## **Language Learning Disabilities Diagnosis And Remediation:**

**Language Learning Disabilities** Carol T. Wren, 1983      Literacy Disorders Ula C. Manzo, Anthony V. Manzo, 1993 A holistic view of children's abilities in reading and language arts Includes means for assessing and improving writing spelling and emotional well being a full chapter on how to promote higher order literacy and a full chapter and appendices devoted to the diagnosis and treatment of dyslexia or severe reading disorders      **Language, Reading, and Learning Disabilities; Psychology, Neuropsychology, Diagnosis and Remediation** Alexander Bannatyne, 1973      **Diagnosis and Remediation of Language Disabilities** Arvind Sharma, Birks Professor of Comparative Religion Arvind Sharma, 2011-08 With the growing awareness of children with specific learning disabilities the primary task confronting a teacher is successfully identifying assessing and providing remedial measures to the children in accordance to their specific problem One has to look out for paradoxes a child who is unable to read but good at arithmetic one whose spellings are confusing but who is up to date and informed about current events science history The general education framework has a system of automatic promotion to next class irrespective of the marks obtained by the student This leads the child to a class which may be much above his ability level thus widening the discrepancy between the actual performance of the child the expected performance of that class Added to these is the various syllabi system varied second languages media of instruction and also a third language to be learnt With the post school college education having become so competitive in general our children with hidden handicap get nowhere in the educational system thus receiving no attention to their talents If the purpose of Education is to impart knowledge to learner the evaluation system should focus on them      **Language Development and Disorders** W. Yule, M. Rutter, 1987 Communication disabilities are common although their precise nature and degree of severity vary greatly among individuals They are among the most handicapping of disabilities because they isolate a person and in so doing restrict social educational and occupational opportunities One of the purposes of this book was to bring together theoretical practical and clinical knowledge from several disciplines that bear on language and communication into some reasonably accessible form The intent is to provide a broad and multi faceted view of language development and language disorders Thus contributions from education linguistics psychology pediatrics psychiatry neurology neuropsychology and speech therapy are included They describe our current knowledge of language development suggest classifications for language pathology outline what is known of the epidemiology of language difficulties consider assessment and therapy alternative communication systems and the impact of the new technology on communication aids The variety of perspectives that it provides will make it particularly useful to the range of specialists who are concerned with the development of communication skills and language disorders      *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1971 First multi year cumulation covers six years 1965-70      **Speaking, Reading, and Writing in Children With Language Learning Disabilities** Katharine G. being literate requires more than functional literacy the recognition of printed words as meaningful It requires the knowledge of how to use language as a tool for analysing synthesizing and integrating what is heard or read in order to arrive at new interpretations *Reading Diagnosis and Remediation* William H. Rupley, Timothy R. Blair, 1989 *A Study in the Diagnosis and Remediation of Spoken Language Dysfunctions in Children with Learning Disabilities* Patsy A. Gaddes, 2013-04-17 Some may say that this book is long overdue others including myself will state that the book appears at just the right time The latter is likely more true for it is doubtful that many in the professions would until now link issues of learning disabilities with those of neurophysiological dysfunction in the manner in which ultimately must be the case As a matter of fact there are those who deny the relationship completely Lee Wiederholt 1974 1 in his short but excellent review of the historical perspectives of learning disabilities traces the early interest in this problem to the work of Gall 1802 and to his successors Broca 1861 Jackson 1864 Bastian 1869 and a few others Each of these men would at the time of this writing be considered to have interests in the field of neurology although at the time of their investigations neurology per se was but a gleam in the eye of the anatomical beholder A relative detour then took place Cerebral palsy in the decades of the 1940s and 1950s caught the attention of researchers through the work of Winthrop Morgan Phelps orthopedist and George Deaver physiatrist and one or two other medically oriented individuals This was related to the writings of W J Little 1810 1894 It was however Kurt Goldstein Heinz Wemer both eminent German scientists and Alfred A      Research Awards Index ,1988
