursing, offering actionable insights for clinical practice. Presents the latest information on this timely focused topic under the leadership of experienced editors in the field. Authors synthesize and distill the latest research and practice guidelines to create clinically significant topic-based reviews. **Pediatric Prevention, An Issue of Pediatric Clinics** Earnestine Willis, 2015-09-07 Preventive pediatrics remains the foundation for pediatricians to offer benefits for future generations. Social conditions often complicate health status, and bureaucracies pose challenges for families and children to navigate service systems. Therefore, it is crucial to emphasize a host of topics that children and families face in addition to highlighting opportunities for overcoming some of those challenges. In this issue, an array of authors will update pediatricians on the prevalence and management of chronic health and social conditions such as childhood poverty, youth violence, oral health, asthma, foster care, toxin exposures including tobacco, and childhood obesity. Promising interventions that pediatricians should continue to examine include how pediatricians can advocate for breastfeeding as a wellness concept for working mothers, in the workplace promotion of childhood literacy, development, maximizing immunization compliance, monitor the impact of public policy such as the

Affordable Care Act ACA on children's health and how community health workers CHWs can be vital to community health improvement. Proposed interventions include a description of how the medical and legal partnership model can be an empowering strategy for families to address social determinants of health SDH when lawyers are included as a member of the health care team. In addition, pediatricians and all other child healthcare professionals must investigate epigenetic mechanisms that might predispose children to risk factors or good health outcomes. Pediatric Critical Care, An Issue of Pediatric Clinics of North America, E-Book Mary Lieh-Lai, Katherine Cashen, 2022-06-10. In this issue of Pediatric Clinics of North America, guest editors Drs Mary Lieh Lai and Katherine Cashen bring their considerable expertise to the topic of Pediatric Critical Care. The most common indications for admission to the PICU include respiratory disease, cardiac disease, and neurologic disorders. In this issue, top experts in the field provide current clinical knowledge about these admissions as well as other important critical care admissions including COVID-19. Contains 13 relevant practice-oriented topics including PICU pharmacology, COVID-19 in children, mechanical ventilation, and respiratory support of critically ill children, cardiovascular critical care in children, neurocritical care in children, and more. Provides in-depth clinical reviews on pediatric critical care, offering actionable insights for clinical practice. Presents the latest information on this timely focused topic under the leadership of experienced editors in the field. Authors synthesize and distill the latest research and practice guidelines to create clinically significant topic-based reviews. *Oski's Essential Pediatrics* Michael Crocetti, Michael A. Barone, Frank A. Oski, 2004. This concise text presents the essential information that medical students, residents, and other clinicians need to diagnose and treat patients. Chapters focus on specific clinical problems and follow a user-friendly format with numerous illustrations, algorithms, tables, and graphs. A new section on presenting signs and symptoms has been added, and the chapter organization has been revised for easier reference. *Science and Practice of Pediatric Critical Care Medicine* Derek S. Wheeler, Hector R. Wong, Thomas P. Shanley, 2008-12-03. The field of critical care medicine is in the midst of a dramatic change. Technological and scientific advances during the last decade have resulted in a fundamental change in the way we view disease processes such as sepsis, shock, acute lung injury, and traumatic brain injury. Pediatric intensivists have been both witness to and active participants in bringing about these changes. As the understanding of the pathogenesis of these diseases reaches the cellular and molecular levels, the gap between critical care medicine and molecular biology will disappear. It is imperative that all physicians caring for critically ill children in this new era have a thorough understanding of the applicability of molecular biology to the care of these patients at the bedside in order to keep up with the rapidly evolving field of critical care medicine. To the same extent, the practice of critical care medicine is in the midst of fundamental change. In keeping with the Institute of Medicine's report *Crossing the Quality Chasm*, the care of critically ill and injured children needs to be safe, evidence-based, equitable, efficient, timely, and family-centered. 1, 2 In the following pages, these changes in our specialty are discussed in greater scope and detail, offering the reader fresh insight into not only where we came from but

also where we are going as a specialty Sleep in Children and Adolescents, An Issue of Pediatric Clinics Judith Owens, Jodi A Mindell, 2011-04-28 Pediatric and Adolescent Psychopharmacology is reviewed in this issue of Pediatric Clinics guest edited by Drs Dilip Patel Donald Greydanus and Cynthia Feucht Authorities in the field have come together to pen articles on Therapy in the Age of Pharmacology Point Counterpoint Principles of Pharmacology and Neurotransmission Complementary and Alternative Medicine in Pediatric Mental Health Psychopharmacology of Anxiety Disorders Psychopharmacologic Control of Aggression and Violence Autistic Spectrum Disorders Attention Deficit Hyperactivity Disorder Psychopharmacology of Anorexia and Bulimia Nervosa Psychopharmacology of Obesity Psychopharmacology of Depression Psychopharmacology of Pediatric Bipolar Disorders Cognitive Adaptive Disabilities Psychopharmacology of Schizophrenia Management of Psychotic States Induced by Medical Conditions Substance Use and Abuse Psychopharmacology of Tic Disorders and Pharmacology of Sleep Disorders *Pediatric Swallowing and Feeding* Joan C. Arvedson, Linda Brodsky, Maureen A. Lefton-Greif, 2019-07-26 Pediatric Swallowing and Feeding Assessment and Management Third Edition provides information to practitioners interested in and involved with children who demonstrate swallowing and feeding disorders Since the 2002 publication of the second edition there has been an exponential increase in the number of medically fragile and complex children with swallowing feeding disorders A corresponding proliferation in the related basic and clinical research has resulted in the increased appreciation of the complicated inter relationships between structures and systems that contribute to swallowing feeding development function and disorders Case studies throughout the book provide examples for decision making and highlight salient points New to the Third Edition Maureen A Lefton Greif PhD CCC SLP BCS S is welcomed as co editor She brings extensive research expertise and clinical practice in pediatric dysphagia and feeding All chapters contain significant updated evidence based research and clinical information New chapters focus on the genetic testing and conditions associated with swallowing and feeding disorders and the pulmonary manifestations and management of aspiration World Health Organization WHO description of an International Classification of Functioning Disability and Health ICF sets the stage for an in depth discussion of clinical feeding evaluation procedures interpretation and management decision making Pediatric Swallowing and Feeding continues to be the leading text on pediatric dysphagia that provides practical information for clinicians seeing children with swallowing and feeding disorders The overall importance of an appropriate fund of knowledge and shared experience employing team approaches is emphasized throughout this third edition as in the earlier editions of this book From the Foreword The Editors have recognized the advances and changes in the understanding in the information now available for the care of pediatric swallowing and feeding challenges They have recruited an outstanding group of contributors for this newest edition There are numerous critically important updates and additions in the third edition They have included World Health Organizations International Classification of Functioning Disability and Health is the functional basis in all areas of the book This text has its importance as there has been an increased number of children

with complex medical and healthcare conditions which are risk for feeding and swallowing disorders This edition stresses the need for team approaches and also documents the use of virtual teams Pediatric Swallowing and Feeding Assessment and Management Third Edition is the fundamental holistic source for all healthcare providers providing the care for swallowing and feeding in children This book will be utilized by all caring for children with feeding and swallowing problems throughout the world The previous editions have been and now this updated third edition continues to be the standard source for the information concerning diagnosis and care of these children Robert J Ruben MD FAAP FACS Distinguished University Professor Departments of Otorhinolaryngology Head and Neck Surgery and Pediatrics Albert Einstein College of Medicine Montefiore Medical Center Bronx New York The Zuckerman Parker Handbook of Developmental and Behavioral Pediatrics for Primary Care Marilyn Augustyn, Barry S.
