Technologies, 1994 Item no 0431 K **Emerging Technologies in Hazardous Waste Management 8** D. William Tedder, Frederick G. Pohland, 2007-05-08 Several long term trends in technology evolution have become apparent since these symposia began in 1989 Earlier presenters more frequently discussed treatment methods involving harsh and extensive human intervention As the symposia have continued the number of presentations describing extremely harsh and expensive treatment technologies have gradually been supplanted by more subtle and gentler methods Such methods include

subsurface engineered barriers phytoremediation and bioremediation Nineteen manuscripts were selected for inclusion in this volume based upon peer review scientific merit the editors perceptions of lasting value or innovative features and the general applicability of either the technology itself or the scientific methods and scholarly details provided by the authors General topics include soil treatment groundwater treatment and radioactive waste treatment

International Technologies for Hazardous Waste Site Cleanup T. Nunno,1990-12-31 From the Introduction The purpose of this program is to identify and assess international technologies that could be utilized for hazardous waste site remediation within the United States This report summarizes the results of Phase I of this program which identified international alternative technologies potentially applicable to Superfund site remediation All remedial technologies identified as a result of the Phase I activities are described in this report Recommendations are also provided for further study in Phase II which will focus on the most promising international technologies General Approach The technical approach

for Phase I focused on the location acquisition and interpretation of existing data studies and related documentation for remedial technologies Data were obtained through a comprehensive literature survey and telephone contracts interviews with agencies industries vendors research groups and others involved in the development and marketing of technologies Emphasis was placed on technologies that have been developed and or applied in Europe Japan and Canada because of the promise that these areas have more advanced hazardous waste programs in place An important part of the Phase I activity was the assembly and review of information that EPA scientific personnel have obtained in their foreign travel assignments or through contact with foreign consultants or academics A list of EPA personnel that were contact for input to the Phase I technology identification activity is provided in Section 4 along with non EPA contacts

Hazardous Waste Sites Michael R. Greenberg, Richard F. Anderson, 1984-11-01 Mutual distrust defines the relationship between those who are the sources of hazardous wastes and those who oversee their activities A lack of credibility argue the authors is a formidable if not the biggest obstacle to properly managing hazardous waste in the United States Nowhere is the credibility gap wider than where there are hazardous waste management facilities or where sites have been proposed The purpose of this book is to provide comprehensive perspectives on hazardous waste sites in the United States The sources of hazardous waste are described along with the scientific and legal climates that allowed wastes to be discarded with little attention to impacts Evidence is weighed for and against public health as well as environmental economic and social damages at abandoned sites Political processes and analytical techniques are suggested and illustrated for those who are involved in the siting of new facilities A strategy for hazardous waste management is offered together with approaches to substantially reduce the difficulties faced by local planners and site managers who face a hostile public A historical legacy of mismanagement fueled by exaggeration of impacts and by a lack of information characterizes hazardous waste management in the United States This book will be important to planners environmental scientists and public health officials In order to assure accessibility for the casual reader the authors keep the explanation of mathematical methods and technologies in this area to a minimum
