Killers From Space:

Killers from Space Peter Graves, Steve Pendleton, Bill Raynor, James Seay, Myles Wilder, W. Lee Wilder, 2002 *Keep Watching the Skies!* Bill Warren, 2017-01-12 Bill Warren's *Keep Watching the Skies* was originally published in two volumes in 1982 and 1986. It was then greatly expanded in what we called the 21st Century Edition with new entries on several films and revisions and expansions of the commentary on every film. In addition to a detailed plot synopsis, full cast and credit listings, and an overview of the critical reception of each film, Warren delivers richly informative assessments of the films and a wealth of insights and anecdotes about their making. The book contains 273 photographs, many rare, 35 in color, has seven useful appendices, and concludes with an enormous index. This book is also available in hardcover format. ISBN 978 0 7864 4230 0

The Eternal Future of the 1950s Dennis R. Cutchins, Dennis R. Perry, 2023-07-17 Science fiction cinema, once relegated to the undervalued B movie slot, has become one of the dominant film genres of the 21st century, with Hollywood alone producing more than 400 science fiction films annually. Many of these owe a great deal of their success to the films of one defining decade: the 1950s. Essays in this book explore how classic 50s science fiction films have been recycled, repurposed, and reused in the decades since their release. Tropes from Don Siegel's *Invasion of the Body Snatchers* (1956), for instance, have found surprising new life in Netflix's wildly popular *Stranger Things*. *Interstellar* (2014) and *Arrival* (2016) have clear, though indirect, roots in the iconic 1950s science fiction films *Rocketship X-M* (1950) and *The Day the Earth Stood Still* (1951). *The Shape of Water* (2017) openly recalls and reworks the major premises of *The Creature from the Black Lagoon* (1954). Essays also cover 1950s sci-fi influences on video game franchises like *Fallout*, *Bioshock*, and *Wolfenstein*.

Apocalypse Then Mike Bogue, 2017-08-11 The United States, the only country to have dropped the bomb, and Japan, the only one to have suffered its devastation, understandably portray the nuclear threat differently on film. American science fiction movies of the 1950s and 1960s generally proclaim that it is possible to put the nuclear genie back in the bottle. Japanese films of the same period assert that once freed, the nuclear genie can never again be imprisoned. This book examines genre films from the two countries released between 1951 and 1967, including *Godzilla* (1954), *The Mysterians* (1957), *The Incredible Shrinking Man* (1957), *On the Beach* (1959), *The Last War* (1961), and *Dr. Strangelove* (1964), to show the view from both sides of the Pacific.

Atomic Narratives and American Youth Michael Scheibach, 2015-09-17 Following the atomic bombings of Hiroshima and Nagasaki, numerous atomic narratives in books, newspapers, magazines, textbooks, movies, and television programs addressed the implications of the bomb. Post-World War II youth encountered atomic narratives in their daily lives at school, at home, and in their communities, and were profoundly affected by what they read and saw. This multidisciplinary study examines the exposure of American youth to atomic narratives during the ten years following World War II. In addition, it examines the broader social narrative of the atom, which included educational, social, cultural, and political activities that surrounded and involved American youth. The activities ranged from school and community programs to movies and

television shows to government sponsored traveling exhibits on atomic energy The book also presents numerous examples of writings by postwar adolescents who clearly expressed their conflicted feelings about growing up in such a tumultuous time and shows how many of the issues commonly associated with the sixties generation such as peace fellowship free expression and environmental concern can be traced to this earlier generation [HVMP Movie Poster Auction Catalog #640](#) Ivy Press,2006-10 [Screen World Vol. 6 1955](#) Blum, Daniel,1969 *The Ultimate Collection on UFOs* compiled from Wikipedia entries and published by by Dr Googelberg,2012-06-11 Lots of information on sightings and everything from a scientific angle about them Compiled from Wikipediapages and published by DrGoogelberg *It Came from 1957* Rob Craig,2013-09-21 America in the 1950s was a cauldron of contradictions Advances in technology chafed against a grimly conservative political landscape the military industrial complex ceaselessly promoted the Communist menace young marrieds fled crumbling cities for artificial communities known as suburbs and the corporate cipher known as The Organization Man was created along with stifling images of women The decade huddled under the fear of nuclear holocaust was also dedicated to all things futuristic Science fiction was in its salad days in magazines and novels and in motion pictures trying every trick in the book to lure customers back from television including reliance on monster movies All of these forces collided in 1957 when an astounding 57 movies of the science fiction horror and fantasy variety were shown in the United States a record unmatched to this day Reflecting some of the socio political topics of the day several are exceptional examples of their genres This book critically discusses each of the films **Gospel Earth** Steven Patrick,2021-03-11 Hidden in plain sight Within the Scriptures are truths that our Father in heaven wants to reveal to us These truths will challenge every human being to reconsider what we thought we knew Since the dawn of man theories math science lies and speculation have been at odds with Gods word No more Gospel Earth illuminates all the questions including the messages that are not preached about on Sundays The one who seeks to kill and destroy uses false narratives and fake news to make even bold followers of Christ complacent Liars beware Gospel Earth is truth and the truth will set you free Anyone who belongs to God listens gladly to the words of God But you don t listen because you don t belong to God John 8 47 **Film Quarterly** Brian Henderson,Ann Martin, Lee Amazonas,1999-01-01 A collection of articles that appeared in the journal film quarterly that appeared over the last 40 years *Alien Abduction in the Cinema* Paul Meehan,2023-08-03 The alien abduction phenomenon is one of the enduring enigmas of our time While the reality of alien abductions is a hotly debated topic among UFO researchers scientists skeptics and true believers alike the phenomenon indisputably exists as an artifact of popular culture This book analyzes more than 75 films that draw their inspiration from allegedly fact based accounts of alien contact from 1951 s The Man from Planet X to Contactee in 2021 These films are examined in terms of both their cinematic qualities and their exploration of thematic elements derived from abduction reports Abduction motifs that appear in science fiction classics such as The Day the Earth Stood Still 2001 and Close Encounters are analyzed as well as those in lesser known films like The Stranger Within

Extraterrestrial Intelligence and Human Imagination John Traphagan, 2014-11-07 The search for extraterrestrial intelligence SETI represents one of the most significant crossroads at which the assumptions and methods of scientific inquiry come into direct contact with and in many cases conflict with those of religion Indeed at the core of SETI is the same

question that motivates many interested in religion What is the place of humanity in the universe Both scientists involved with SETI and in other areas and those interested in and dedicated to some religious traditions are engaged in contemplating these types of questions even if their respective approaches and answers differ significantly This book explores this intersection with a focus on three core points 1 the relationship between science and religion as it is expressed within the framework of SETI research 2 the underlying assumptions many of which are tacitly based upon cultural values common in American society that have shaped the ways in which SETI researchers have conceptualized the nature of their endeavor and represented ideas about the potential influence contact might have on human civilization and 3 what sort of empirical evidence we might be able to access as a way of thinking about the social impact that contact with alien intelligence might have for humanity from both religious and cultural perspectives The book developed as a result of a course the author teaches at the University of Texas at Austin Religion Science and the Search for Extraterrestrial Intelligence
