*Health Communication* Gary L. Kreps, Barbara C. Thornton, 1984      Health Communication Nancy Grant

Harrington, Rachael A. Record, 2023-08-02 This thoroughly revised second edition covers the major areas of research theory and practical application in health communication. This textbook takes an in depth approach to health communication by analyzing and critically evaluating research conducted across multiple paradigmatic perspectives and focusing on translational application of research findings. Using the story of the Montgomery family, a biracial multigenerational family and their health experiences as a case study, chapters explore topics including patient provider communication, health communication in the media, ethical issues and public health crises. New chapters cover the potential for communication to address discrimination in healthcare settings, health information seeking, social support and caregiving and the relationship between health and environmental communication. Chapters offer pedagogical features that will prove useful to students and instructors of health communication, such as summary boxes, theory tables, suggestions for in class activities, discussion questions and lists of additional resources. Developed for use in advanced undergraduate and master's level health communication and public health courses, this text represents the breadth and depth of health communication theory and research as it exists today. Online resources for instructors including additional theory tables, PowerPoint slides, test questions and assignments, sample syllabi and lists of additional resources are available at <https://www.routledge.com/9781032100470>

Health Communication and Mass Media Rukhsana Ahmed, Benjamin R. Bates, 2016-04-22 *Health Communication and Mass Media* is a much needed resource for those with a professional or academic interest in the field of health communication. The chapters engage and expand upon significant theories informing efforts at mediated health communication and demonstrate the practical utility of these theories in on going or completed projects. They consider how to balance the ethical and efficacy demands of mediated health communication efforts and discuss both traditional media and communication systems and new web based and mobile media. The book's treatment is broad, reflecting the topical and methodological diversity in the field. It offers an integrated approach to communication theory and application. Readers will be able to appreciate the ways that theory shapes health communication applications and how those applications inform the further construction of theory. They will find practical examples of mediated health communication that can serve as models for their own efforts. While the book serves as an introduction to mediated health communication for students, professionals and practitioners with limited experience, researchers and advanced practitioners will also appreciate the exemplars and theoretical insights offered by the chapter authors. This book will be of interest to anyone involved in health communication.
